8. TROUBLESHOOTING

If you encounter any issues with your vanity desk, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Lights are not turning on.	Power cord not plugged in. Wall outlet not functioning. Light controller malfunction. Loose bulb connection.	Ensure the power cord is securely plugged into a working wall outlet. Test the wall outlet with another device. Check the connection of the light controller. Ensure all bulbs are screwed in tightly.
Power outlets/USB ports are not working.	Desk not powered. Overload protection triggered. Faulty device.	Verify the desk's main power cord is connected. Unplug all devices, wait a few minutes, then plug them back in one by one. Test with a different device to rule out a faulty device.
Desk feels wobbly or unstable.	Loose assembly hardware. Uneven floor.	Check and tighten all screws and fasteners according to the assembly manual. Place shims under the desk legs if the floor is uneven.
