## Puig 21700W

# Puig Windshield NG Touring Honda CL 500 23-24 User Manual

Model: 21700W | Brand: Puig

## INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your Puig Windshield NG Touring, specifically designed for Honda CL 500 motorcycles manufactured between 2023 and 2024. Please read this manual thoroughly before installation and use to ensure proper fitment and safe operation.

## SAFETY INFORMATION

- Always wear appropriate safety gear, including eye protection, during installation.
- Ensure the motorcycle is stable and secured before beginning any work.
- Do not overtighten fasteners, as this may damage components. Refer to torque specifications if available.
- Verify all components are securely fastened before operating the motorcycle.
- If you are unsure about any step, consult a qualified motorcycle mechanic.

## WHAT'S IN THE BOX

Your Puig Windshield NG Touring package includes all necessary components for installation.

- Puig Windshield (manufactured in 3mm PMMA)
- Mounting Brackets
- Fasteners and Hardware
- Installation Instructions (this manual)

## SETUP AND INSTALLATION

The Puig Windshield NG Touring is designed for a vehicle-specific fit on the Honda CL 500 (2023-2024 models). Installation is generally straightforward.

1. **Prepare the Motorcycle:** Park the motorcycle on a level surface and ensure it is stable. Turn off the engine and remove the key.
2. **Identify Mounting Points:** Locate the designated mounting points on the front of your Honda CL 500, typically around the headlight or handlebars.
3. **Attach Brackets:** Secure the provided mounting brackets to the motorcycle using the supplied fasteners. Ensure they are oriented correctly according to the design. Do not fully tighten at this stage.
4. **Mount the Windshield:** Carefully align the Puig windshield with the attached brackets. Attach the windshield to the brackets using the remaining fasteners.
5. **Adjust and Tighten:** Once the windshield is in place, adjust its position for optimal fit and appearance. Systematically tighten all fasteners, ensuring a secure but not overly tight connection.
6. **Final Inspection:** Double-check all connections to ensure the windshield is firmly mounted and does not obstruct any controls or lighting.

*Image: The Puig Windshield NG Touring, clear in color, mounted on the front of a black Honda CL 500 motorcycle. The windshield is positioned above the round headlight, providing a sleek and integrated appearance. The motorcycle's handlebars, mirrors, and front suspension are also visible.*

The windshield is manufactured from 3mm PMMA, offering high resistance to impacts and excellent aerodynamic capacity, having been tested in a wind tunnel for optimal performance.

## OPERATING CONSIDERATIONS

---

While a windshield does not have "operation" in the traditional sense, its function directly impacts your riding experience:

- **Wind Deflection:** The Puig NG Touring windshield is designed to deflect wind and debris away from the rider, enhancing comfort, especially at higher speeds.
- **Aerodynamics:** Its design contributes to the overall aerodynamics of the motorcycle, potentially reducing rider fatigue on long rides.
- **Visibility:** Ensure the windshield is always clean and free of obstructions to maintain clear visibility.

## MAINTENANCE

---

Proper maintenance will extend the life and clarity of your windshield.

- **Cleaning:** Clean the windshield regularly with mild soap and water, using a soft cloth. Avoid abrasive cleaners or harsh chemicals, as these can scratch or damage the PMMA material.
- **Inspection:** Periodically inspect the windshield and its mounting hardware for any signs of looseness, cracks, or damage. Tighten any loose fasteners immediately.
- **Storage:** When not in use for extended periods, store the motorcycle in a covered area to protect the windshield from prolonged exposure to harsh weather conditions.

## TROUBLESHOOTING

---

Issue	Possible Cause	Solution
Windshield vibrates or rattles	Loose mounting hardware.	Check and tighten all mounting bolts and screws.
Reduced visibility through windshield	Dirty surface or scratches.	Clean with mild soap and water. If scratched, consider professional polishing or replacement.
Windshield does not fit correctly	Incorrect model year or improper installation.	Verify motorcycle model and year compatibility. Re-read installation instructions carefully.

## SPECIFICATIONS

---

**Model:** Puig Windshield NG Touring

**Part Number:** 21700W

**Material:** 3mm PMMA (Polymethyl methacrylate)

**Color:** Clear

**Compatibility:** Honda CL 500 (2023-2024 models)

**Auto Part Position:** Front

**Fit Type:** Vehicle Specific Fit

**Item Weight:** Approximately 3.54 pounds (1.6 kg)

**Package Dimensions:** Approximately 18.1 x 16.1 x 5 inches (46 x 41 x 12.7 cm)

**Country of Origin:** Spain

## WARRANTY AND SUPPORT

---

For specific warranty information regarding your Puig Windshield NG Touring, please refer to the warranty card

included with your product or visit the official Puig website. Warranty terms typically cover manufacturing defects. For technical support, installation assistance, or to inquire about replacement parts, please contact Puig customer service or your authorized dealer. Contact information can usually be found on the manufacturer's website or product packaging.

*Note: Always purchase genuine Puig replacement parts to ensure compatibility and maintain product integrity.*
