3. Package Contents

- Pemberly Row 12-inch Retro Round Wall Clock (1 unit)
- *Note: 1 x AA battery is required for operation and is not included in the package.*

4. Setup Instructions

1. **Insert Battery:**
   Locate the battery compartment on the back of the clock. Insert one (1) AA battery, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment.

Image 2: Rear view of the clock, displaying the battery compartment and time-setting knob. The dark brown plastic back panel shows the central clock mechanism with a white knob for setting the time and a rectangular slot for the AA battery.

2. **Set Time:**
   After inserting the battery, locate the small setting knob on the clock mechanism at the back. Rotate this knob clockwise or counter-clockwise until the hour and minute hands display the correct time.
3. **Mounting:**
   The clock is designed for wall mounting. Use a suitable wall hook or screw (not included) and hang the clock securely using the integrated hanging slot on the back panel.

5. Operating Instructions

Once the battery is installed and the time is set, the clock will begin to operate automatically. The second hand will move continuously, followed by the minute and hour hands, indicating the current time.

Image 3: Close-up view of the clock face, highlighting the large black numbers, the hour and minute hands, and the thin orange second hand. This detail emphasizes the clear readability of the clock's display.

6. Maintenance

- **Cleaning:** To clean the clock, gently wipe the surface with a soft, dry cloth. For the glass cover, a slightly damp cloth can be used, followed by a dry cloth to prevent streaks. Do not use abrasive cleaners or solvents.
- **Battery Replacement:** Replace the AA battery annually or when the clock begins to lose time or stop functioning. Remove the old battery promptly to prevent leakage.
- **Placement:** Avoid placing the clock in direct sunlight or in areas with extreme temperature fluctuations, as this may affect its accuracy and material integrity.

7. Troubleshooting

- **Clock is not working or stops:**
  - Ensure the AA battery is inserted correctly with the correct polarity (+/-).
  - Replace the battery with a new one.
  - Check if the hands are obstructed or touching each other. Gently adjust if necessary.
- **Clock is losing or gaining time:**
  - Replace the battery with a fresh, high-quality AA battery.
  - Ensure the clock is not exposed to extreme temperatures or strong magnetic fields.
