## vaporr Argus Pro 2

# VOOPOO ARGUS Pro 2 Vape Pod Kit User Manual

Model: ARGUS Pro 2 (Manufacturer Reference: ARGUS001)

## IMPORTANT SAFETY INFORMATION

---

**Health Warning: Keep this product out of the reach of children. This product contains No Nicotine and the following warning only applies when the product is used with nicotine-containing e-liquid: this product contains nicotine which is a highly addictive substance. This tobacco product damages your health and is addictive.**

- Do not use if damaged or tampered with.
- Do not expose to extreme temperatures or direct sunlight.
- Do not immerse in water.
- Use only the charging cable provided or a certified equivalent.
- Dispose of the device responsibly according to local regulations.

## PRODUCT OVERVIEW

---

The VOOPOO ARGUS Pro 2 Vape Pod Kit is an advanced vaping device designed for both direct-to-lung (DTL) and mouth-to-lung (MTL) vaping experiences. It features an integrated design with a robust 3000mAh built-in battery, capable of delivering up to 80W of power. The device incorporates a distinctive top airflow intake system to effectively control e-liquid and condensate leaking, ensuring a clean and enjoyable vape. With its innovative Turbo Mode, the ARGUS Pro 2 provides a significant increase in vapor volume for an enhanced experience. It is compatible with VOOPOO PnP X coils, known for their superior flavor production and vapor density.

## KEY FEATURES

---

- **Powerful Performance:** Max 80W output with a 3000mAh built-in battery for extended vaping sessions.
- **Top Airflow Intake:** Designed to minimize e-liquid leakage and condensate, providing a clean vaping experience.
- **Turbo Mode:** Delivers a 25% increase in vapor volume in one second for an intense burst of flavor and clouds.
- **PnP X Coil Compatibility:** Utilizes advanced PnP X mesh coils for superior flavor and vapor production, supporting both DTL and MTL vaping.
- **Integrated Design:** Features a classic leather streamlined body with an anti-slip pad for comfortable handling.
- **Compact Dimensions:** Measuring 15 x 7 x 2 cm and weighing 80g, it is portable and easy to carry.

# TURBO MODE SO ENCHANTED

With the TURBO mode, ARGUS PRO 2 provides a remarkable 25% increase in vapor volume in one second. The vapor, surging as powerful waves, sparks your inspiration.

## MAX 80 W

Output power ensures a delightful vaping trip

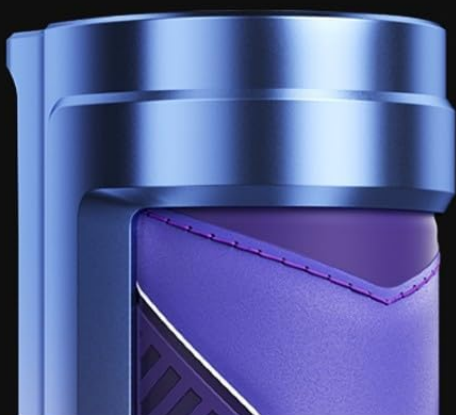

## 3000 mAh

Built-in battery brings an uninterrupted vaping journey

## WHAT'S IN THE BOX

- 1 x VOOPOO ARGUS Pro 2 Device (with built-in battery)
- 1 x PnP X Pod (2ml capacity)
- 1 x PnP X 0.15Ω Coil
- 1 x PnP X 0.3Ω Coil
- 1 x USB Type-C Charging Cable
- 1 x User Manual

Image: All components included in the VOOPOO ARGUS Pro 2 Vape Pod Kit packaging.

## SETUP GUIDE

---

### 1. Initial Charging

Before first use, fully charge your ARGUS Pro 2 device.

1. Connect the USB Type-C cable to the charging port on the device.
2. Connect the other end of the cable to a suitable USB power adapter (e.g., 5V/2A).
3. The display will indicate charging status. Once fully charged, the indicator will change (refer to device display for specifics).

### 2. Coil Installation

The ARGUS Pro 2 uses VOOPOO PnP X coils.

1. Remove the pod from the device.

2. Flip the pod upside down.
3. Insert the desired PnP X coil firmly into the bottom of the pod until it is securely seated. Ensure the coil's flat sides align with the pod's grooves.

### 3. Filling the Pod

The PnP X Pod has a 2ml e-liquid capacity.

