

RunCam RUNCAM6

RunCam 6 4K FPV Action Camera User Manual

Model: RUNCAM6

1. INTRODUCTION

The RunCam 6 is a compact and powerful 4K FPV action camera designed for capturing high-quality video in various dynamic environments. It features 4K video recording at 30 frames per second, Electronic Image Stabilization (EIS), GyroFlow stabilization support, and Wi-Fi connectivity for easy control and sharing. This manual provides essential information for setting up, operating, and maintaining your RunCam 6 camera.

Figure 1: RunCam 6 4K FPV Action Camera overview.

2. PACKAGE CONTENTS

Verify that all items are present in your package:

- RunCam 6 Camera
- Battery (1x)
- USB Cable
- 1/4 Tripod Adapter
- Mount
- Type-C Control Cable (Note: Type-C control cable is not supported for the time being as per manufacturer information.)
- User Manual

Depending on the purchased option, additional accessories such as an ND Filter Set or a 128GB Micro SD Card may be included.

Package

1 x Camera

1 x 1/4 Tripod adapter

1 x Battery

1x USB cable

1x Type-C Control cable

1 x Mount

+ND Filter Set

+ND Filter Set & 128g SAMSUNG Micro SD CARD

Figure 2: Standard package contents for the RunCam 6 camera.

3. SETUP

3.1 Battery Installation and Charging

1. Locate the battery compartment on the camera.
2. Insert the provided 850mAh Lithium Ion battery, ensuring correct polarity.
3. Close the battery compartment securely.
4. Connect the camera to a USB power source using the supplied USB cable for charging. The camera accepts DC 5-20V input.

3.2 Micro SD Card Installation

A Micro SD card (up to 512GB, U3 or above recommended for 2.7K60/2.7K50/1080P120) is required for recording. Ensure the card is formatted to exFAT to prevent errors.

1. Locate the Micro SD card slot on the camera.
2. Insert the Micro SD card gently until it clicks into place.
3. To remove, press the card inward until it springs out.

3.3 Mounting the Camera

Use the included mount and 1/4 tripod adapter to secure the camera to your desired platform (e.g., RC plane, drone, helmet). Ensure the camera is firmly attached before use.

Comprehensive Upgrade

- 12MP 1/2.3 inch Sensor
- EIS & GyroFlow Supported
- HDMI
- Detachable Lens Protective Cover
- Replaceable ND Filter
- 128 x 64 OLED Screen Display
- Replaceable Battery
- Type C Port (5-20V Input)
- CVBS Real-time Output
- Support Serial PWM Control

4. OPERATING INSTRUCTIONS

4.1 Power On/Off

- **Power On:** Press and hold the Power button until the screen display illuminates.
- **Power Off:** Press and hold the Power button until the screen display turns off.

Figure 4: The OLED screen display showing camera status and settings.

4.2 Video Recording

The RunCam 6 supports various resolutions, including 4K@30fps, 2.7K@60fps, 1080P@120fps, and more. The camera automatically saves video files if power is suddenly lost during recording.

- **Start Recording:** Press the Record button once. The indicator light will change to show recording is active.
- **Stop Recording:** Press the Record button again.

4K Recording

Camera supports high-definition resolution and high frame rate recording up to 4K@30fps, which not only can meet the needs of delicate and clear pictures, but also shoot fast-moving targets, allowing you to review and share the best moments.

ZOH D Dart XL Extreme (Not included in sale)

Figure 5: Illustration of 4K recording capability, capturing high-definition footage.

4.3 Stabilization (EIS & GyroFlow)

The camera features built-in Electronic Image Stabilization (EIS) and supports GyroFlow for post-stabilization, ensuring smooth video footage even in challenging conditions.

- **EIS:** Enabled by default for in-camera stabilization.
- **GyroFlow:** Gyro data is recorded for advanced post-production stabilization using GyroFlow software.

Support EIS and GyroFlow Stabilization

Built-in gyroscope supports EIS and GyroFlow, outputting smooth and stable videos.

Figure 6: Comparison of unstabilized versus stabilized video footage using EIS and GyroFlow.

4.4 Wi-Fi Connectivity and App

Connect your RunCam 6 to the dedicated iOS or Android app via Wi-Fi for live preview, settings adjustment, and file management.

