HOMCOM 3-Tier Foldable Clothes Drying Rack Instruction Manual

Model: 3-Tier Foldable Clothes Drying Rack

PRODUCT OVERVIEW

The HOMCOM 3-Tier Foldable Clothes Drying Rack is a versatile and space-saving solution for air-drying laundry. Constructed from rust-proof stainless steel, it features a robust design suitable for both indoor and outdoor use. Its adjustable tiers and rotatable side wings provide ample hanging capacity for various items, from delicate garments to large blankets. Equipped with universal casters, including two with brakes, the rack offers easy mobility and secure placement.

SETUP AND ASSEMBLY

The HOMCOM 3-Tier Foldable Clothes Drying Rack requires easy assembly. Follow the steps below to ensure

proper setup and stability.

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify that all components listed in the parts diagram are present.
2. **Assemble Base:** Connect the base support bars to the main vertical poles. Ensure all connections are secure.
3. **Attach Casters:** Insert the 6 universal casters into the designated slots on the base. Ensure the 2 casters with brakes are placed at the front for easy locking.
4. **Install Tiers:** Attach the 3 height-adjustable tiers to the vertical poles. The tiers should slide into place and lock securely.
5. **Mount Side Wings:** Secure the 2 rotatable side wings to the top section of the rack. These wings feature wave clips for additional hanging options.
6. **Expand and Adjust:** Once assembled, the rack can be expanded to its full width or folded partially/fully for storage. Adjust the height of the tiers as needed for different garment lengths.

OPERATING INSTRUCTIONS

- **Loading Clothes:** Distribute laundry evenly across the 3 tiers and 2 side wings to maintain balance. Utilize the wave clips on the side wings for smaller items like socks or underwear.
- **Adjusting Height:** The tiers are height-adjustable. Lift or lower them to accommodate different garment lengths, preventing clothes from dragging on the floor.
- **Mobility:** Use the 6 universal casters to easily move the rack between locations. Engage the brakes on the two front casters to secure the rack in place.
- **Folding for Storage:** When not in use, the racks and legs can be folded into a compact size for convenient storage in tight spaces.

MAINTENANCE AND CARE

- **Cleaning:** Wipe down the stainless steel bars and plastic components with a damp cloth and mild detergent. Avoid abrasive cleaners that may damage the finish.
- **Rust Prevention:** Although made of rust-proof stainless steel, prolonged exposure to harsh weather conditions may affect its longevity. Store indoors when not in use, especially during rain or extreme humidity.
- **Caster Care:** Periodically check the casters for lint or debris and clean as necessary to ensure smooth rolling.
- **Storage:** Fold the rack to its most compact size for storage. Store in a dry, protected area to extend product life.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Rack is unstable or wobbly.	Uneven load distribution; loose connections.	Redistribute clothes evenly. Check all assembly connections and tighten if necessary.
Casters do not roll smoothly.	Debris caught in casters; brakes engaged.	Clean casters of any lint or hair. Ensure brakes are disengaged.
Tiers do not stay in position.	Improper locking mechanism engagement.	Ensure tiers are fully extended and locked into their designated height positions.
