Water Resistance Guidelines:

- The 5ATM rating means the watch can withstand pressures equivalent to a depth of 50 meters. It is suitable for shallow-water activities like swimming in a pool or ocean.
- The IP68 rating indicates protection against dust ingress and immersion in water up to 1.5 meters for 30 minutes.
- Avoid using the watch in hot showers, saunas, or steam rooms, as steam can compromise the seals.
- Do not expose the watch to high-velocity water, such as jet skiing or diving.
- Rinse the watch with fresh water after exposure to saltwater or chlorinated water and dry it thoroughly.

TROUBLESHOOTING

If you encounter issues with your OnePlus Watch 2, refer to the following common solutions:

1. Connectivity Issues (Bluetooth/Wi-Fi)

- Ensure Bluetooth is enabled on both your watch and smartphone.
- Verify that the OHealth app is running in the background on your smartphone.
- Try restarting both your watch and smartphone.
- If issues persist, unpair the watch from your smartphone's Bluetooth settings and re-pair it through the OHealth app.

2. Battery Draining Quickly

- Check if too many apps are running in the background. Close unnecessary applications.
- Reduce screen brightness or set it to auto-brightness.
- Disable always-on display if it's not essential.
- Consider using Power Saver Mode for extended battery life.
- Ensure the watch is charging correctly and the charging contacts are clean.

3. Inaccurate Health Data

- Ensure the watch is worn snugly on your wrist, but not too tight, to allow sensors to function correctly.
- Clean the sensor area on the back of the watch.
- Calibrate GPS if location tracking is inaccurate (refer to OHealth app settings).

4. Watch Not Responding

- Perform a force restart by pressing and holding the power button for approximately 10-15 seconds until the watch reboots.
