Yitong Angel Queen 18 Inch

Yitong Angel 18 Inch Queen Metal Platform Bed Frame Instruction Manual

Model: Queen 18 Inch

1. Important Safety Information

Please read and understand all instructions before assembly and use. Keep this manual for future reference.

- **Weight Capacity:** Do not load more than **3500 lbs** on the bed frame. Exceeding this limit may cause structural damage or collapse.
- **Assembly:** Follow all assembly instructions carefully. Incorrect assembly can lead to instability and potential injury.
- **Maintenance:** Regularly check all bolts and connections to ensure they remain tight. Loose connections can cause noise and reduce stability.
- **Placement:** Ensure the bed frame is placed on a level surface to prevent wobbling and uneven weight distribution.

2. Package Contents

Verify that all components are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

Detailed view of bed frame components including strong structure, anti-slip gaskets, and rubber mats.

Included Components:

- Bed Frame Sections (Metal)
- Steel Slats
- Anti-slip Gaskets (4 pieces)
- Rubber Mats (for feet)
- Assembly Tools (Allen wrench, etc.)
- Instruction Manual

3. Setup and Assembly

The Yitong Angel bed frame is designed for easy assembly, typically taking approximately 15 minutes. All necessary tools are included.

Assembly Steps:

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.

2. **Assemble Frame Sections:** Connect the main frame sections using the provided bolts and the included Allen wrench. Ensure all connections are finger-tight before final tightening.
3. **Install Steel Slats:** Place the steel slats into the designated slots on the frame. The unique U-shaped groove design helps secure the slats.
4. **Attach Anti-slip Gaskets:** Install the four anti-slip gaskets onto the frame where the mattress will rest. These help prevent mattress slippage.
5. **Apply Rubber Mats:** Place the thickened rubber mats onto the bottom of each bed frame support foot. This protects your floor and reduces noise.
6. **Final Tightening:** Once all components are in place, securely tighten all bolts. Do not overtighten.

4. Operating Instructions

The Yitong Angel bed frame provides a stable and supportive foundation for your mattress without the need for a box spring.

Key Features:

- **No Box Spring Needed:** The strong and durable steel slats are designed to support and extend the life of various mattress types, including latex, memory foam, or innerspring mattresses.
- **Under-bed Storage:** With an 18-inch height, the frame offers approximately 16 inches of clearance underneath, providing ample space for storing items like seasonal clothing, shoes, or storage bins.
- **Non-slip Design:** Integrated anti-slip gaskets and a U-shaped groove design for the slats help keep your mattress securely in place, minimizing movement.
- **Noise-Free:** The robust construction and rubberized feet are engineered to provide a quiet sleeping experience.

Close-up view of the U-shaped groove design for slat retention and the stable horizontal add-on tube for improved stability.

5. Maintenance

Proper maintenance ensures the longevity and optimal performance of your bed frame.

- **Regular Inspection:** Periodically inspect the bed frame for any signs of wear, damage, or loose connections.
- **Tighten Bolts:** Every 3-6 months, re-tighten all assembly bolts to maintain stability and prevent squeaking. Do not overtighten.
- **Cleaning:** Wipe the metal frame with a damp cloth and mild detergent if necessary. Avoid abrasive cleaners that could damage the finish.
- **Floor Protection:** Ensure the rubber mats on the feet are intact to protect your flooring. Replace if worn or missing.

6. Troubleshooting

Refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Bed frame squeaks	Loose bolts or uneven surface.	Ensure all bolts are tightened securely. Check that the bed frame is on a level surface.
Mattress slides	Anti-slip gaskets not installed or ineffective.	Verify that the four anti-slip gaskets are correctly installed. Ensure slats are properly seated in the U-shaped grooves.
Frame feels unstable	Loose connections or damaged components.	Re-tighten all bolts. Inspect for any damaged parts, especially center support legs. Do not exceed the maximum weight capacity.

7. Specifications

Detailed specifications for the Yitong Angel 18 Inch Queen Metal Platform Bed Frame.

Feature	Detail
Size	Queen
Material	Alloy Steel
Product Dimensions (L x W x H)	79.5" x 59.5" x 18"
Under-bed Clearance	16 inches
Maximum Weight Recommendation	3500 lbs
Special Features	Heavy Duty Metal, Steel Slat Support, No Box Spring Needed, Easy Assembly, Storage Space, Squeak Resistant, Non-slip Design
Included Components	Bed frame, Assembly tools
Assembly Time	Approx. 15 minutes
