7. MAINTENANCE

- For general cleaning, wipe the metal frame with a **damp cloth**.
- Follow with a **dry cloth** to prevent water spots and rust.
- Regularly check all screws and bolts to ensure they remain tightened. Re-tighten as necessary to maintain the frame's stability and prevent any potential squeaking.
- Avoid using harsh chemicals or abrasive cleaners, as these may damage the powder-coated finish.

8. TROUBLESHOOTING

- **Squeaking or Wobbling:** If the daybed frame squeaks or wobbles, check all connection points. Ensure that all screws and bolts are fully tightened. Loose connections are the most common cause of instability and noise.
- **Difficulty Aligning Parts During Assembly:** If parts are difficult to align, ensure that no screws have been fully tightened prematurely. Loosen all screws slightly, align the parts, and then tighten them gradually.
- **Missing Parts:** Refer to the 'Package Contents' section. If any parts are missing, contact VECELO customer support immediately for assistance.