1. Locate the silicone plug on the side of the pod.
2. Gently open the silicone plug.
3. Insert the nozzle of your e-liquid bottle into the filling port and slowly fill the pod.
4. Close the silicone plug firmly to prevent leaks.
5. **Important:** After filling a new coil, let the pod stand for 5-10 minutes to allow the e-liquid to fully saturate the coil. This prevents dry hits and extends coil life.

### 4. Attaching the Pod

Once the coil is installed and the pod is filled, attach it to the device.

- Align the magnetic contacts on the bottom of the pod with the contacts on the device.
- Gently push the pod into place until it clicks or feels securely seated.

## OPERATING INSTRUCTIONS

---

### 1. Power On/Off

- To turn the device **On** or **Off**, press the fire button (main button) 5 times rapidly. The screen will display "VOOPOO" or "Power Off".

### 2. Adjusting Wattage

- Use the "+" and "-" adjustment buttons located below the screen to increase or decrease the wattage.
- The device supports a maximum output of 80W. Always set the wattage within the recommended range for your installed coil (e.g., 0.15Ω PnP-X coil: 50-60W; 0.3Ω PnP-X coil: 30-40W).

### 3. Turbo Mode

- The ARGUS Pro 2 features a dedicated Turbo Mode for an instant boost in vapor.
- Refer to your device's specific interface for activating Turbo Mode (often indicated on the screen or through a button combination).
- When activated, Turbo Mode provides a 25% increase in vapor volume in the first second of vaping.

### 4. Airflow Adjustment

- The device features a top airflow intake system.
- Rotate the airflow control ring located at the top of the device (below the mouthpiece) to adjust the airflow to your preference.
- Opening the airflow will result in a looser draw and more vapor, while closing it will provide a tighter draw and potentially more intense flavor.

# TOP AIRFLOW INTAKE

The distinctive top-airflow design effectively controls e-liquid and condensate leaking, which also brings a long aftertaste and lasting flavor combined with PnP X coils.

Image: Diagram illustrating the top airflow intake system of the ARGUS Pro 2, designed to prevent leaks.

## 5. Vaping

- Once the device is powered on and the pod is filled and attached, press and hold the fire button while inhaling from the mouthpiece.
- Release the fire button when you finish inhaling.

## MAINTENANCE

---

### 1. Cleaning the Device

- Regularly wipe down the device body with a soft, dry cloth.
- Clean the magnetic contacts on the device and the bottom of the pod with a cotton swab lightly dampened with rubbing alcohol to ensure good connection.
- Remove any e-liquid condensation from the inside of the pod slot.

## 2. Coil Replacement

Coils are consumable parts and need to be replaced regularly, typically every 1-2 weeks depending on usage and e-liquid.

1. Remove the pod from the device.
2. Pull out the old coil from the bottom of the pod.
3. Insert a new PnP X coil firmly into the pod.
4. Refill the pod and allow it to sit for 5-10 minutes before vaping to prime the new coil.

## 3. Charging Best Practices

- Avoid overcharging the device. Disconnect once fully charged.
- Do not charge overnight unattended.
- Use a reputable USB power adapter.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not turning on/no power	Low battery; Device off; Faulty device	Charge the device; Press fire button 5 times rapidly to turn on; Contact support if issue persists.
Device not charging	Faulty cable/adaptor; Dirty charging port; Device malfunction	Try a different USB-C cable and adapter; Clean charging port; Contact support.
No vapor or weak vapor	Low e-liquid; Coil not properly installed; Coil burnt out; Low battery; Incorrect wattage setting	Refill pod; Reinstall coil; Replace coil; Charge device; Adjust wattage to recommended range.
Leaking from pod	Coil not installed correctly; Silicone plug not sealed; Overfilling; Worn-out coil	Ensure coil is firmly seated; Check silicone plug; Do not overfill; Replace coil.
Burnt taste	Coil not primed; Coil burnt out; Low e-liquid; Wattage too high	Prime new coil for 5-10 mins; Replace coil; Refill pod; Lower wattage.

## SPECIFICATIONS

Product Dimensions	15 x 7 x 2 cm
Item Weight	80 g
Manufacturer	VOOPOO (as per product branding)
Model Reference	ARGUS001
Tank Volume	2 Millilitres
Max Wattage	80 watts
Battery Capacity	3000 Milliamp Hours (Built-in)

<b>Special Feature</b>	Nicotine Free (when used with 0mg e-liquid)
<b>Color</b>	Pearl White
<b>Included Components</b>	Device, Pod, 2 Coils, USB-C Cable, User Manual
