GAOMON MG-1212-GY

GAOMON Hardtop Gazebo 12'x12' Instruction Manual

Model: MG-1212-GY

INTRODUCTION

Thank you for choosing the GAOMON Hardtop Gazebo. This 12'x12' gazebo features a durable double metal roof and a sturdy aluminum alloy frame, designed for year-round outdoor use. It provides a versatile and comfortable space for relaxation, entertaining, and various outdoor activities. This manual provides essential information for the safe assembly, operation, maintenance, and troubleshooting of your gazebo.

Please read this manual thoroughly before assembly and retain it for future reference.

SAFETY INFORMATION

Important Safety Instructions:

- Always assemble the gazebo with at least 2-3 adults.
- Wear appropriate safety gear, including gloves, during assembly.
- Ensure all bolts and screws are securely tightened before use.
- The gazebo is designed to withstand winds up to Beaufort scale 10. In areas prone to strong winds, additional anchoring (e.g., sandbags, concrete anchors) is highly recommended to prevent damage or injury.
- Regularly inspect the structure for any loose connections or damage, especially after severe weather conditions.
- Do not hang heavy objects from the gazebo frame or roof.
- Clear heavy snow accumulation from the roof to prevent structural collapse. The roof has a 7-inch snow load capacity.
- Keep children and pets away from the assembly area.

PACKAGE CONTENTS

Your GAOMON Hardtop Gazebo is shipped in multiple cartons (typically 4 boxes) to ensure safe delivery of all components. Please verify that all packages have been received before beginning assembly.

PACKED INTO 4 CARTONS

prime Delivery

Image: The gazebo components are typically shipped in 4 separate cartons. Ensure all packages are accounted for upon delivery.

Unpack all components carefully and compare them against the parts list provided in the separate printed manual. If any parts are missing or damaged, please contact customer support immediately.

SETUP AND ASSEMBLY INSTRUCTIONS

Assembly of the GAOMON Hardtop Gazebo requires 2-3 people and approximately 6 hours. Basic tools such as an electric drill, gloves, and ladders are recommended. Most screw holes (95%) are pre-drilled for convenience, with minimal self-tapping screws required for water tightness.

1. **Site Preparation:** Choose a level and stable location for your gazebo. Ensure adequate clearance around the structure.
2. **Unpacking and Inspection:** Carefully unpack all boxes and lay out the components. Verify all parts against the included parts list.
3. **Frame Assembly:** Begin by assembling the main aluminum alloy frame. It is crucial to keep most support bolts loose during the initial frame construction. This flexibility will assist in aligning the roof panels later.
4. **Roof Panel Installation:** Install the double metal roof panels. Once the roof panels are in place and aligned, proceed to tighten all previously loosened support bolts.
5. **Curtain and Net Installation:** Attach the independently controlled curtains and mesh netting to the designated rails.
6. **Anchoring:** Securely anchor the gazebo to the ground using the provided anchors. For enhanced stability, especially in windy conditions, consider using additional concrete anchors or sandbags.

OPERATING INSTRUCTIONS

The GAOMON Hardtop Gazebo is designed for versatile outdoor use, offering comfort and protection.

- **Curtains and Mesh:** Utilize the independently controlled curtains and mesh netting to manage light, provide privacy, block mosquitoes, and offer protection from light rain. The smooth rail design allows for easy opening and closing.
- **Ventilation:** The double-tiered roof design promotes airflow, enhancing ventilation and helping to regulate temperature within the gazebo.
- **Drainage:** The roof is engineered for efficient water drainage, preventing accumulation and ensuring a dry space even during rainfall.

INDEPENDENT RAIL DESIGN

for silky smooth opening and closing

Keep bugs out, good ventilation, and easy care

MAINTENANCE

Proper maintenance will extend the lifespan and appearance of your GAOMON Hardtop Gazebo.

- **Cleaning the Frame:** Clean the aluminum frame with a mild soap solution and water. Rinse thoroughly and dry with

a soft cloth. Avoid abrasive cleaners or harsh chemicals that could damage the matte anti-rust coating.

- **Cleaning Curtains and Mesh:** The 200g polyester fabric curtains and mesh are designed to be easy to clean and fade-resistant. They can be spot cleaned with mild soap and water. For deeper cleaning, follow care instructions on the fabric tags, if available. Ensure they are completely dry before storing or retracting for extended periods to prevent mildew.
- **Roof Maintenance:** Periodically inspect the metal roof for any debris, leaves, or snow accumulation. Clear snow promptly, especially if it exceeds the 7-inch capacity. Check for any signs of rust or damage to the roof panels and address them as needed.
- **Hardware Check:** Annually, or after severe weather, check all bolts, screws, and connections to ensure they remain tight and secure.

TROUBLESHOOTING

This section addresses common issues you might encounter with your gazebo.

