3. SETUP

3.1 System Requirements

- Operating System: Windows 10 or later
- Compatible Devices: Laptop or Desktop PC with an available USB-A port

3.2 Connecting the Keyboard

1. Locate an available USB-A port on your computer.
2. Plug the USB-A connector of the keyboard's integrated cable into the USB-A port on your computer.
3. The operating system will automatically detect and install the necessary drivers. This process may take a few moments.
4. Once the drivers are installed, the keyboard's RGB lighting will illuminate, indicating it is ready for use.

5. MAINTENANCE

5.1 Cleaning the Keyboard

Regular cleaning helps maintain the keyboard's appearance and functionality.

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the keycaps and chassis. Avoid excessive moisture.
- For dust and debris between keys, use compressed air or a small brush.
- Do not use harsh chemicals, abrasive cleaners, or solvents as they may damage the keyboard's surface or keycap legends.
- Ensure the keyboard is completely dry before reconnecting it to your computer.

5.2 Storage

When not in use for extended periods, store the keyboard in a cool, dry place away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

If you encounter issues with your GameStop GS200 keyboard, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Keyboard not responding	Loose USB connection, driver issue, or faulty USB port.	<ul style="list-style-type: none">• Ensure the USB cable is securely plugged into the computer.• Try connecting the keyboard to a different USB port.• Restart your computer.• Check Device Manager for any keyboard-related errors and update/reinstall drivers if necessary.
RGB lighting not working or stuck	Lighting mode setting, software conflict, or power issue.	<ul style="list-style-type: none">• Press Fn + INS to cycle through lighting modes.• Press Fn + PGUP to increase brightness.• Disconnect and reconnect the keyboard.• Ensure your computer's USB ports provide sufficient power.
Certain keys not registering	Debris under keycap, switch malfunction, or anti-ghosting issue.	<ul style="list-style-type: none">• Clean around and under the affected keycap using compressed air.• Test the key on another computer to rule out software issues.• Ensure anti-ghosting is not being misinterpreted (though unlikely for single keys).
Windows key is disabled	Windows key lock activated.	<ul style="list-style-type: none">• Press Fn + Win to toggle the Windows key lock.
