WHAT'S IN THE BOX

- ROBOT Mouse

SETUP INSTRUCTIONS

1. Connect the Mouse

The iVOOMi ROBOT Wired Gaming Mouse is a plug-and-play device. Simply connect the USB cable to an available USB port on your computer (Laptop, PC, MacBook) or compatible device (Linux, Android).

2. Driver Installation

No additional drivers are required. Your operating system will automatically detect and install the necessary drivers for the mouse to function.

OPERATING INSTRUCTIONS

1. Basic Functions

- **Left Click:** Primary button for selection and interaction.
- **Right Click:** Secondary button for context menus and additional options.
- **Scroll Wheel:** For scrolling through documents and web pages. Can also be pressed for a middle-click function.
- **DPI Button:** Located behind the scroll wheel, used to adjust cursor sensitivity.

4 Buttons

2. Adjusting DPI (Dots Per Inch)

The mouse features adjustable DPI settings to control cursor sensitivity. You can switch between DPI levels up to 1500 for precise tracking, adapting to various tasks from casual browsing to intensive gaming.

To adjust DPI, press the dedicated **DPI Button** located on the top of the mouse, usually behind the scroll wheel. Each press cycles through available DPI settings (e.g., 800, 1200, 1500 DPI).

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the mouse surface. Avoid using harsh chemicals or abrasive materials that could damage the finish or internal components.
- **Cable Care:** Do not excessively bend, twist, or pull the USB cable to prevent internal wire damage and ensure consistent connectivity.
- **Storage:** Store the mouse in a clean, dry environment away from extreme temperatures and direct sunlight when not in use.

TROUBLESHOOTING

Mouse Not Responding

- Ensure the USB cable is securely connected to a working USB port on your computer.
- Try connecting the mouse to a different USB port on your computer to rule out a faulty port.
- Restart your computer. This can often resolve minor software glitches.

- Test the mouse on another computer to determine if the issue is with the mouse itself or your primary computer's setup.

Inaccurate Tracking or Cursor Jumps

- Clean the optical sensor on the bottom of the mouse with a soft, dry cloth to remove any dust or debris.
- Ensure you are using the mouse on a suitable surface (e.g., a mouse pad). Avoid highly reflective, transparent, or uneven surfaces that can interfere with optical tracking.
- Adjust the DPI setting to a lower value if the cursor is too sensitive or erratic.

SPECIFICATIONS

Feature	Detail
Brand	iVOOMi
Model Name	ROBOT
Model Number	IV-G01
Connectivity Technology	USB (Wired)
Movement Detection Technology	Optical
Mouse Maximum Sensitivity	1500 DPI
Cable Length	150 cm
