2. SAFETY INFORMATION

Please read and understand all safety instructions before assembling or using the shelf unit. Failure to follow these instructions may result in injury or damage to the product.

- **Wall Mounting:** For maximum stability and safety, it is mandatory to fix the shelf unit to a wall using appropriate fasteners (not included). This prevents tipping, especially when shelves are loaded.
- **Weight Capacity:** Do not exceed the maximum weight capacity of 20 kg (44 lbs) per shelf. Distribute weight evenly across each shelf. Overloading can cause structural failure.

- **Assembly:** Assemble the unit on a flat, stable surface. Ensure all components are securely connected before use.
- **Children and Pets:** Keep children and pets away from the unit during assembly. Do not allow children to climb on or play with the shelf unit.
- **Placement:** Place the shelf unit on a level surface. Avoid placing it in areas with high humidity or direct sunlight for prolonged periods, as this may affect material integrity over time.

3. COMPONENTS LIST

Before beginning assembly, ensure all parts are present and undamaged. If any parts are missing or damaged, do not proceed with assembly and contact customer support.

4. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is straightforward and does not require special tools. Follow these steps carefully:

- 1. Prepare the Area:** Clear a flat, clean, and spacious area for assembly.
- 2. Assemble the Base:** Take one shelf panel (A) and attach four vertical support posts (B) into the designated holes on its underside. Ensure they click securely into place.
- 3. Add Feet:** Insert the four feet/base caps (C) into the bottom ends of the vertical support posts attached to the base shelf.
- 4. Stack Shelves:** Place the next shelf panel (A) onto the top ends of the four vertical support posts. Press down firmly until it locks into position. Repeat this step for the remaining three shelf panels, ensuring each is securely seated.
- 5. Complete Top:** Once all five shelves are stacked, the unit should be stable.
- 6. Wall Mounting (Crucial):** Position the assembled shelf unit against the desired wall. Using the wall mounting brackets (D), mark the drilling points on the wall. Drill appropriate holes and secure the brackets to the wall

and the shelf unit using suitable screws and wall anchors (not supplied). This step is essential for preventing the unit from tipping over, especially when loaded.

5. OPERATING INSTRUCTIONS

Once assembled and securely wall-mounted, your Keter shelf unit is ready for use.

- **Loading Items:** Place items on the shelves, distributing weight as evenly as possible.
- **Weight Limit:** Each shelf has a maximum load capacity of 20 kg (44 lbs). Do not exceed this limit. Refer to Image 5.1 for a visual representation of the weight capacity.
- **Stability:** Always ensure the unit remains stable. If you notice any wobbling or instability, re-check the wall mounting and ensure items are distributed correctly.

- **Inspection:** Periodically check all connections and wall mounting points to ensure they remain secure. Tighten any loose fasteners if necessary.
- **Storage:** If disassembling for storage, ensure all parts are clean and dry before storing in a cool, dry place away from direct sunlight.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
