BaBylissPRO BNTPP62UC

BaBylissPRO Nano Titanium Ultra-Thin Hair Straightener & Extended-Barrel Curling Iron User Manual

Brand: BaBylissPRO

Model: BNTPP62UC

1. INTRODUCTION AND OVERVIEW

The BaBylissPRO Nano Titanium line of professional tools features a unique combination of the latest and most effective technologies. These ultra-lightweight and durable tools allow you to easily switch between smooth and shiny styles and long-lasting radiant curls.

This prepack contains two essential tools: a 1-inch Ultra-Thin Flat Iron and a 1-inch Extended-Barrel Curling Iron, offering versatility for various hair styling needs.

Suggested Use: Ideal for hair curling, straightening, and waving.

2. KEY FEATURES

- **Nano Titanium Plates/Barrel:** Provides excellent heat conductivity for even heat distribution, resulting in smooth, sleek, and frizz-free hair.
- **Ultra-Lightweight Design:** Ensures maximum comfort and ease of use during styling.
- **Extended Plates (Flat Iron):** 5-inch extended plates allow for faster and more efficient styling, especially for longer hair.
- **Adjustable Temperature Settings:** Both tools offer multiple heat settings, allowing you to select the optimal temperature for your hair type, up to 450°F (230°C).
- **360° Swivel Cord:** A 9-foot swivel cord provides flexibility and prevents tangling during use.
- **Dual Voltage:** Designed for international travel, automatically adjusting to the correct voltage.

3. SETUP

1. **Unpack:** Carefully remove the straightener and curling iron from their packaging.
2. **Inspect:** Check both tools for any signs of damage. Do not use if damaged.
3. **Plug In:** Insert the power cord into a suitable electrical outlet. Ensure the voltage is compatible (dual voltage feature will auto-adjust).
4. **Power On:** Locate the power button (usually marked "ON/OFF" or with a power symbol). Press and hold for a few seconds until the indicator light illuminates.
5. **Select Temperature:** Use the temperature control buttons or dial to select your desired heat setting. Refer to the "Operating Instructions" section for recommended temperatures based on hair type. Allow the tool to heat up completely before use.

4. OPERATING INSTRUCTIONS

4.1. Hair Straightening (Flat Iron)

1. **Prepare Hair:** Ensure hair is clean, dry, and free of tangles. Apply a heat protectant spray evenly throughout your hair.
2. **Section Hair:** Divide your hair into small, manageable sections (approximately 1-2 inches wide). Use clips to secure unstyled sections.
3. **Straighten:** Take one section of hair and place it between the heating plates, close to the roots. Gently clamp the plates together and glide the straightener slowly down the hair shaft from roots to ends. Avoid stopping in one spot to prevent heat damage.
4. **Repeat:** Repeat for all sections of hair until desired straightness is achieved. For very thick or coarse hair, you may need to make multiple passes or use smaller sections.

4.2. Hair Curling (Curling Iron)

1. **Prepare Hair:** Ensure hair is clean, dry, and free of tangles. Apply a heat protectant spray evenly throughout your hair.
2. **Section Hair:** Divide your hair into small, manageable sections. The size of the section will determine the tightness of the curl.
3. **Curl:** Open the clamp of the curling iron and place the end of a hair section under the clamp. Roll the iron upwards towards the roots, ensuring the hair is wrapped smoothly around the barrel. Hold for 5-10 seconds, depending on your hair type and desired curl.
4. **Release:** Gently open the clamp and release the curl. Allow the curl to cool completely before styling or brushing to help it set.
5. **Repeat:** Continue curling all sections of hair. For a more natural look, alternate the direction of the curls.

5. MAINTENANCE

- **Cleaning:** Ensure the tool is unplugged and completely cool before cleaning. Wipe the plates/barrel with a soft, damp cloth to remove any product residue. Do not use abrasive cleaners or immerse the tool in water.
- **Storage:** Store the tool in a cool, dry place. Allow it to cool down completely before storing. Do not wrap the cord tightly around the tool, as this can damage the cord.
- **Cord Care:** Regularly inspect the power cord for any damage. If the cord is damaged, do not use the tool and contact customer support for assistance.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Tool not heating up.	Not plugged in correctly; Power switch off; Faulty outlet.	Ensure plug is fully inserted; Turn power switch on; Try a different outlet.
Hair is not straightening/curling effectively.	Temperature too low; Sections too large; Hair not completely dry.	Increase temperature setting; Use smaller sections; Ensure hair is completely dry before styling.
Hair is snagging.	Hair is tangled; Plates/barrel are dirty.	Brush hair thoroughly before styling; Clean plates/barrel as per maintenance instructions.

7. SPECIFICATIONS

Feature	Detail
Product Dimensions	12 x 1 x 1 inches
Item Model Number	BNTPP62UC
UPC	074108483287
Manufacturer	BaBylissPRO
Country of Origin	China
Material	Titanium
Hair Type Compatibility	All Hair Types
Max Temperature	Up to 450°F / 230°C
Cord Length	9 ft.
Voltage	Dual Voltage
