

Bali DF3372

Bali Double Support Wireless Bra Instruction Manual

Model: DF3372

INTRODUCTION

The Bali Double Support Wireless Bra is designed to provide comfort and support without an underwire. Featuring an M-Frame™ cup construction and wirefree two-ply cups, this bra offers a flexible yet supportive fit. The satiny lace-patterned jacquard fabric stretches to adapt to your body. Bali's Comfort-U® design ensures straps stay in place, and the cushioned back closure prevents pinching. This manual provides instructions for proper fitting, wearing, and care to maximize the lifespan and comfort of your bra.

SETUP AND FITTING

Achieving the correct fit is crucial for comfort and support. Follow these steps to ensure your Bali Double Support Wireless Bra fits properly:

- Band Fit:** Fasten the bra on the loosest hook. The band should feel snug but comfortable, lying horizontally across your back without riding up. You should be able to fit two fingers comfortably under the band.
- Cup Fit:** Ensure your breasts are fully enclosed within the M-Frame™ cups. There should be no gaping or spilling over the top or sides. The wirefree two-ply cups are designed for full coverage and support.
- Strap Adjustment:** Adjust the shoulder straps to a comfortable length. The Comfort-U® design helps keep straps in place. Straps should provide light support without digging into your shoulders.

This image displays the back of the Bali Double Support Wireless Bra. It highlights the adjustable shoulder straps and the multi-position hook-and-eye closure, which allows for a customized and secure fit around the torso.

OPERATING (WEARING)

Once fitted, wearing your bra correctly enhances its comfort and support features:

- Put on the bra by slipping your arms through the straps and bringing the band around your back.
- Fasten the hook-and-eye closure at the back. Start with the loosest setting and tighten as needed over time as the bra stretches slightly.
- Lean forward slightly and gently scoop your breast tissue into the cups to ensure full coverage and proper positioning.
- Re-adjust the shoulder straps if necessary to maintain comfort and prevent slipping or digging.

MAINTENANCE AND CARE

Proper care extends the life of your bra and maintains its supportive qualities. The Bali Double Support

Wireless Bra is made from 81% Nylon and 19% Spandex.

- **Washing:** Machine wash your bra. For best results, use a mesh laundry bag to protect it from snagging and stretching. Wash in cold water on a gentle cycle.
- **Drying:** Air dry by laying flat or hanging. Avoid using a machine dryer, as high heat can damage the elastic fibers and fabric, reducing the bra's lifespan and fit.
- **Storage:** Store bras flat or folded to maintain their shape.

TROUBLESHOOTING

If you experience discomfort or fit issues, consider the following:

- **Band Riding Up:** If the band rides up your back, it may be too loose. Try fastening it on a tighter hook or consider a smaller band size.
- **Straps Slipping:** Adjust the straps to be shorter. If they continue to slip, the band might be too large, or the bra style may not be ideal for your shoulder shape.
- **Cups Gaping:** If there is space in the cups, they may be too large. Try a smaller cup size.
- **Spilling Over Cups:** If breast tissue spills over the top or sides, the cups are too small. Try a larger cup size.
- **Pinching or Discomfort:** Ensure the cushioned back closure is properly aligned. If discomfort persists, re-evaluate your size or consult a professional fitter.

SPECIFICATIONS

Model Number	DF3372
Brand	Bali
Material	81% Nylon, 19% Spandex
Closure Type	Hook & Eye
Strap Type	Adjustable
Underwire Type	Wire Free
Bra Cup Coverage	Full Coverage
Support Level	Light Support
Care Instructions	Machine Wash
