Jolydale 12FT X 20FT Hardtop Gazebo

Jolydale 12FT X 20FT Hardtop Gazebo User Manual

Model: 12FT X 20FT Hardtop Gazebo

INTRODUCTION

This manual provides essential instructions for the assembly, operation, and maintenance of your Jolydale 12FT X 20FT Hardtop Gazebo. This outdoor pavilion features a galvanized steel dual-layer top, an aluminum frame, and includes netting and curtains for enhanced comfort and privacy. Please read this manual thoroughly before beginning assembly or use to ensure safe and correct installation and operation.

SAFETY INFORMATION

- **Anchoring:** Ensure the gazebo is properly anchored to the ground to prevent tipping over, especially in windy conditions. Use the provided ground nails and expansion screws.
- **Assembly:** Assembly requires multiple people. Refer to the assembly instructions carefully.
- **Weather Conditions:** While designed to withstand various weather conditions, extreme weather such as severe storms, heavy snow loads exceeding 6 inches, or winds above 31 MPH may require additional precautions or temporary disassembly.
- **Heat Sources:** Exercise caution when using heat sources inside the gazebo to prevent damage to the netting or curtains.

SETUP AND ASSEMBLY

Your Jolydale Hardtop Gazebo is delivered in multiple boxes (typically 5). It is recommended to have at least 4 people for

assembly due to the size and weight of the components. Follow the detailed instructions provided in the separate assembly guide for step-by-step installation.

Key Structural Components:

- **Aluminum Frame:** The gazebo features a premium Interpon AkzoNobel powder-coated aluminum frame, designed for corrosion resistance and long-term durability.
- **Galvanized Steel Dual-Layer Top:** The roof is constructed from galvanized steel, offering resistance to heavy snow, rain, and wind. The dual-layer design promotes better airflow and ventilation.
- **Triangular Structure:** The mechanical engineering design incorporates a triangular structure for excellent load-bearing capabilities and overall stability.
- **Anchoring System:** Robust anchoring brackets with pre-drilled holes are provided for secure mounting to various floor types.

TRIANGULAR STRUCTURE

Mechanical engineering design, featuring excellent load-bearing capabilities.

Akzonobel Powder Coated

Eco-friendly, UV-protect, Anti-high temperature, Moisture-proof

Aluminum Frame

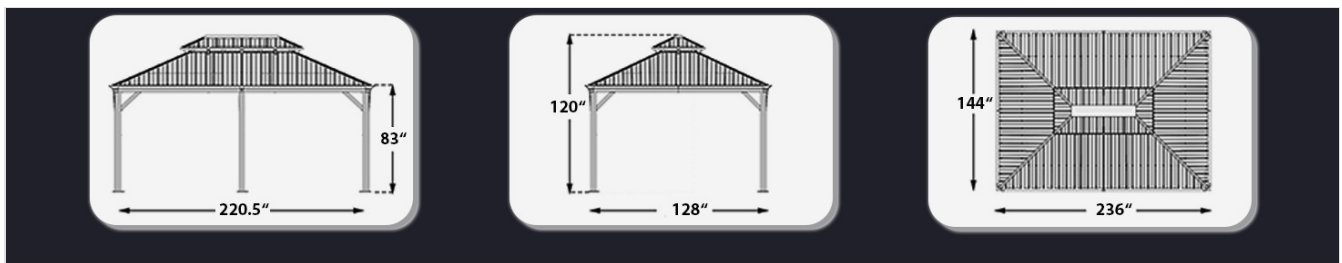

Boasting excellent corrosion resistance, it can withstand the erosion of various chemicals, ensuring stable performance in diverse environments

OPERATING INSTRUCTIONS

Curtains and Netting:

The gazebo includes both inner polyester netting and outer privacy curtains, operating on a built-in dual rail system. This allows for flexible use, providing ventilation, insect protection, or full privacy as needed.

- **Inner Netting:** Use the inner polyester netting to keep insects out while maintaining ventilation. The netting can be zipped closed for full enclosure.
- **Outer Curtains:** The 180g polyester curtains offer privacy and can help block wind. They can be closed for a fully enclosed space or tied back with the provided Velcro straps.
- **Dual Rail System:** Both the netting and curtains run on separate tracks, allowing them to be opened or closed independently.
- **Windproof Hooks:** Utilize the windproof hooks for added security, especially when curtains are closed.

