STANLEY FlowState Tumbler

STANLEY Quencher H2.0 FlowState 40 oz Tumbler User Manual

Model: FlowState Tumbler

PRODUCT OVERVIEW

The STANLEY Quencher H2.0 FlowState Tumbler is a vacuum-insulated stainless steel beverage container designed to keep drinks cold, iced, or hot for extended periods. It features a versatile lid with multiple drinking positions and an ergonomic handle for portability. This tumbler is constructed with durability and sustainability in mind, utilizing recycled, BPA-free stainless steel.

Image: STANLEY Quencher H2.0 FlowState 40 oz Tumbler in Iris color, featuring a handle, lid, and straw. The tumbler is a vibrant blue hue.

SETUP AND FIRST USE

1. **Unpack:** Carefully remove the tumbler, lid, and straw from the packaging.
2. **Initial Cleaning:** Before first use, wash all components (tumbler, lid, and straw) thoroughly. The tumbler and lid are dishwasher safe. For manual cleaning, use warm, soapy water and rinse completely.
3. **Assemble Lid:** Ensure the lid's rotating cover is correctly seated. The lid offers three positions: a straw opening, a drink opening, and a full-cover top for leak resistance.

OPERATING INSTRUCTIONS

Filling the Tumbler

- Remove the lid by twisting counter-clockwise and lifting.
- Fill the tumbler with your desired beverage (water, iced tea, coffee, etc.). Do not overfill.
- Securely place the lid back on the tumbler and twist clockwise until tight to ensure a proper seal.

Using the FlowState Lid

The advanced FlowState lid features a rotating cover with three distinct positions:

- **Straw Opening:** Rotate the cover to align with the straw opening. Insert the reusable straw. This position is designed to resist splashes and holds the straw in place.
- **Drink Opening:** Rotate the cover to expose the drink opening for direct sipping.
- **Full-Cover Top:** Rotate the cover to completely close the lid. This position provides enhanced leak resistance for transport.

The ergonomic, comfort-grip handle allows for easy carrying of the tumbler.

MAINTENANCE AND CLEANING

Proper cleaning ensures the longevity and hygiene of your STANLEY Quencher H2.0 FlowState Tumbler.

Dishwasher Safe

- All components of the tumbler (tumbler body, lid, and straw) are dishwasher safe.
- For best results, place the tumbler on the top rack of your dishwasher.
- Ensure all parts are separated before placing them in the dishwasher.

Hand Washing

- Wash with warm, soapy water using a soft brush or sponge.
- Rinse thoroughly with clean water.
- Allow all parts to air dry completely before reassembly or storage.

Note: Unlike some plastic bottles, this stainless steel tumbler is designed not to retain stains or smells when cleaned properly.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Liquid Leaks from Lid	Lid not properly secured or rotating cover not in full-cover position.	Ensure the lid is twisted tightly onto the tumbler. Rotate the FlowState cover to the full-cover position for maximum leak resistance, especially during transport. Check that the silicone seal on the lid is clean and properly seated.
Beverage Not Staying Cold/Hot	Lid not sealed correctly or extreme external temperatures.	Verify the lid is securely fastened and the FlowState cover is closed. Avoid leaving the tumbler in direct sunlight or extremely hot/cold environments for prolonged periods.
Difficulty Cleaning Straw	Residue buildup inside the straw.	Use a straw cleaning brush (not included) with warm, soapy water to thoroughly clean the interior of the straw. The straw is also dishwasher safe.

SPECIFICATIONS

- **Brand:** STANLEY
- **Model:** FlowState Tumbler
- **Capacity:** 40 Ounces
- **Color:** Iris
- **Material:** 90% Recycled Stainless Steel (BPA-free, Lead-free)
