SETUP AND ASSEMBLY

The Madesa Modular Closet Wardrobe is delivered in a "Knock Down" condition, meaning it comes in non-assembled pieces. Professional installation by a service partner is recommended for optimal setup.

Assembly Steps (General Guidance):

1. **Unpack and Verify:** Carefully unpack all components and verify against the included parts list.
2. **Identify Modules:** The wardrobe consists of three independent modules. Identify each section (two hanging units, one central shelving unit).
3. **Assemble Frames:** Begin by assembling the main frames of each module according to the detailed instructions provided in the physical manual.
4. **Install Shelves and Rods:** Securely install all shelves and metal hanging rods into their designated positions.

5. **Assemble Drawers:** Assemble the four spacious drawers, ensuring the runners are correctly aligned for smooth operation. Pay attention to screw types for drawer rails to prevent jamming.
6. **Connect Modules:** Once individual modules are assembled, connect them together. The central columns may have pre-drilled holes for connecting modules, potentially reducing the need for wall fixation between modules.
7. **Wall Fixation (Recommended):** For enhanced stability and safety, it is highly recommended to fix the assembled wardrobe to a sturdy wall using the provided hardware. This prevents tipping.

OPERATING INSTRUCTIONS

Your Madesa Modular Closet Wardrobe is designed for versatile storage of clothing and accessories. It features:

- **Hanging Units:** Two sections equipped with metal hanging rods for shirts, dresses, coats, and other garments.
- **Shelving Unit:** A central section with multiple shelves for folded clothes, hats, bags, and other items.

- **Drawers:** Four spacious drawers (two in each hanging unit) for smaller items, undergarments, or accessories.

MAINTENANCE

To keep your Madesa Modular Closet Wardrobe in excellent condition, follow these simple maintenance guidelines:

- **Cleaning:** Wipe surfaces with a damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the engineered wood and polyester paint finish.
- **Hardware Check:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary to maintain structural integrity.
- **Load Distribution:** Distribute weight evenly across shelves and hanging rods to prevent warping or damage.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading or discoloration of the finish.

TROUBLESHOOTING

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Wardrobe feels wobbly or unstable.	Loose fasteners; not fixed to wall.	Check and tighten all screws. Ensure the wardrobe is properly fixed to the wall as recommended in the assembly section.
Drawers do not slide smoothly.	Incorrectly installed runners; debris in runners; overloaded drawer.	Verify drawer runner installation. Clean any debris from the runners. Reduce drawer contents if overloaded.
Shelves appear to sag.	Overloaded shelf.	Reduce the weight on the shelf. Distribute items more evenly.
