## 1. SAFETY INFORMATION

---

Read all instructions before assembly and use to ensure safe operation and prevent injury or damage.

- Always ensure the umbrella base is properly weighted to prevent tipping, especially in windy conditions. Two sandbags are included for this purpose; fill them with sand (not included) for optimal stability.
- Do not use the umbrella in strong winds, heavy rain, or other severe weather. Close and secure the umbrella when not in use or during adverse weather conditions.
- Keep children and pets away from the umbrella during opening and closing operations to avoid pinching or other injuries.
- Ensure all parts are securely fastened before each use. Regularly check connections for tightness.
- Avoid placing the umbrella near open flames, barbecues, or other heat sources to prevent fire hazards.

## 2. PACKAGE CONTENTS

---

Verify that all components are present and undamaged before beginning assembly. If any parts are missing or damaged, contact customer support.

- Umbrella Canopy (1)
- Center Pole (1)
- Base Frame (1)
- Sandbags (2)

- Crank Handle (1)
- Assembly Hardware (Screws, bolts, washers, etc.)

Waterproof

UV-resistant

**Waterproof Cloth**

100% polyester fiber, waterproof, UV-resistant and anti-fading

**12 Strong Parasol Ribs**

Perfect support is provided, enhancing durability

**Base Included**

The durable parasol base is included, no need to purchase separately. The sandbag is not included

**Built-in Crank System**

The easy-to-operate crank system can easily open and close the parasol

This image illustrates the main components: the waterproof canopy, the strong parasol ribs, the included base, and the built-in crank system for operation.

### 3. SETUP INSTRUCTIONS

#### 3.1. Base Assembly

1. Place the base frame on a flat, stable, and level surface.
2. Assemble the base components according to the diagrams provided in your physical manual, ensuring all connections are secure and tightened.
3. Fill the two included sandbags with the required amount of sand (sand not included) and place them into the base for optimal stability.
4. Cover the sandbags with the provided base cover to protect them and enhance aesthetics.

This diagram shows the four steps for assembling the umbrella base, including the placement of sandbags for enhanced stability.

### 3.2. Pole and Canopy Assembly

1. Insert the bottom section of the center pole into the assembled base, ensuring it is firmly seated and secured with any provided fasteners.
2. Attach the upper section of the center pole to the bottom section by screwing it in. The screw-in iron pole design ensures a secure and stable connection.
3. Carefully lift the umbrella canopy and insert its lower end into the top of the assembled pole. Ensure the safety latch mechanism aligns and secures the canopy to the pole.

**Buckle Band**  
Convenient for storage  
when not used

**Screw-in Iron Pole**  
Built-in rounded threads for  
easy screwing

**Metal Material**  
Heavy-duty metal frame with  
the spray-treated surface

This image highlights key details for assembly and storage: the buckle band for securing the canopy when closed, the threaded screw-in iron pole connection, and the durable metal construction.

## Heavy-Duty Metal Frame

- The high-quality and powder-coated metal frame is durable and weather-resistant.
- The safety latch can fix the umbrella fabric for safe usage.

This image shows the robust metal frame and the safety latch, which is used to fix the umbrella fabric for secure usage.

## 4. OPERATING INSTRUCTIONS

---

### 4.1. Opening the Umbrella

1. Ensure the umbrella is clear of any overhead or surrounding obstructions.
2. Locate the hand crank on the center pole.
3. Turn the crank clockwise to gradually open the umbrella canopy. Continue turning until the canopy is fully extended and taut.
4. Once open, ensure the safety latch (if applicable) is engaged to prevent accidental closing.

### 4.2. Closing the Umbrella

1. Disengage any safety latches.
2. Turn the hand crank counter-clockwise to retract the umbrella canopy.
3. Continue cranking until the canopy is fully closed and compact against the pole.

4. Use the integrated buckle band to secure the closed canopy, preventing it from unfurling in the wind.

This image demonstrates the effortless crank system, illustrating the progression from a fully closed umbrella to a partially open and then fully open state.

## 5. CARE AND MAINTENANCE

- **Cleaning:** To clean the canopy, wipe it with a damp cloth and a mild soap solution. Do not use harsh chemicals, bleach, or abrasive cleaners, as these can damage the fabric. Rinse thoroughly and allow the canopy to air dry completely before closing or storing.
- **Storage:** When the umbrella is not in use for extended periods, especially during off-season or anticipated severe weather, close the umbrella and secure it with the buckle band. Store it in a dry, protected area to prolong its lifespan and prevent damage.
- **Base Stability:** Regularly check the sandbags in the base to ensure they are adequately filled and correctly positioned. Refill with sand as needed to maintain optimal stability.
- **Frame Inspection:** Periodically inspect the iron frame and ribs for any signs of wear, rust, or damage. Tighten any loose screws or connections. Address any rust promptly to prevent further deterioration.
- **Weather Conditions:** Always close the umbrella during high winds, heavy rain, thunderstorms, or other severe

weather conditions to prevent structural damage or personal injury.

## 6. TROUBLESHOOTING

---

### 6.1. Umbrella Does Not Open/Close Smoothly

- Check for any physical obstructions in the canopy fabric or the crank mechanism.
- Ensure the crank handle is properly attached and not stripped. If the crank feels loose or ineffective, inspect its connection point.
- Inspect the internal cords or cables for tangles, fraying, or damage. If damaged, contact customer support.

### 6.2. Umbrella Tips Over Easily

- Verify that the sandbags in the base are adequately filled with sand and correctly positioned to provide sufficient weight.
- Ensure the umbrella base is placed on a flat, level, and stable surface. Uneven ground can compromise stability.
- Do not use the umbrella in windy conditions. High winds can easily overturn even a well-weighted umbrella.

### 6.3. Canopy Fabric Appears Faded or Damaged

- The canopy is made of UV-resistant polyester, but prolonged and intense exposure to direct sunlight can cause some fading over time. This is normal wear.
- To minimize fading, ensure the umbrella is closed and covered when not in use.
- For significant damage such as tears or rips, contact customer support for potential replacement options.

## 7. PRODUCT SPECIFICATIONS