TRANSFORM YOUR SPACE

BUILT-IN DUAL RAIL SYSTEM

Makes it easy to hang mesh netting curtains and extra strings of lights

INNER POLYESTER NETTINGS

Keep ventilated

OUTER PRIVACY CURTAINS

Block the wind Dust-proof

Image: The dual rail system allows for independent operation of the inner netting and outer privacy curtains.

FOUCUS ON EVERY DETAIL

WINDPROOF HOOK

Windproof hooks for added safety

CURTAIN STRAPS

Curtains and netting can be stowed away on windy days

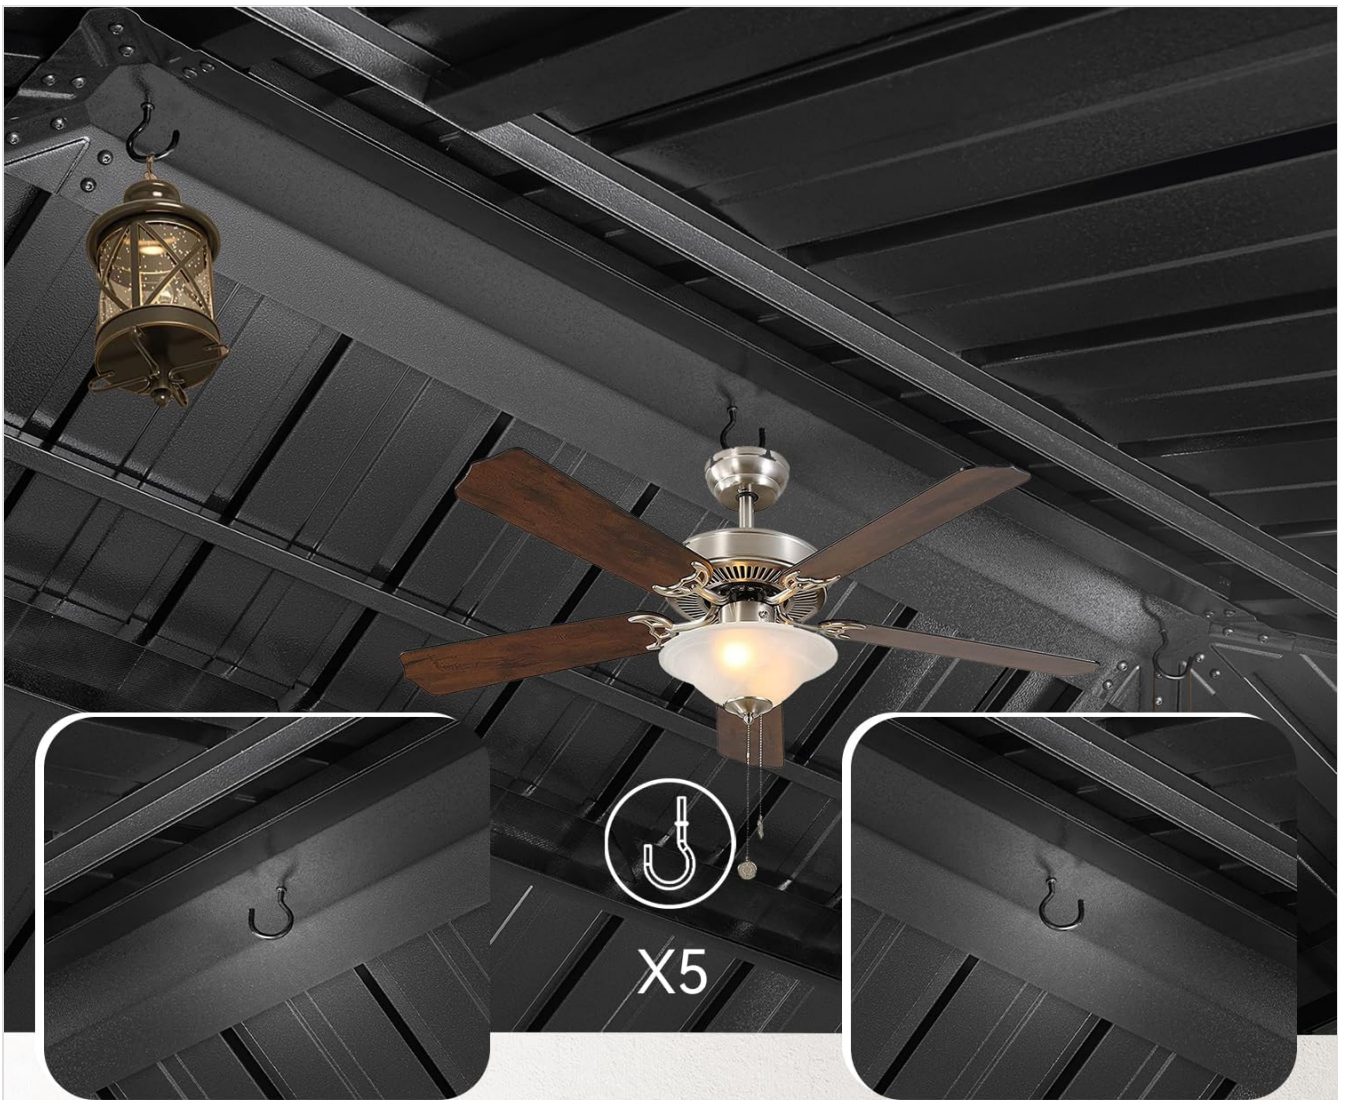

Image: Windproof hooks provide added safety, and curtain straps allow curtains to be stowed away.

Image: Extra Velcro straps are included for neatly organizing and securing the curtains.

Roof Hooks:

The gazebo roof is equipped with five J-shaped hooks. These hooks are designed for hanging various items such as lights, fans, or decorative elements.

"J" SHAPED HOOKS

The roof comes with five "J" shaped hooks to hang things

Image: Five J-shaped hooks are integrated into the roof structure for hanging accessories.

Open Show

The folded mesh screen is easy to store and makes the room well ventilated.

Mosquito Net Display

Mosquito nets can keep the room ventilated and isolate flying insects from entering the interior.

Privacy Protection

The folded mesh screen is easy to store and makes the room well ventilated.

Image: The roof features three designated hook locations for installing fans or lighting.

MAINTENANCE

- **Cleaning:** Regularly clean the aluminum frame with a mild soap and water solution. Rinse thoroughly and dry. Clean the galvanized steel roof as needed to remove debris.
- **Curtains and Netting:** The polyester curtains and netting can be spot cleaned with mild detergent. For deeper cleaning, follow care instructions on the fabric tags. Ensure they are completely dry before storing or closing for extended periods to prevent mildew.
- **Anchoring:** Periodically check all anchoring points and screws to ensure they remain tight and secure. Re-tighten if necessary.
- **Winter Care:** While the galvanized steel roof is designed to withstand snow, it is advisable to clear excessive snow accumulation to prevent structural stress. Consider removing curtains and netting during harsh winter months to prolong their lifespan.

Image: The gazebo is designed for UV, wind (up to 31 MPH), and snow (up to 6 inches) resistance.

