BNX C7087

BNX TruFilter C7087 Cabin Air Filter User Manual

Model: C7087 | Brand: BNX

1. INTRODUCTION

This manual provides essential information for the installation, maintenance, and optimal performance of your BNX TruFilter C7087 Cabin Air Filter. Designed with advanced HEPA filtration technology, this filter helps ensure cleaner air within your vehicle's cabin.

2. PRODUCT FEATURES

- HEPA 99.97% Filtration:** Designed using 99.97% PFE HEPA meltblown filtration media, based on U.S Standard IEST-RP-CC001.7.
- Comprehensive Protection:** Protects you against harmful microscopic particles such as smoke, smog, mold, bacteria, pet dander, and more.
- Improved Air Quality:** Provides noticeably cleaner air within 24 hours of installation.
- Made in USA:** Proudly manufactured in the U.S. with strict quality standards.

3. COMPATIBILITY

The BNX TruFilter C7087 Cabin Air Filter is compatible with the following vehicle models:

- **Toyota:**
 - 2018-2020 Camry
 - 2019-2021 Avalon
- **Lexus:**
 - 2020 ES300h
 - 2019-2020 ES350
 - 2016-2020 RX350
 - 2016-2020 RX450h

Please verify your vehicle's specific requirements and existing filter model before installation.

4. WHAT'S INCLUDED

Each package contains:

- 3 x BNX TruFilter Cabin Air Filter Model: C7087

5. INSTALLATION (SETUP)

Replacing your cabin air filter is a routine maintenance task. While the exact steps may vary slightly depending on your vehicle model, the general procedure often involves accessing the filter housing, typically located behind the glove compartment or under the hood.

General Installation Steps:

1. Locate your vehicle's cabin air filter housing. Refer to your vehicle's owner's manual for the precise location and access instructions.
2. Open or remove the access panel/glove compartment as per your vehicle's manual.
3. Carefully remove the old cabin air filter, noting its orientation (airflow direction).
4. Insert the new BNX TruFilter C7087, ensuring the airflow arrow on the filter matches the direction indicated on the housing or the old filter.
5. Reassemble the housing cover or glove compartment.

For detailed, vehicle-specific instructions, consult your car's owner's manual or search for instructional videos specific to your make and model. Professional installation is also an option if you are uncomfortable performing the replacement yourself.

6. MAINTENANCE

For optimum performance and to maintain clean cabin air, BNX Cabin Air Filters should be replaced once a year or every 12,000 miles, whichever comes first. Regular replacement prevents the accumulation of pollutants and ensures efficient filtration.

7. SPECIFICATIONS

Attribute	Value
Brand Name	BNX
Model Info	BN-H13-C7087-3PP
Item Weight	4.6 ounces (0.29 Pounds)
Product Dimensions	8.5 x 7.25 x 3.37 inches
Country of Origin	USA
Material Type	Meltblown with support layer
Number of Items	3
UPC	810134863392

8. MANUFACTURING PROCESS

The BNX TruFilter Cabin Air Filters are manufactured in the USA using advanced automated processes to ensure high quality and consistent performance. The manufacturing process involves precise pleating of the HEPA filtration media and assembly into the final filter frame.
