# Joydeco Linen Blackout Curtains Instruction Manual

Brand: Joydeco | Model: JD21020-100x120

## 1. PRODUCT OVERVIEW

The Joydeco Linen Blackout Curtains are designed to provide 100% light blocking, UV protection, and thermal insulation for your living spaces. Made from premium faux linen fabric, these curtains offer both functionality and an elegant aesthetic. They feature dual hanging options, including a rod pocket and back tabs, for versatile installation.

This product includes one curtain panel, measuring 100 inches wide by 120 inches long, suitable for various window sizes and room types.

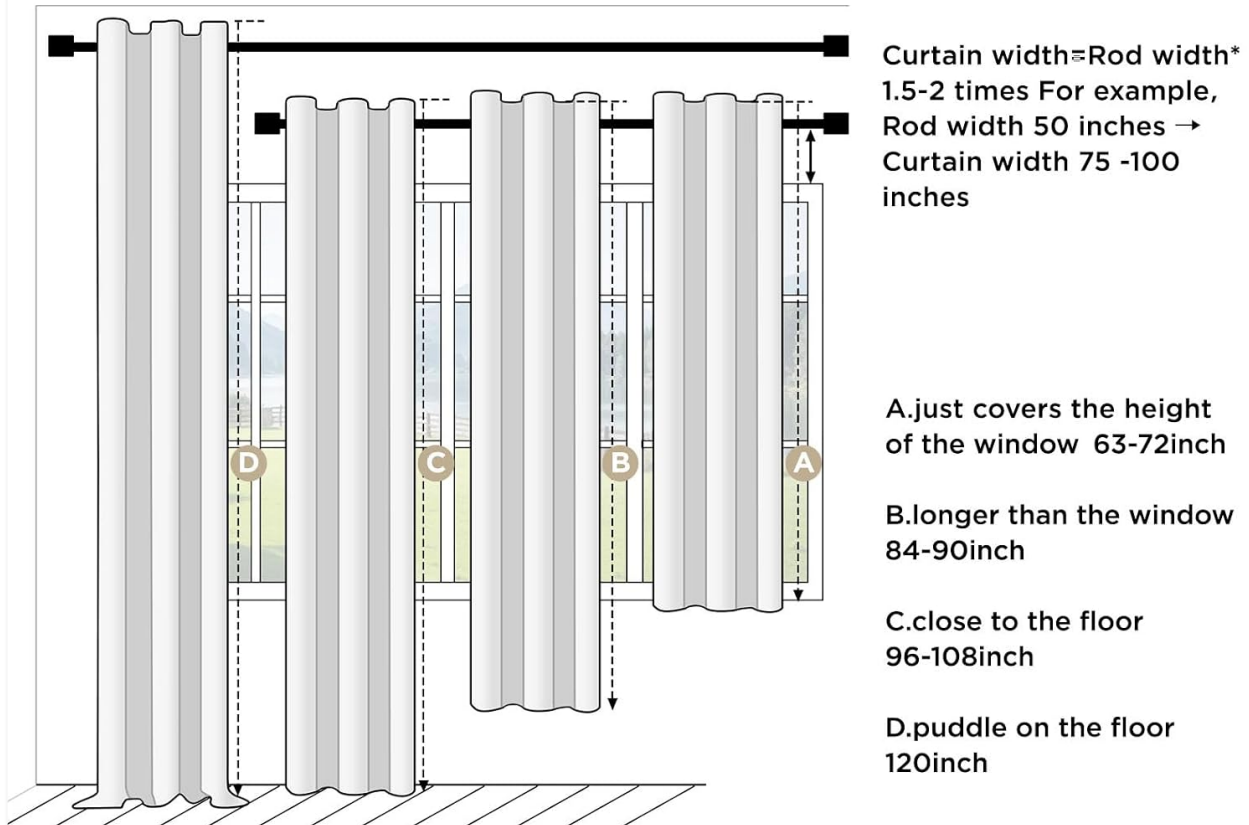

## 2. SETUP AND INSTALLATION

### Choosing the Correct Curtain Size

To ensure optimal coverage and aesthetic appeal, measure your window carefully. For curtain width, multiply your rod width by 1.5 to 2 times. For example, if your rod width is 50 inches, a curtain width of 75-100 inches is recommended. For length, consider the desired drape:

- **63-72 inches:** Just covers the height of the window.
- **84-90 inches:** Longer than the window.
- **96-108 inches:** Close to the floor.
- **120 inches:** Puddle on the floor for a luxurious look.

## HOW TO CHOOSE THE CURTAIN SIZE?

### NOTE

As curtains are in different top styles, like rod pocket, back tab or grommet, there may be a slight error between the measured and actual length.

## Hanging Options

Your Joydeco curtains offer two versatile hanging styles:

- **Rod Pocket:** Thread your curtain rod directly through the sewn pocket at the top of the curtain panel for a classic, gathered look.
- **Back Tabs:** Utilize the fabric loops located on the back of the top hem. Slide your curtain rod through these tabs for a more tailored, pleated appearance.

## 3. OPERATING INSTRUCTIONS

### Achieving 100% Blackout

To achieve complete darkness, ensure the curtain panel fully covers your window opening. The dedicated liner and triple-weave technology block 100% of sunlight and UV rays, creating an ideal environment for sleep or media viewing. For maximum effectiveness, minimize any gaps between the curtain and the wall or floor.

# THERMAL INSULATED

## Thermal Insulation and Noise Reduction

The dense weave of these thermal blackout curtains acts as an insulating barrier, trapping air to keep heat or cold out. This helps regulate room temperature year-round, contributing to energy savings. Additionally, the heavyweight fabric provides enhanced noise reduction, creating a calmer atmosphere.

## 4. MAINTENANCE

### Care Instructions

To maintain the quality and longevity of your Joydeco curtains, follow these care instructions:

- **Machine Wash:** Wash below 30°C (86°F).
- **Do Not Bleach:** Avoid using bleach.
- **No Tumble Dry:** Do not tumble dry.
- **Low Temperature Iron:** Iron at a low temperature if needed.
- **Dry Cleaning Compatible:** Compatible with dry cleaning.

## 5. TROUBLESHOOTING

### Wrinkles from Packaging

Upon arrival, your curtains may have creases from packaging. These can typically be removed by steaming the curtains. Hanging them for a few days may also allow the creases to naturally relax.

### Light Leakage

If you experience minor light leakage, ensure your curtain rod extends sufficiently beyond the window frame and that the curtains are properly closed. The back tab hanging method can help create a more flush fit against the wall, minimizing light gaps.

### Temperature Regulation Issues

For optimal thermal insulation, ensure the curtains are fully closed and cover the entire window area. Any gaps can reduce their effectiveness in maintaining room temperature.
