

G3 Ferrari R10032RE

G3 Ferrari R10032RE Replacement Heating Elements

For G10032 Pizzeria Snack Napoletana Oven

PRODUCT OVERVIEW

This manual provides instructions for the installation and maintenance of the G3 Ferrari R10032RE replacement heating elements. These elements are specifically designed for the G10032 Pizzeria Snack Napoletana oven, ensuring optimal performance and compatibility. Each element is rated at 600W, providing a total of 1200W when both are installed, consistent with the original oven specifications.

Key Features:

- **Original G3 Ferrari Part:** Ensures perfect fit and performance for the G10032 Pizzeria Snack Napoletana oven.
- **Durable Construction:** Made from high-quality armored steel to withstand high temperatures and ensure longevity.
- **Optimal Heating:** Each resistance provides 600W, totaling 1200W for efficient and even heat distribution.
- **Dimensions:** 26.5 cm (depth) x 20.5 cm (width) x 1.3 cm (height) per element.

PRODUCT COMPONENTS

The package contains a pair of heating elements. Inspect all components upon receipt to ensure they are intact and free from damage.

SPECIFICATIONS

Brand	G3 Ferrari
Model Name	R10032RE
Product Dimensions (each)	26.5P x 20.5I x 1.3H cm
Wattage (each)	600 watts
Total Wattage (pair)	1200 watts
Material	Armored Steel
Components Included	Pair of resistances
Country of Origin	China

INSTALLATION INSTRUCTIONS

Safety Precautions:

- **Disconnect Power:** Always unplug the pizza oven from the electrical outlet before beginning any maintenance or installation.
- **Allow Cooling:** Ensure the oven is completely cool to the touch before handling any internal components.
- **Wear Protective Gear:** It is recommended to wear gloves to protect your hands during the process.
- **Professional Assistance:** If you are unsure about any step, consult a qualified technician.

Tools Required:

- Screwdriver (Phillips and/or flathead, depending on oven model)
- Pliers (optional, for terminal connections)

Step-by-Step Replacement:

1. **Access the Oven Interior:** Carefully open the pizza oven lid. Depending on your specific G10032 model, you may need to remove screws from the base or lid to access the heating elements. Refer to your original oven manual for specific disassembly instructions.
2. **Identify Old Elements:** Locate the worn or damaged heating elements. There are typically two elements, one in the upper part of the lid and one in the lower base.
3. **Disconnect Wiring:** Using a screwdriver or pliers, carefully disconnect the electrical wires from the terminals of the old heating elements. Note the position of each wire for correct re-connection.
4. **Remove Old Elements:** Unscrew or unclip the old heating elements from their mounting points. Gently remove them from the oven.
5. **Install New Elements:** Position the new G3 Ferrari R10032RE heating elements in the same location as the old ones. Secure them using the original screws or clips.
6. **Connect Wiring:** Re-connect the electrical wires to the terminals of the new heating elements. Ensure connections are secure and match the original configuration. Double-check that no wires are loose or touching other components.
7. **Reassemble Oven:** Carefully reassemble the pizza oven, ensuring all screws and covers are properly secured.
8. **Test Functionality:** Plug the oven back into the electrical outlet. Turn it on to a low setting and observe if the new heating elements glow and heat up correctly. Monitor for any unusual smells or sounds. If any issues arise, immediately unplug the oven and re-check your installation.

MAINTENANCE

Proper maintenance ensures the longevity and efficiency of your heating elements.

- **Regular Cleaning:** After the oven has cooled completely and is unplugged, gently wipe down the interior surfaces, including around the heating elements, to remove any food residue or grease. Avoid using abrasive cleaners directly on the elements.
- **Inspect for Damage:** Periodically inspect the heating elements for any signs of physical damage, such as cracks, bends, or discoloration. If damage is observed, replace the elements promptly.
- **Avoid Overloading:** Do not place excessively heavy or large items directly on the heating elements or in a way that could cause them to bend or break.

TROUBLESHOOTING

If you encounter issues after replacing the heating elements, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Oven does not heat up after replacement.	Loose or incorrect wiring connection.	Unplug the oven, allow it to cool, and re-check all electrical connections to the heating elements. Ensure they are secure and correctly matched.
One heating element heats, but the other does not.	Faulty element or incorrect wiring for that specific element.	Unplug the oven, allow it to cool. Check the wiring for the non-functional element. If wiring is correct, the element may be faulty and require replacement.
Oven heats unevenly.	One element partially failing or improper installation.	Ensure both elements are fully functional and properly seated. If one element is heating less effectively, it may need replacement.
Burning smell during initial use.	Residual manufacturing oils or dust.	This is often normal for new heating elements. Run the oven empty at a high temperature for 10-15 minutes in a well-ventilated area to burn off any residues. If the smell persists, unplug and inspect.

WARRANTY AND SUPPORT

These G3 Ferrari replacement heating elements are covered by the standard manufacturer's warranty. Please retain your proof of purchase for warranty claims.

Customer Support:

For technical assistance, warranty inquiries, or to purchase additional parts, please contact G3 Ferrari customer support through their official website or the contact information provided with your original pizza oven purchase. When contacting support, please have your oven model (G10032) and the replacement part model (R10032RE) readily available.