- **Missing or Damaged Parts Upon Delivery:**

If you receive only part of your order or find damaged components, contact customer support immediately. For oversized products, shipping may involve multiple cartons arriving at different times (1-2 day variance for express shipping). If shipped by truck, you may need to sign for all parts at once.

- **Difficulty During Assembly:**

Refer to the detailed assembly instructions in the included manual. Ensure you have 2-3 people assisting and the recommended tools (electric drills, gloves, ladders). Remember to keep support bolts loose during initial frame assembly to allow for easier alignment of roof panels.

- **Gazebo Instability in Wind:**

Ensure the gazebo is properly anchored to the ground. For areas with high winds, consider reinforcing the anchoring with additional sandbags, concrete anchors, or by bolting the base plates to a concrete patio or deck.

- **Water Leakage from Roof:**

Check that all roof panels are correctly installed and all self-tapping screws are tightened to ensure water tightness. Inspect for any gaps or damage to the roof panels that might compromise their integrity.

- **Curtains/Mesh Not Moving Smoothly:**

Inspect the rails for any obstructions or debris. Ensure the fabric is properly aligned within the rails and not snagged. Clean the rails if necessary.

SPECIFICATIONS

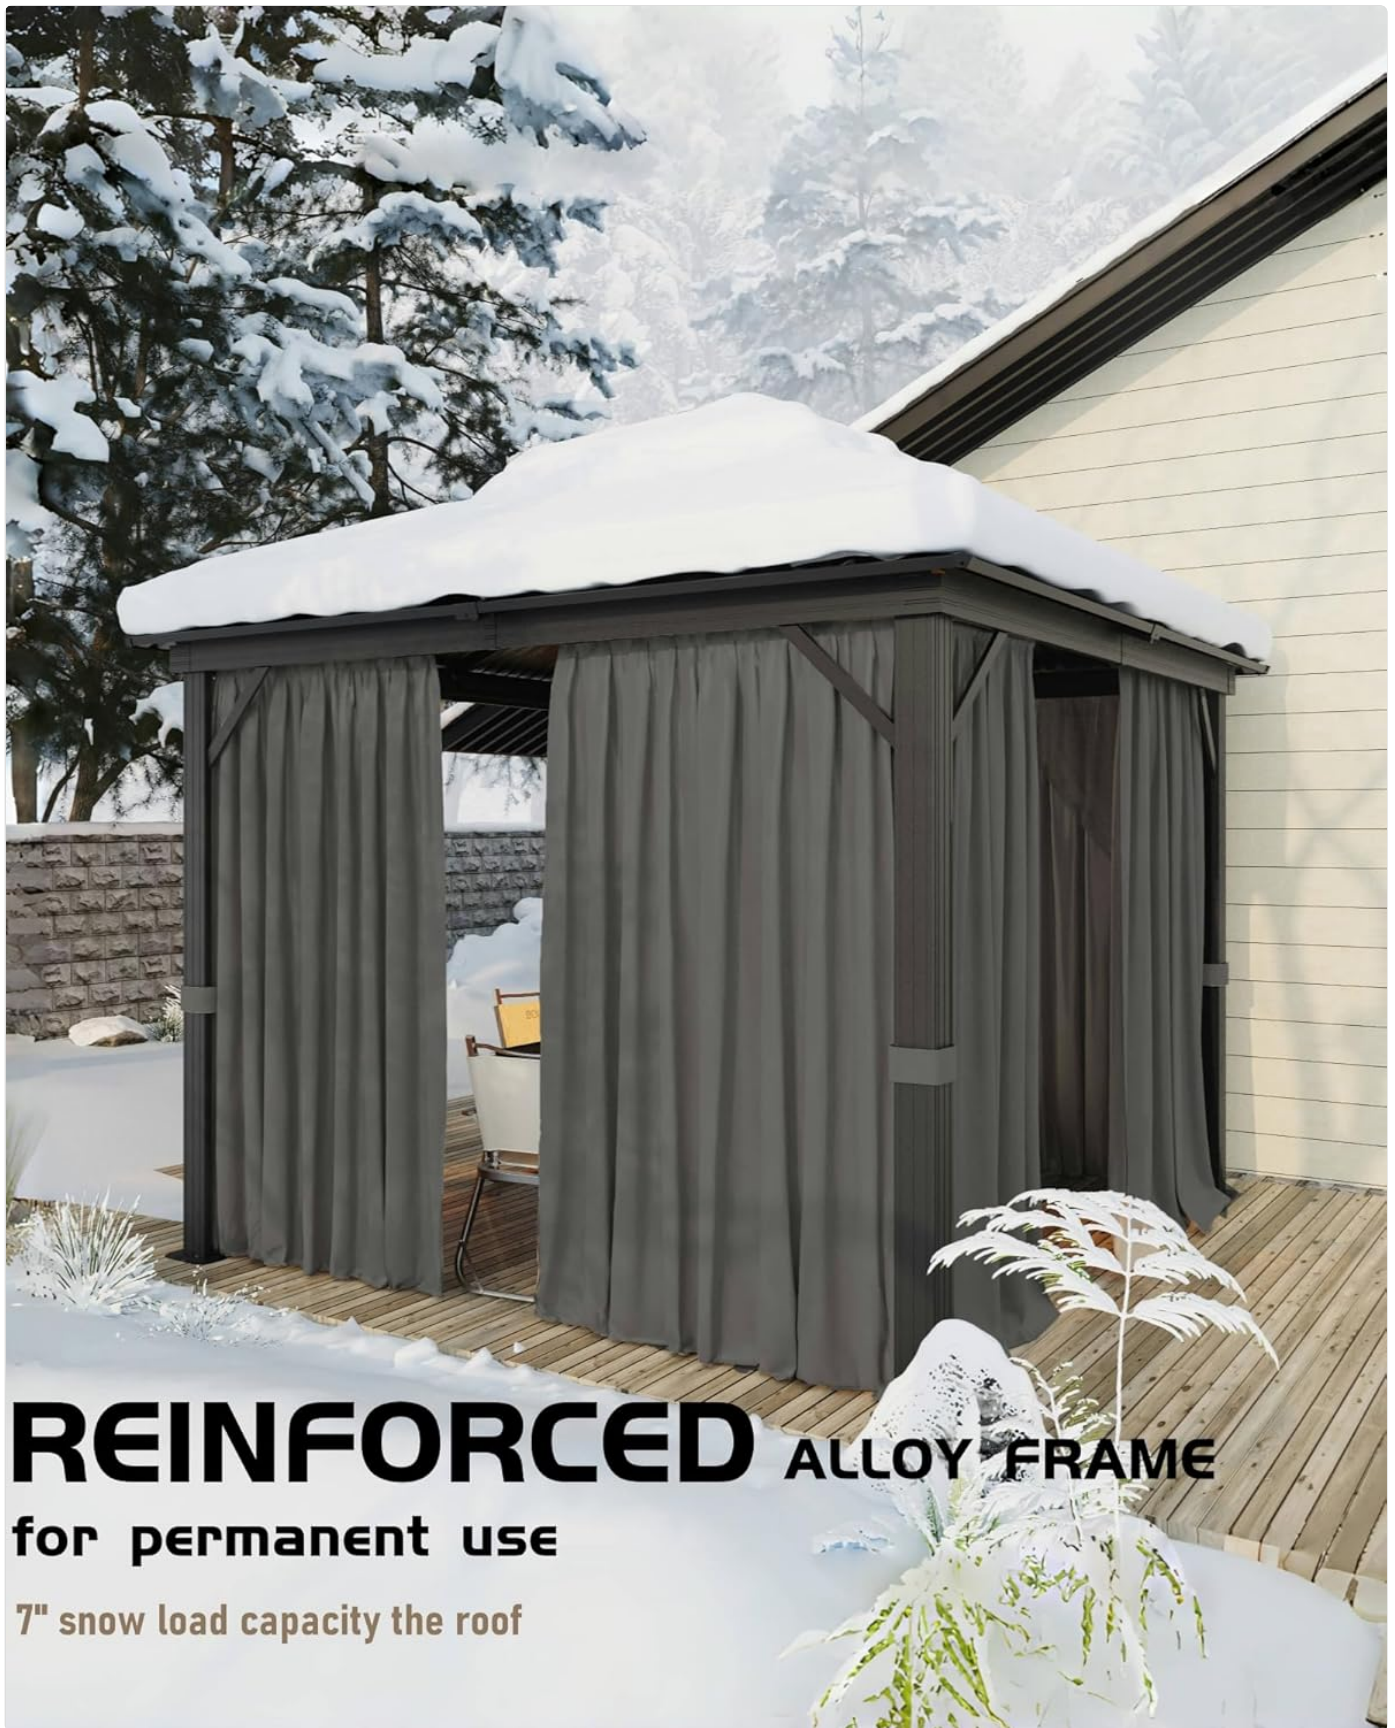

Feature	Detail
Brand	GAOMON
Model Number	MG-1212-GY
Product Dimensions	143"L x 143"W x 120"H (12'x12' nominal)
Material	Aluminum Frame, Metal Roof
Frame Material	Aluminum Alloy
Roof Type	Double Metal Roof
Color	Gray
Item Weight	50 Pounds (Note: Total product weight is approximately 300 lb)
Water Resistance Level	Waterproof
UV Light Protection	Yes
Assembly Required	Yes (2-3 people, approx. 6 hours)
Snow Load Capacity	7 inches
UPC	198290593606
