

## 70mai A510-1

# 70mai A510 HDR 3K Dual Channel Dash Cam User Manual

Model: A510-1 | Brand: 70mai

## INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your 70mai A510 HDR 3K Dual Channel Dash Cam. Please read this manual thoroughly before using the device to ensure proper functionality and to maximize your driving safety and recording experience. The 70mai A510 features a STARVIS 2 IMX675 Sensor, ADAS, built-in GPS Logger, Route Recorder, MaiColor Vivid+ with Night Owl Vision, and supports app playback and sharing, along with optional parking monitoring.

## WHAT'S IN THE Box

Carefully unpack the box and ensure all items are present and in good condition:

- 1x A510 Front Camera
- 1x Midrive RC11 Rear Camera
- 1x Car Charger
- 1x Type-C Cable (3.5M)
- 1x Pry Tool
- 2x Front Cam Electrostatic Sticker
- 2x Rear Cam Electrostatic Sticker
- 1x Front Cam Double Side Tape
- 1x Rear Cam Double Side Tape
- 1x Mounting Bracket with Prefixed Double Sided Tape
- 1x Rear Camera Connecting Cable
- 2x User Manuals

## PRODUCT OVERVIEW

The 70mai A510 Dash Cam is designed to provide comprehensive road surveillance and enhanced driving safety. Key features include:

- 1944P 3K HDR Front & 1080P FHD Rear Recording:** Featuring 6 lenses, F1.8 aperture, and 140° wide angle with WDR for clear and vibrant images in various lighting conditions.
- 2" IPS Screen:** For convenient viewing of recordings directly on the device.
- Built-in ADAS:** Advanced Driver Assistance Systems provide lane departure warning and forward collision warning to enhance driving safety.
- G-Sensor & Emergency Accident Lock:** Automatically saves footage during emergency events, preventing deletion or overwriting.
- Mobile iOS/Android App Enabled:** Connect via Wi-Fi to view live streaming, replay, or download recorded footage.
- Built-in GPS Logger:** Records route data including speed, time, and coordinates.
- 24H Parking Surveillance:** Requires the optional 70mai Hardware Kit UP03/UP04 for continuous monitoring.

## SETUP

### 1. Mounting the Dash Cam

1. Clean the windshield area where the dash cam will be mounted. Ensure it is free of dust and grease.
2. Apply the electrostatic sticker to the chosen area on the windshield. This helps in easy removal and prevents residue.
3. Attach the mounting bracket with its prefixed double-sided tape to the electrostatic sticker. Press firmly for 30 seconds.
4. Slide the A510 Front Camera onto the mounting bracket until it clicks into place.
5. For the Midrive RC11 Rear Camera, choose a suitable location on the rear windshield, clean the surface, apply the electrostatic sticker, and then attach the rear camera with its double-sided tape.

### 2. Power Connection

1. Connect the Type-C cable to the A510 Front Camera.
2. Route the cable neatly along the edge of the windshield and down to your car's cigarette lighter socket using the pry

tool to tuck the cable under trim.

3. Plug the car charger into the cigarette lighter socket and connect the Type-C cable to the car charger.
4. Connect the Rear Camera Connecting Cable to the rear camera and then to the designated port on the front camera. Route this cable similarly.

### 3. Initial Configuration

1. Insert a compatible microSDXC card (up to 256 GB) into the dash cam's memory slot.
2. Turn on your vehicle's ignition. The dash cam will power on automatically.
3. Follow the on-screen prompts to set the language, time, and date.
4. Format the microSD card through the dash cam's settings menu for optimal performance.

## OPERATING INSTRUCTIONS

---

### Recording Modes

- **Loop Recording:** The dash cam continuously records video in short segments (e.g., 1, 3, or 5 minutes). When the memory card is full, the oldest unlocked segments are overwritten.
- **Emergency Recording (G-Sensor):** In the event of a sudden shake or collision, the built-in G-sensor will automatically trigger emergency recording. These video segments are locked and will not be overwritten by loop recording.
- **Time-Lapse Recording:** Available with the optional 70mai Hardware Kit, this mode compresses long periods of recording into short, fast-motion videos, ideal for parking surveillance.

