

Reencle Reencle Prime

Reencle Prime Electric Composter User Manual

Model: Reencle Prime

1. INTRODUCTION

The Reencle Prime Electric Composter is designed to efficiently transform food waste into nutrient-rich compost using patented microbe technology. This manual provides essential information for the safe and effective operation, maintenance, and troubleshooting of your composter.

Reencle

2. IMPORTANT SAFETY INFORMATION

Please read all safety instructions carefully before operating the Reencle Prime Electric Composter. Failure to follow these instructions may result in injury or damage to the product.

- Always use the Reencle Electric Composter with dry hands.
- Avoid placing sharp objects or hazardous materials inside the composter.
- Keep the composter clean and dry to prevent mold growth.
- Do not operate the composter if the power cord is damaged.
- Unplug the composter before cleaning.
- Always follow local regulations for compost disposal.
- Keep the composter out of reach of children and pets.
- Do not use the composter if the filter system is damaged or not functioning properly.

3. PACKAGE CONTENTS

Verify that all items are present in the package before beginning setup:

- Reencle Electric Composter (x1)
- Carbon Filter (x1, lasts approximately 9-12 months)
- Compost Starter Pack (x1)
- Handy Shovel (x1)

Image 3.1: Included components of the Reencle Prime Electric Composter package.

4. SETUP

1. **Unpack the Composter:** Carefully remove all components from the packaging.
2. **Place the Carbon Filter:** Locate the filter compartment, typically at the back or top of the unit. Insert the carbon filter as indicated in the diagram (refer to the product manual for specific placement).
3. **Add Compost Starter:** Open the composter lid. Pour the entire compost starter pack into the main chamber. This starter contains the necessary microbes for the decomposition process.
4. **Add Water (Initial Activation):** Add approximately 1 liter of water to the chamber with the compost starter. This activates the microbes.
5. **Power On:** Plug the composter into a standard electrical outlet. The unit will begin its initial mixing and heating cycle to prepare the microbes.

5. OPERATION

5.1 Adding Food Waste

The Reencle Prime can process up to 2.2 lbs (approximately 1 kg) of food waste daily. Open the lid and add your food scraps directly into the chamber. The composter will automatically detect the addition and adjust its cycle.

Compost Food Waste in as Little as 24 Hours*

Image 5.1: Visual representation of food waste reduction after processing in the Reencle Prime Composter.

5.2 Acceptable Food Waste

The Reencle Prime is designed to handle a wide variety of organic materials. Refer to the list below for common items:

- **Fruits:** Most fruit scraps, including peels and cores.
- **Vegetables:** All vegetable scraps, including stalks, leaves, and peels.
- **Meat & Fish:** Small quantities of cooked or raw meat and fish.
- **Noodles & Grains:** Cooked pasta, rice, bread, and other grain products.
- **Dairy:** Small amounts of cheese and other dairy products.
- **Cooked Eggs:** Eggshells and cooked egg remnants.

Avoid adding:

- Large bones or pits (e.g., avocado pits, peach pits).

- Excessive liquids or oils.
- Non-food items (plastics, metals, glass).

Process meat, dairy, fruits, veggies & more

Vegetables

Meat,
Fish

Noodles,
Grains

Bread,
Cookies

Sausage,
Salami

Cheese

Watermelon
Rinds

Cooked
Eggs

Image 5.2: Examples of food waste suitable for composting in the Reencle Prime.

5.3 Decomposition Process

The composter utilizes aerobic composting, where microbes break down food scraps. This process typically transforms 2.2 lbs of food scraps into nutrient-rich fertilizer within 2-24 hours, reducing waste volume by up to 90%.

6. MAINTENANCE

6.1 Carbon Filter Replacement

The carbon filter is crucial for odor-free operation. It should be replaced approximately every 9-12 months, depending on usage. Refer to the product manual for specific instructions on accessing and replacing the filter.

6.2 Cleaning

Regular cleaning helps maintain optimal performance and prevents odors. Unplug the unit before cleaning. Wipe the interior and exterior surfaces with a damp cloth. Avoid using abrasive cleaners or submerging the unit in water.

6.3 Emptying Compost

The finished compost can be emptied every 1-3 months, depending on usage. Use the provided shovel to remove the compost. The resulting material is suitable for lawns, gardens, potted plants, starting seeds, and tree beds.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your Reencle Prime Electric Composter.

- **Unpleasant Odor:** If an odor is detected, check the carbon filter. It may need replacement or the air filter area might require cleaning. Ensure only recommended food waste is being added.
- **Slow Decomposition:** This can occur if too much liquid or dense material is added. Reduce the amount of wet waste and ensure the microbes are active (add a small amount of water if the compost appears too dry).
- **Unit Not Starting:** Ensure the power cord is securely plugged into a functional outlet. Check if the lid is properly closed, as some units have safety interlocks.

For persistent issues, please refer to the full product manual or contact Reencle customer support.

8. SPECIFICATIONS

Technical Specifications

DIMENSIONS	12"D x 13"W x 18.4"H(14L)
PACKAGE DIMENSIONS	14.1"D x 14.9"W x 22.2"H
PRODUCT WEIGHT	20.1 lbs
COMPOST CAPACITY	Optimum per day 1.5 lbs Maximum per day 2.2 lbs
POWER	AC adaptor
VOLTAGE	120V / 60Hz
POWER REQUIREMENTS	110V / 50~60Hz

TECHNICAL SPECIFICATION	
Model	Reencle Prime
Product Dimension	12"D x 13"W x 18.4"H(14L)
Package Dimension	14.1"D x 14.9"W x 22.2"H
Weight	9.1 kg /20.1 lbs
Gross weight	13.1 kg /28.9 lbs
Power Consumption(W)	130
Power Consumption Amount(KWh)	1.25KWh(24 hours), 0.052KWh(hour)
Average Power consumption (W)	50
Noise level(dB)	28
1 day capacity(Kg)	0.7~1.2 kg / 1.5~2.2 lbs
Sensor	Automatic opening optical sensor
Opening Method	Big Lid(manual), Small Lid(automatic)
Automatic Opening	O
Hinge	X
Blurring motor	AC motor
Fan motor	BLDC motor(IPX 65)
Control	Power / Dry / Purify / Open(Lock)
Control Method	Touch
Chamber Shape	
Chamber Material	PP (PFOA & PFOS & BPA Free)
Harness	Complicated
Rated Voltage	AC 110V, 50/60Hz
Features	1. Automatic foot sensor 2. Easy to replace filter 3. Hanger for storing shovel 4. Low noise level 5. LED for easy inside checking
Country of origin	Made in Korea
