MAINTENANCE

Proper care and maintenance will extend the life and appearance of your bed frame.

- **Cleaning the Upholstery:** For general cleaning, gently vacuum the fabric upholstery to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner suitable for linen/velvet, testing on an inconspicuous area first.
- **Frame Inspection:** Periodically check all bolts and screws to ensure they are tight. Re-tighten if necessary to maintain stability and prevent noise.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, harsh chemicals, or solvents on any part of the bed frame, as this

may damage the finish or fabric.

- **Environmental Care:** Keep the bed away from direct sunlight and excessive moisture to prevent fading or material degradation.

TROUBLESHOOTING

If you encounter any issues with your bed frame, please refer to the following common solutions:

Problem	Possible Cause	Solution
Squeaking or Noise	Loose bolts or screws; improper slat placement.	Ensure all assembly hardware is securely tightened. Verify that all wooden slats are correctly positioned and secured by the Velcro strips (if applicable).
Instability or Wobbling	Uneven floor; loose connections; missing support legs.	Check that the bed is on a level surface. Re-tighten all bolts. Ensure all center support legs are installed and making firm contact with the floor.
Headboard appears uneven	Improper attachment to side rails.	Review assembly steps for headboard attachment. Ensure bolts are tightened evenly on both sides.