### Advanced Driver Assistance Systems (ADAS)

The ADAS feature provides real-time voice alerts to enhance driving safety:

- **Forward Collision Warning (FCW):** Alerts you when you are too close to the vehicle in front.
- **Lane Departure Warning (LDW):** Alerts you if your vehicle drifts out of its lane.

To enable or disable ADAS, navigate to the settings menu on the dash cam or through the 70mai app.

## ADAS for Improved Safety

Image: Visual representation of ADAS safety features.

### Built-in GPS Logger

The integrated GPS module automatically logs your driving route, speed, and coordinates. This data can be viewed and analyzed via the 70mai mobile application, providing valuable information for trip records or in case of an incident.

## Built-in GPS Logger

Please note that this data can only be synchronized when you are in your car, you cannot view the location of car remotely.

Image: Built-in GPS Logger functionality.

## 24H Parking Surveillance

For continuous monitoring when your vehicle is parked, the 70mai A510 supports 24-hour parking surveillance. This feature requires the separate purchase and installation of the 70mai Hardware Kit (UP03 or UP04). Once installed, the dash cam will automatically detect collisions or unusual movements and record them, even when the car is off.

# 24H Parking Surveillance

## Time-Lapse Recording

## Loop Recording

## Collision Detection

Kind Reminder: The 70mai Hardwire Kit UP03/UP04 is required.

Image: Overview of 24H Parking Surveillance features.

## Mobile App Control

The 70mai mobile app (available for iOS 8.0+ and Android 4.4+) allows you to control your dash cam wirelessly via Wi-Fi. You can:

- View live streaming footage from the dash cam.
- Playback recorded videos and photos.
- Download important footage directly to your phone.
- Adjust camera settings, such as recording resolution, video clip duration, and ADAS sensitivity.

