- **Using the Water-Resistant Bag:** The included PE bag is designed to protect stored items from moisture and humidity. Ensure the bag is properly positioned inside the box before storing items.

CARE AND MAINTENANCE

Proper care will extend the life and appearance of your acacia wood storage box.

- **Cleaning:** Wipe the wood surfaces with a damp cloth. For stubborn dirt, use a mild soap solution and rinse thoroughly. Avoid abrasive cleaners.
- **Wood Treatment:** The acacia wood is oil-treated. To maintain its appearance and weather resistance, re-oil the wood periodically (e.g., annually or bi-annually) with a suitable outdoor wood oil.
- **Water-Resistant Bag Care:** The inner PE bag can be wiped clean with a damp cloth. Ensure it is dry before storing items to prevent mold or mildew.
- **Winter Storage:** While designed for outdoor use, storing the box in a sheltered area during harsh winter conditions can further prolong its lifespan.

TROUBLESHOOTING

If you encounter any issues with your storage box, refer to the following common solutions:

- **Lid not closing smoothly:** Check for any obstructions around the hinges or inside the box. Ensure the gas struts are correctly installed and not damaged.
- **Water accumulation inside:** Verify that the water-resistant PE bag is properly installed and intact. Ensure the lid is fully closed.
- **Wobbly structure:** Re-tighten all screws and bolts. Ensure the box is placed on a flat, level surface.
- **Wood discoloration:** This is normal for outdoor wood over time. Regular re-oiling can help maintain the wood's color and protect it from UV exposure.
