EMKE XESFTR1340X1A-DEVC

EMKE Electric Towel Radiator User Manual - Model XESFTR1340X1A-DEVC

Comprehensive instructions for installation, operation, and maintenance of your EMKE Electric Towel Radiator.

1. Introduction

Thank you for choosing the EMKE Electric Towel Radiator. This manual provides essential information for the safe and efficient installation, operation, and maintenance of your new appliance. Please read these instructions carefully before use and retain them for future reference.

The EMKE electric bathroom radiator seamlessly combines functionality and comfort. Its flat design provides a larger contact surface for towels, allowing them to dry faster. The towel warmer features a rapid heating mode with precise temperature adjustment from 30 °C to 70 °C. Timer options range from 2 to 8 hours. In maximum power operation, the towel warmer maintains a constant temperature of 65 °C. The operating duration is flexible and adaptable to individual needs. This electric bathroom radiator comes with pre-assembled heating elements and pre-filled anti-freeze gel for easy installation.

4. Installation Instructions

This towel warmer comes pre-assembled with a heating element and anti-freeze, ensuring quick and easy setup.

1. **Preparation:** Ensure the power supply is disconnected before starting installation.
2. **Mounting Location:** Choose a suitable wall location in your bathroom, ensuring it is within reach of a power outlet and away from direct water spray. The wall distance is flexibly adjustable between 99 and 115 mm.
3. **Marking Drill Holes:** Use the provided mounting kit and, if available, a drilling template to mark the positions for the wall brackets.

4. **Drilling:** Drill holes at the marked positions and insert the anchors.
5. **Attaching Brackets:** Secure the wall brackets and spacers to the wall using the provided screws.
6. **Mounting Radiator:** Carefully lift the radiator and align it with the wall brackets. Secure the radiator to the brackets.
7. **Thermostatic Head:** Attach the thermostatic head to the heating element. Ensure it is securely fastened.
8. **Power Connection:** Once the radiator is securely mounted and the thermostatic head is attached, plug the 1.4 m power cable into a suitable electrical outlet. The cable is designed to easily reach a right-side outlet.

Important Installation Note: The heating rod should always be mounted at the bottom edge of the radiator for proper function and heat distribution. Refer to the diagram below for correct and incorrect mounting positions.

5. Operating Instructions

The EMKE Electric Towel Radiator features an integrated thermostat and timer for flexible control.

5.1 Temperature Control

- The integrated thermostat allows precise temperature adjustment between 30 °C and 70 °C.
- Use the '+' and '-' buttons on the thermostatic head to set your desired temperature.
- The display will show the current temperature setting.
- In maximum power operation, the towel warmer maintains a constant temperature of 65 °C.

5.2 Timer Function

- The convenient timer function enables flexible heating duration settings of 2, 4, 6, or 8 hours.
- Press the timer button on the thermostatic head to cycle through the available timer options.
- The radiator will operate for the selected duration and then automatically switch off.

6. Maintenance and Care

- **Cleaning:** Disconnect the radiator from the power supply before cleaning. Wipe the surface with a soft, damp cloth. Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish.
- **Inspection:** Regularly inspect the power cord and plug for any signs of damage. If damage is found, discontinue use and contact a qualified technician.
- **Internal Fluid:** The radiator is pre-filled with anti-freeze. Do not attempt to open or refill the internal fluid system.

7. Troubleshooting

Problem	Possible Cause	Solution
Radiator does not heat up.	◦ No power supply. ◦ Thermostat set too low. ◦ Timer function active and expired.	◦ Check if the plug is securely in the outlet and the power supply is on. ◦ Increase the temperature setting. ◦ Reset the timer or set it to continuous operation if available.

Problem	Possible Cause	Solution
Radiator is not heating efficiently.	◦ Room size exceeds recommended application area. ◦ Radiator is covered.	◦ Ensure the radiator is suitable for your room size (6 m² for this model). ◦ Remove any coverings from the radiator.
Unusual noises from the radiator.	◦ Normal expansion/contraction of metal during heating/cooling. ◦ Loose mounting.	◦ This is usually normal. ◦ Check if the radiator is securely mounted to the wall.

If you encounter problems not listed here or if the issue persists, please contact EMKE customer support. Do not attempt to repair the appliance yourself.
