Setup and Installation

The Luxshiny Round Lamp Base Counterweight is designed for straightforward installation to enhance lamp stability. Follow these steps:

1. **Assess Compatibility:** Ensure your lamp's existing base or pole diameter is compatible with the counterweight's central opening (approximately 2.16 inches / 5.5 cm) and overall diameter (9.16 inches / 23.3 cm).
2. **Positioning:** Carefully lift your lamp. Place the Luxshiny counterweight directly underneath the lamp's existing base, ensuring the lamp pole passes through the central opening of the counterweight.
3. **Secure Placement:** Lower the lamp back down, making sure the counterweight is centered and flush with the bottom of the lamp's base. The added weight will provide a more stable foundation.

4. **Verify Stability:** Gently test the lamp's stability to confirm it is now more secure and less prone to tipping.

Usage and Stability

Once installed, the counterweight significantly increases the overall mass at the base of your lamp, lowering its center of gravity. This makes the lamp more resistant to accidental bumps or movements, enhancing safety in your home or office environment.

Maintenance

The Luxshiny Round Lamp Base Counterweight requires minimal maintenance. To ensure its longevity and appearance:

- **Cleaning:** Wipe the surface with a soft, damp cloth as needed to remove dust or dirt. Avoid abrasive cleaners or harsh chemicals, which may damage the plastic finish.
- **Inspection:** Periodically check the counterweight for any signs of damage or wear. Ensure it remains securely positioned under your lamp base.
- **Storage:** If removed, store the counterweight in a dry place away from extreme temperatures.

Troubleshooting

If you encounter issues with your Luxshiny Round Lamp Base Counterweight, consider the following:

- **Counterweight Does Not Fit:**
  - Verify the dimensions of your lamp's base and pole against the specifications provided in this manual. The counterweight has a diameter of 9.16 inches (23.3 cm) and a central opening of 2.16 inches (5.5 cm).
  - Ensure there are no obstructions preventing the counterweight from sitting flush.
- **Lamp Still Feels Unstable:**
  - Confirm the counterweight is properly centered under the lamp base.
  - For very tall or top-heavy lamps, additional stability measures may be required beyond a single counterweight.
