

7MAGIC D36 Toothbrush replacement heads

7MAGIC Model D36 Toothbrush Replacement Brush Heads Instruction Manual

Model: D36 Toothbrush replacement heads | Brand: 7MAGIC

INTRODUCTION

The 7MAGIC Model D36 Toothbrush Replacement Brush Heads are designed to provide a thorough and effective cleaning experience for your oral hygiene routine. These replacement heads are engineered for deep cleaning, featuring advanced bristle technology to reach difficult areas and enhance brushing efficiency. This manual provides essential information on compatibility, installation, usage, and maintenance to ensure optimal performance and longevity of your brush heads.

SETUP AND INSTALLATION

Replacing the 7MAGIC toothbrush head is a straightforward process that does not require any special tools. Follow these steps to securely attach a new brush head to your toothbrush handle:

1. **Align the Head:** Hold the replacement toothbrush head and the toothbrush handle. Ensure the bristles of the new head are aligned in the same direction as the previous head or the intended brushing direction.
2. **Snap into Place:** Gently push the replacement toothbrush head onto the metal shaft of the toothbrush handle until it snaps securely into place. A firm, yet gentle push is usually sufficient.

Ensure the brush head is firmly seated to prevent it from detaching during use and to ensure proper sonic vibration transfer.

OPERATING INSTRUCTIONS

The 7MAGIC D36 replacement brush heads are designed to work in conjunction with your 7MAGIC electric toothbrush to provide an effective and comprehensive oral cleaning experience.

- **Thorough Cleaning:** The brush heads feature vibrations that penetrate into crevices and hard-to-reach areas, effectively removing stains and plaque. This design allows for cleaning more tooth surfaces in less time, enhancing overall brushing efficiency.
- **Comprehensive Oral Cleaning:** The W-shaped design of the sonic toothbrush heads is engineered to reach a wider range of tooth surfaces, including the front, back, and biting surfaces. This shape assists in cleaning the gaps between teeth and the areas behind them, ensuring a more thorough removal of food residue.
- **Gentle Yet Effective:** The bristles are made of durable nylon, known for high wear resistance. Their soft yet resilient nature allows them to gently clean tooth surfaces and along the gum line, effectively removing food residue without causing discomfort.

Thorough Cleaning

Removes **10x** more
plaque than manual brushes

MAINTENANCE

Proper maintenance of your toothbrush head is crucial for effective oral hygiene and to ensure the longevity of the product.

- **Rinse After Use:** After each brushing session, thoroughly rinse the brush head under running water to remove any toothpaste residue and debris.
- **Air Dry:** Allow the brush head to air dry in an upright position to prevent bacterial growth.
- **Replacement Reminder:** The bristles of the 7MAGIC D36 brush heads are designed to lighten in color over time. This fading serves as a visual reminder that it is time to replace the brush head. It is recommended to replace your toothbrush head every three months, or sooner if the bristles appear frayed or worn, to maintain optimal cleaning performance and hygiene.

TROUBLESHOOTING

This section addresses common inquiries regarding the 7MAGIC Model D36 Toothbrush Replacement Brush Heads.

- **Brush Head Not Fitting Securely:** Ensure the brush head is correctly aligned with the metal shaft of the toothbrush handle. Apply gentle, firm pressure until you feel it snap into place. Do not force the head, as this may damage the connection.
- **Bristles Fraying Quickly:** Excessive pressure during brushing can cause bristles to fray prematurely. Brush with light pressure, allowing the sonic vibrations to do the work. Also, ensure you are replacing the brush head every three months as recommended.
- **Reduced Cleaning Effectiveness:** If you notice a decrease in cleaning effectiveness, it is likely time to replace your brush head. The bristles wear down over time, reducing their ability to effectively remove plaque and debris. Refer to the "Maintenance" section for replacement reminders.

SPECIFICATIONS

Feature	Detail
