SETUP

To set up your DUDAO X3C Type-C Wired Earphones:

1. Locate the Type-C port on your compatible device (e.g., smartphone, tablet, laptop).
2. Insert the Type-C connector of the earphones firmly into the device's Type-C port.
3. Ensure the connection is secure. Your device should automatically recognize the earphones.

4. If your device does not immediately recognize the headset, enable the OTG (On-The-Go) connection feature in your device's settings. Refer to your device's manual for specific instructions on enabling OTG.

MAINTENANCE

To ensure the longevity and optimal performance of your earphones:

- Keep the earphones clean and dry. Avoid exposure to excessive moisture or liquids.
- Store them in a clean, dry place when not in use.
- Avoid pulling the cable forcefully to prevent damage to the wiring or connectors.
- Clean the ear tips regularly with a soft, dry cloth to remove earwax or debris.
- Do not attempt to disassemble or modify the earphones, as this will void the warranty.

TROUBLESHOOTING

- **No Sound:**

- Ensure the Type-C connector is fully inserted into your device.
- Check your device's volume settings.
- If using an Android device, verify that OTG (On-The-Go) connection is enabled in your device settings if the earphones are not recognized automatically.
- Test the earphones with another compatible device to rule out a device-specific issue.

- **Microphone Not Working:**

- Ensure the microphone is not obstructed.
- Check your device's privacy settings to ensure microphone access is granted to the relevant applications.
- Test the microphone with another application or device.

- **Volume Control Not Responding:**

- Ensure the earphones are securely connected.
- Some applications may override the in-line volume control; try adjusting volume directly on your device.
