PawHut Catio Outdoor Cat Enclosure Instruction Manual

Model: D32-017V00OG

1. INTRODUCTION

Thank you for choosing the PawHut Catio Outdoor Cat Enclosure. This manual provides essential information for the safe assembly, operation, and maintenance of your new cat enclosure. Please read these instructions carefully before beginning assembly and retain them for future reference.

2. SAFETY INFORMATION

To ensure the safety of your pets and yourself, please observe the following precautions:

- Always follow assembly instructions precisely.
- Ensure all screws and fasteners are securely tightened before use.
- Regularly inspect the enclosure for any loose parts, damage, or wear. Repair or replace components

as needed.

- This product is designed for outdoor use. Place it on a level, stable surface.
- Keep children away from the assembly area.
- Do not allow pets to chew on wooden components or wire mesh.
- Ensure proper ventilation within the enclosure.

3. PACKAGE CONTENTS

Before assembly, verify that all components are present and undamaged. If any parts are missing or damaged, contact customer support.

- Wooden panels (various sizes for walls, roof, platforms, and resting box)
- Wire mesh panels
- Hardware kit (screws, bolts, hinges, latches)
- Asphalt roofing material
- Instruction Manual

4. ASSEMBLY INSTRUCTIONS

Assembly typically requires two adults and a power drill. Follow the numbered parts and hardware bags for accurate construction.

4.1. Preparation

1. Unpack all components and lay them out on a clean, flat surface.
2. Identify all parts using the provided diagrams. Note that some panels (e.g., parts 11 and 16) may require careful orientation to ensure mesh is on the inside.
3. Remove any protective plastic film from window panels. A box cutter may be needed for stubborn film, but exercise caution to avoid scratching the windows.

4.2. Constructing the Base and Frame

1. Assemble the base frame using the designated wooden beams and screws.
2. Attach the side and back panels to the base, ensuring they are flush and secure.

4.3. Installing the Cat House and Platforms

1. Construct the multi-level cat house section, including the resting box.
2. Install the internal platforms within the main enclosure area. Ensure they are level and firmly attached to support your cat's weight.

Image 4.1: Interior view highlighting the resting box and platforms.

4.4. Attaching Wire Mesh and Roof

1. Securely attach the wire mesh panels to the wooden frame using the provided fasteners.
2. Install the asphalt roof sections over the cat house and enclosure. The asphalt provides weather protection.

Image 4.2: Detail of the asphalt roof and wire mesh construction.

4.5. Installing Doors and Windows

1. Attach all doors and windows using the hinges and latches. Ensure they open and close smoothly.
2. For added security, consider adding extra screws or latches to sliding doors and the top lid of the resting box to prevent accidental opening or pet escapes.

5. OPERATING INSTRUCTIONS

The PawHut Catio provides a safe and stimulating outdoor environment for your cats.

- **Access Points:** The enclosure features multiple doors and windows for easy entry and exit for your cats. Ensure all latches are secured when your cats are inside.
- **Top Opening:** The roof of the enclosed resting area can be opened for easy access to your cat, for cleaning, or to provide treats.
- **Multi-Level Design:** Cats can utilize the various platforms for climbing, resting, and observing their surroundings. The enclosed resting box offers a secure, darker space.

6. MAINTENANCE

Regular maintenance will extend the life of your catio and ensure a healthy environment for your pets.

- **Cleaning:** Periodically clean the interior and exterior surfaces with a pet-safe cleaner. Remove any debris or waste promptly.
- **Weather Protection:** The asphalt roof provides protection from light rain. For prolonged wet weather or extreme conditions, consider additional coverings or relocate the catio to a more sheltered area.

Keep the catio in a dry place when not in use or during harsh weather.

- **Inspection:** Regularly check all wooden components for signs of rot, splintering, or damage. Inspect the wire mesh for any breaks or sharp edges. Tighten any loose screws.

7. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Difficulty with part alignment:** If certain panels (e.g., parts 11 and 16) do not align correctly, ensure they are oriented with the mesh facing inwards. Some parts may appear similar but have specific orientations.
- **Doors or lid not secure:** The sliding doors and the top lid of the enclosed area may benefit from additional security. Consider installing extra screws or latches to prevent pets from opening them.
- **Wobbling or instability:** Ensure the catio is placed on a completely level surface. Re-check all screw connections and tighten any that are loose.

8. SPECIFICATIONS

Feature	Detail
Overall Dimensions (L x W x H)	76" x 39.25" x 45.25"
Item Weight	90 Pounds