# Effortless App Control

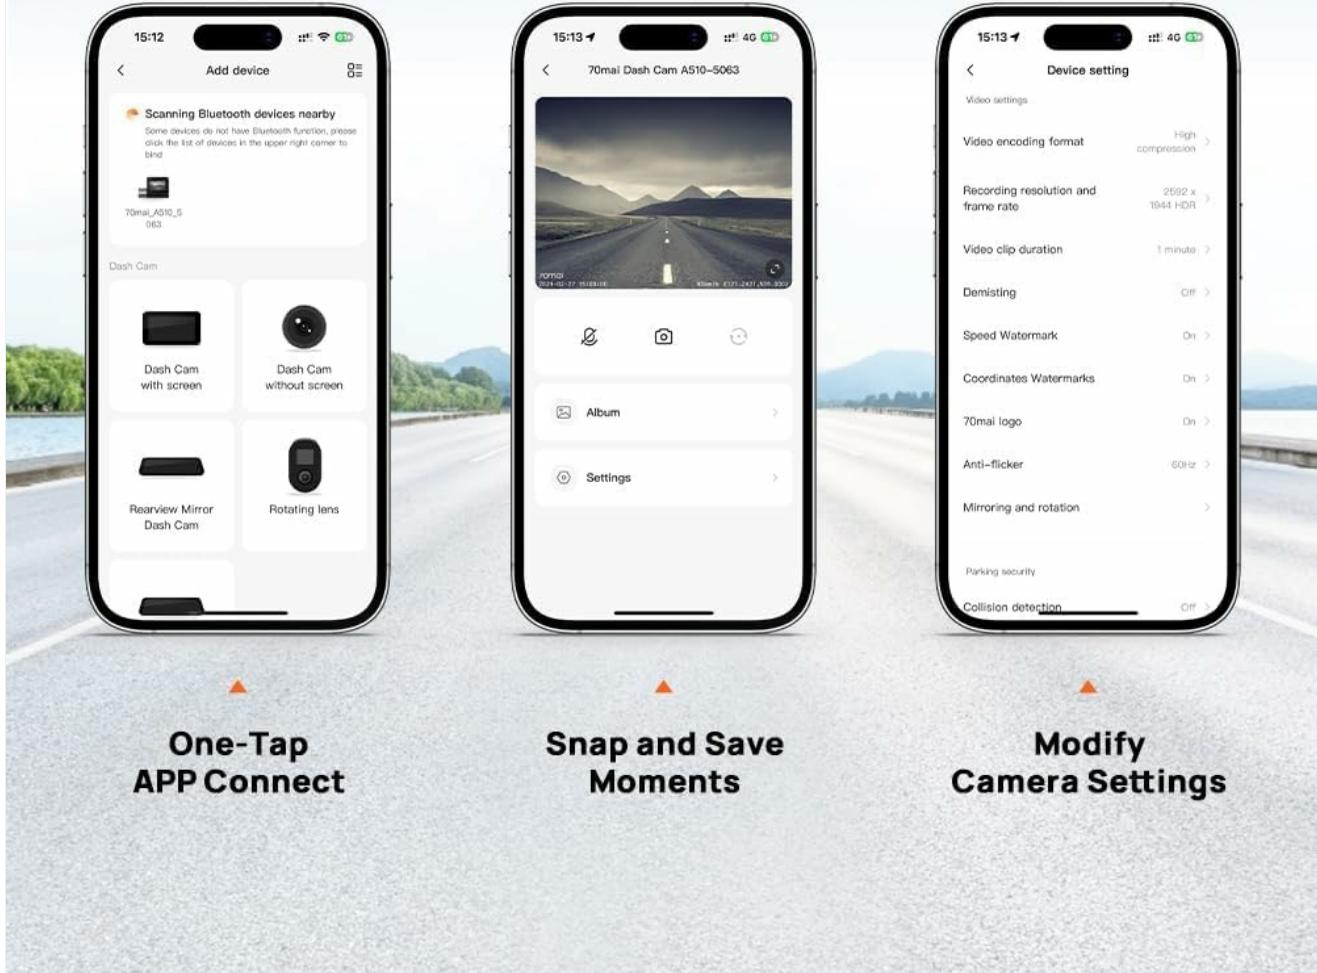

Image: Effortless App Control interface.

## Official Product Videos

No official product videos with verified seller creator type were found in the provided data to embed in this manual.

## MAINTENANCE

- Cleaning:** Regularly wipe the camera lens with a soft, lint-free cloth to ensure clear recordings. Do not use abrasive cleaners.
- Firmware Updates:** Check the 70mai app periodically for firmware updates. Keeping your dash cam's firmware up-to-date ensures optimal performance and access to new features.
- Memory Card Management:** Format the microSD card once a month to prevent data corruption and ensure smooth recording. Back up any important footage before formatting.
- Temperature:** Avoid exposing the dash cam to extreme temperatures for prolonged periods.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Dash cam does not power on.	No power supply; faulty cable/charger; battery drained.	Check car charger connection and vehicle's cigarette lighter socket. Try a different USB cable or car charger. Ensure vehicle ignition is on.
Recording stops or freezes.	Memory card full or corrupted; incompatible/slow memory card.	Format the memory card. Use a high-speed (Class 10 or U3) microSDXC card from a reputable brand. Replace the memory card if issues persist.
App cannot connect to dash cam.	Wi-Fi not enabled on dash cam; incorrect Wi-Fi password; phone's Wi-Fi issue.	Ensure Wi-Fi is enabled on the dash cam. Re-enter the Wi-Fi password. Restart both the dash cam and your phone. Try connecting in a different location to rule out interference.
ADAS alerts are inaccurate or not working.	Improper camera calibration; poor lighting conditions; dirty windshield.	Ensure the dash cam is mounted centrally and correctly. Calibrate ADAS through the app settings. Clean the windshield in front of the camera.
Video quality is poor.	Dirty lens; protective film still on lens; low light conditions; incorrect resolution settings.	Clean the lens. Remove any protective film. Ensure recording resolution is set to maximum (1944p). Update firmware.

## SPECIFICATIONS

---

Feature	Detail
Brand	70mai
Model	A510-1
Model Name	70mai A510 HDR
Product Dimensions	8.3 x 6.05 x 3.8 cm
Item Weight	75 g
Batteries	1 Lithium Ion battery required (included)
Flash Memory Type	microSDXC
Digital Storage Capacity	256 GB (Max)
Compatible Devices	Smartphone
Special Features	App Control, Built-In GPS, Built-In Microphone, Built-In WiFi, G-Sensor
Display Technology	LCD
Standing Screen Display Size	2 Inches
Video Capture Resolution	1944p
Connector Type	Wi-Fi

Feature	Detail
Compatible Media Type	MP4
Mounting Type	Windshield Mount
Actual Viewing Angle	140 Degrees
Country of Origin	China
