USAGE GUIDELINES

The VINGLI Junior Low Loft Bed is designed for efficient space utilization and comfortable sleeping.

Space-Saving Design:

With a height of 33 inches (83.82 cm) from the bed slat to the floor, this low loft bed provides ample under-bed space. This area can be utilized for various purposes:

- **Play Area:** Create a dedicated play zone for children.
- **Storage:** Place storage bins, shelves, or small furniture to organize belongings.
- **Reading Nook:** Set up a cozy spot for reading or relaxation.

The low height is particularly suitable for rooms with lower ceilings or for younger users transitioning to a loft bed, ensuring easier access and reduced fall height.

- **Hardware Check:** Periodically (e.g., every 3-6 months) inspect all bolts, screws, and connections. Tighten any loose hardware to maintain stability.
- **Wood Care:** Protect the wood from extreme temperature changes and direct sunlight to prevent warping or fading.
- **Slat Inspection:** Ensure all wooden slats are intact and properly positioned to provide consistent mattress support.
