## Holiday Tree HT-SPR-271P

# Holiday Tree Springfield Pine Artificial Christmas Tree (6') Instruction Manual

Model: HT-SPR-271P | Brand: Holiday Tree

## INTRODUCTION

---

Thank you for choosing the Holiday Tree Springfield Pine Artificial Christmas Tree. This manual provides essential information for the safe and proper assembly, operation, and maintenance of your new 6-foot unlit artificial Christmas tree with pine cones. Please read these instructions carefully before assembly and retain them for future reference.

## IMPORTANT SAFETY INFORMATION

---

- Keep all packaging materials away from children and pets.
- This product is for indoor use only.
- Ensure the tree stand is placed on a flat, stable surface to prevent tipping.
- Do not place the tree near open flames, heat sources, or direct sunlight, as this may damage the material or pose a fire hazard. The tree is flame resistant, but not fireproof.
- Avoid overloading branches with heavy ornaments, which could cause damage or instability.
- If using additional lighting, ensure they are certified for indoor use and follow their respective safety instructions.

## PACKAGE CONTENTS

---

Please verify that all components are present before beginning assembly:

- Tree Sections (typically 2-3 sections, depending on height)
- Tree Stand (metal base with screws)
- Individual Hook-On Branches (various sizes, often color-coded)

*Note: The 6-foot model includes approximately 596 branch tips.*

## ASSEMBLY INSTRUCTIONS

---

- 1. Prepare the Stand:** Unfold the metal tree stand and place it on a flat, level surface. Insert the eye bolts into the stand and tighten them just enough to secure the tree trunk later. Do not overtighten.
- 2. Assemble the Tree Trunk:**
  - Insert the bottom section of the tree trunk into the tree stand. Tighten the eye bolts securely to hold the trunk firmly in place.
  - Insert the middle section(s) of the tree trunk into the top of the previous section. Ensure they are fully seated.
  - Insert the top section of the tree trunk.
- 3. Attach the Branches:** This tree features a "hook-on" branch design.
  - Identify the branch sections. Branches are typically color-coded (e.g., A, B, C) or labeled by length to correspond with specific rings on the tree trunk. Start with the longest branches (usually labeled 'A' or for the bottom section).
  - Locate the corresponding rings on the tree trunk. Each ring will have small hooks or holes where the branches attach.
  - Hook each branch onto its designated hinge or slot on the tree trunk. Work your way up from the bottom section to the top section, attaching all branches for each level before moving to the next.
  - Ensure all branches are securely hooked.
- 4. Shape the Branches (Fluffing):** Once all branches are attached, begin shaping them.
  - Starting from the bottom, gently spread out each individual branch tip. Fan them out and slightly bend them upwards and outwards to fill any gaps and create a full, natural appearance.
  - Work your way around and up the tree, ensuring even distribution of foliage. This process may take some time but is essential for the tree's aesthetic.

**Image:** A fully assembled 6-foot Holiday Tree Springfield Pine Artificial Christmas Tree, featuring green PVC needles and integrated pine cones, standing on a metal base. The branches are fluffed to create a full, conical shape.

## USAGE GUIDELINES

---

Your Holiday Tree Springfield Pine Artificial Christmas Tree is designed for decorative purposes. Once assembled and fluffed, it is ready for decoration.

- **Decoration:** Apply ornaments and lights evenly to maintain balance. Avoid placing excessively heavy decorations on individual branches.

- **Placement:** Position the tree in a visible area, ensuring it does not obstruct walkways or exits. Keep it away from high-traffic areas where it might be accidentally knocked over.

## CARE AND MAINTENANCE

---

- **Cleaning:** Dust the tree periodically with a soft, dry cloth or a feather duster. For stubborn dirt, a slightly damp cloth can be used, but ensure the tree is completely dry before storage. Do not use harsh chemicals or abrasive cleaners.
- **Storage:**
  1. Remove all ornaments and lights.
  2. Carefully unhook the branches, starting from the top section and working downwards. Gently compress the branch tips.
  3. Disassemble the tree trunk sections.
  4. Store all components in their original packaging or a dedicated tree storage bag in a cool, dry place, away from direct sunlight and extreme temperatures. This helps preserve the material and shape for future use.

## TROUBLESHOOTING

---

Problem	Solution
Tree appears sparse or not full.	Ensure all branches are correctly hooked onto their designated rings. Spend additional time "fluffing" each branch tip, spreading them out and bending them to fill gaps.
Tree is wobbly or unstable.	Verify that the tree stand is on a flat, level surface. Check that the eye bolts on the stand are tightened securely around the bottom tree trunk section. Ensure all tree sections are fully seated.
Branches are difficult to hook on.	Ensure you are matching the correct branch size/label to the corresponding ring on the tree trunk. Some force may be needed for the initial setup, but they should hook securely.

## PRODUCT SPECIFICATIONS

---

Feature	Detail
Model Number	HT-SPR-271P
Height	6.0 ft. (72 inches)
Width (Diameter)	43 inches

Feature	Detail
Branch Tips	596
Material	100% Virgin PVC (needles), Galvanized Steel (frame)
Color	Green
Special Feature	Flame Resistant, Integrated Pine Cones
Base Type	Metal Stand
Assembly Type	Hook-On Branches
Recommended Use	Indoor
Item Weight	25 Pounds
UPC	698746704407