GALVANIZED STEEL ROOF

The ventilated roof allows air to circulate all times

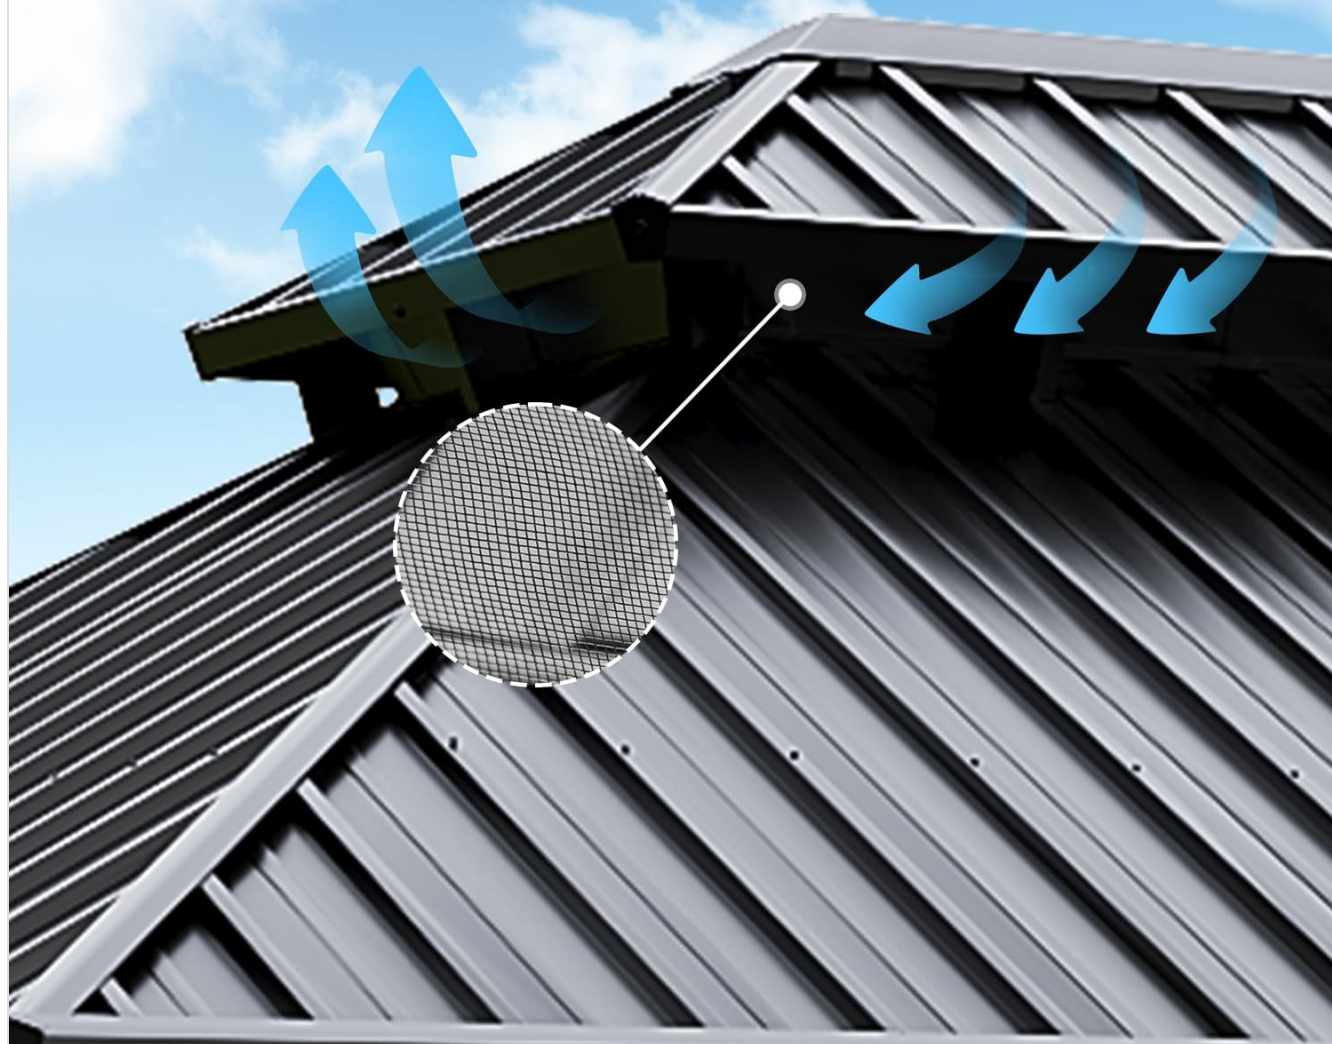

Image: The galvanized steel roof features a ventilated design for continuous air circulation.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Gazebo feels unstable.	Anchoring not secure; loose connections.	Ensure all ground nails and expansion screws are properly installed and tightened. Check all frame connections and tighten bolts.
Curtains/netting do not close smoothly.	Debris in tracks; misaligned fabric.	Clean the dual rail system tracks. Adjust curtains/netting to ensure they are properly aligned on their respective hooks.
Water leakage from roof.	Improper roof panel installation; loose screws.	Verify all roof panels are correctly overlapped and secured according to assembly instructions. Tighten any loose screws on the roof structure.

Problem	Possible Cause	Solution
Fading of curtains.	Prolonged exposure to direct sunlight.	This is a natural process for outdoor fabrics. Consider using UV protectant sprays or removing curtains during periods of intense sun exposure to minimize fading.

SPECIFICATIONS

Feature	Detail
Brand	Jolydale
Model	12FT X 20FT Hardtop Gazebo
Material	Aluminum Frame, Galvanized Steel Roof
Product Dimensions (L x W x H)	236.22"L x 143.7"W x 119.69"H (19.7' L x 12.0' W x 10.0' H)
Item Weight	504 Pounds
Water Resistance Level	Waterproof
Ultraviolet Light Protection	Yes (99% UV Resistant)
Wind Resistance	Up to 31 MPH
Snow Load Capacity	Up to 6 Inches
Occupancy	10-15 people
Assembly Required	Yes
UPC	799413403255
ASIN	B0CTZ7RF5C