- **Enable Wi-Fi:** Refer to the camera's on-screen menu or specific button combination to activate Wi-Fi.
- **Connect to App:** Search for the camera's Wi-Fi network on your smartphone and connect. Open the RunCam app to control the camera.

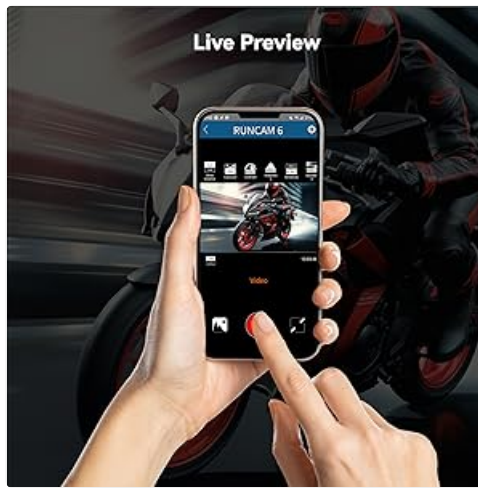

Figure 7: Live preview of camera feed on a smartphone via the RunCam app.

4.5 HDMI and CVBS Output

The camera provides HDMI output for connecting to a television or monitor, and CVBS real-time output for FPV systems.

- **HDMI:** Connect an HDMI cable from the camera to an HDMI-enabled display.
- **CVBS:** Use the appropriate cable to connect the CVBS output to your FPV goggles or monitor.

Figure 8: RunCam 6 connected to FPV goggles and an external monitor via CVBS/HDMI.

4.6 PWM Control

The RunCam 6 supports Serial PWM control, allowing integration with RC systems for remote operation.

- Connect the Type-C control cable (if supported by your setup) to your flight controller or RC receiver for remote control functions.

Figure 9: RunCam 6 connected for Serial and PWM control with a flight controller.

4.7 Advanced Features

- **Adjustable FOV:** The camera offers Large (155°), Middle (142°), and Small (130°) fields of view. Adjust this setting via the camera menu or app.
- **Pre-Record:** Capture footage before you press the record button. Consult the camera settings for activation.
- **Time-Lapse:** Create time-lapse videos. Settings for interval and duration can be configured in the camera menu or app.

Figure 10: Pre-Record feature in action.

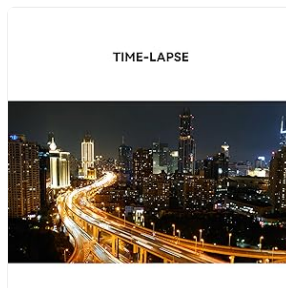

Figure 11: Time-Lapse feature capturing a city skyline.

5. MAINTENANCE

5.1 Lens Care

Keep the camera lens clean for optimal image quality. Use a soft, lint-free cloth specifically designed for optical lenses. Avoid abrasive materials or harsh chemicals.

- The camera includes a detachable lens protective cover. Ensure it is in place when not recording to prevent scratches.
- Replaceable ND filters can be used to achieve better recording effects under different outdoor lighting conditions.

Lens Protection + Replaceable ND Filter

Strengthen lens protection and use ND filters to achieve better recording effects under different outdoor lighting conditions.

Figure 12: Detachable lens protective cover and replaceable ND filter.

5.2 Battery Care

- Store batteries in a cool, dry place.
- Avoid fully discharging the battery frequently.
- If storing for extended periods, charge the battery to approximately 50-60%.

5.3 Micro SD Card Formatting

Regularly format your Micro SD card using the camera's menu option to maintain optimal performance and prevent data corruption. Ensure all important files are backed up before formatting.

6. TROUBLESHOOTING

- **Camera not turning on:** Ensure the battery is charged and correctly inserted. Try charging the camera for at least 30 minutes.

- **Recording issues (e.g., freezing, corrupted files):**

- Ensure the Micro SD card is a high-speed card (U3 or above for higher resolutions).
- Format the Micro SD card in the camera.
- Try a different Micro SD card.

- **Wi-Fi connection problems:**

- Ensure Wi-Fi is enabled on the camera.
- Restart both the camera and your smartphone.
- Ensure you are within close proximity to the camera.

- **Poor image quality:**

- Clean the camera lens.
- Check lighting conditions and consider using an ND filter if too bright.
- Ensure the correct resolution and frame rate settings are selected.
