Bewinner 3-Channel Dash Cam User Manual

Model: Bewinner6yi0gkb3tf | Brand: Bewinner

1. INTRODUCTION

Thank you for choosing the Bewinner 3-Channel Dash Cam. This device is designed to provide comprehensive video surveillance for your vehicle, capturing footage from the front, interior, and rear. Equipped with advanced features like Wi-Fi connectivity, motion detection, G-sensor technology, and infrared night vision, it ensures a secure and well-documented driving experience. Please read this manual carefully before operating the device to ensure proper usage and optimal performance.

2. KEY FEATURES

- **Three-Channel Camera System:** Records simultaneously from front, interior, and rear perspectives, offering complete vehicle coverage.
- **Wireless Wi-Fi Connectivity:** Easily view, download, and manage recorded videos and photos remotely via the dedicated smartphone application.
- **Motion Detection:** Automatically initiates recording when movement is detected within the camera's field of view, ensuring no critical moments are missed.
- **Infrared Night Vision:** Provides clear video footage even in low-light conditions or during nighttime driving, enhancing safety and visibility.
- **G-Sensor Technology:** Automatically saves important recording files in the event of an accident or collision, preventing overwriting or deletion.
- **Loop Recording:** Continuous recording without missing any seconds.
- **2-inch LCD Screen:** For real-time viewing and playback.

3. PACKAGE CONTENTS

Please check the package contents upon unboxing. If any items are missing or damaged, contact customer support.

Image: Overview of all included components.

- Bewinner 3-Channel Dash Cam Unit
- Suction Cup Mount
- Rear Camera with Cable
- Car Power Adapter (Charger)
- USB Cable
- User Manual (This Document)
- Mounting Screws (for rear camera, if applicable)

4. SETUP GUIDE

4.1. Installation

Follow these steps to install your dash cam and rear camera:

1. **Mount the Dash Cam:** Attach the suction cup mount to the dash cam. Clean a spot on your windshield, preferably behind the rearview mirror, to ensure it does not obstruct your view. Press the suction cup firmly against the glass and lock the lever to secure it.

Image: Dash Cam with Suction Mount.

2. **Adjust Camera Angle:** Adjust the dash cam's angle to ensure the front camera captures the road ahead clearly. The interior camera should face the cabin.

Triple camera

It is installed in front of the car, inside the car and behind the car to record the driving situation of the vehicle.

Image: Dash Cam installed in a vehicle.

3. **Install the Rear Camera:** Mount the rear camera on the rear windshield or near the license plate using the adhesive or screws provided. Ensure it has a clear view of the road behind.

Image: Rear Camera Unit.

4. **Route Cables:** Carefully route the power cable and rear camera cable along the vehicle's interior trim to keep them tidy and out of the way.

4.2. Power Connection

Connect the car power adapter to your vehicle's cigarette lighter socket and plug the other end into the dash cam's power input port. The device will typically power on automatically when the vehicle starts.

4.3. Inserting the Memory Card

Insert a high-speed (Class 10 or higher) Micro SD card (up to 64GB, not included) into the designated slot on the dash cam. Ensure the card is inserted correctly until it clicks into place. Format the card through the dash cam's settings menu before first use for optimal performance.

5. OPERATING INSTRUCTIONS

5.1 Basic Operation

5.1. Basic Operation

- **Power On/Off:** The dash cam powers on automatically when connected to power and the vehicle starts. To manually power on/off, press and hold the power button.
- **Recording:** Once powered on, the dash cam will automatically begin loop recording. A recording indicator will typically be visible on the screen.
- **Playback:** Use the device's buttons to navigate the menu and select recorded files for playback on the 2-inch LCD screen.

5.2. Wi-Fi Connection and App Usage

The dash cam features built-in Wi-Fi for easy access to recordings via your smartphone.

1. **Download the App:** Search for and download the "Viidure" app from your smartphone's app store (Google Play Store for Android or Apple App Store for iOS).
2. **Activate Dash Cam Wi-Fi:** On the dash cam, navigate to the Wi-Fi settings and enable the Wi-Fi hotspot. The screen will display the Wi-Fi SSID (network name) and password.

Wireless WiFi

You can view, download and delete videos and photos remotely through the mobile APP.

Image: Dash Cam Wi-Fi Connection Interface.

3. **Connect Your Phone:** On your smartphone, go to Wi-Fi settings, find the dash cam's SSID (e.g., "WIFI_Y17_06cafd"),

and enter the password (e.g., "12345678") to connect.

4. **Use the App:** Open the Viidure app. You can now view live footage, browse recorded videos, download files to your phone, and adjust dash cam settings remotely.

5.3. Motion Detection

When enabled, motion detection allows the dash cam to automatically start recording if it detects movement in its field of view while parked. This feature is useful for monitoring your vehicle when it's unattended.

Image: Dash Cam with Motion Detection in action.

To activate or deactivate motion detection, navigate to the settings menu on your dash cam or through the Viidure app.

5.4. G-Sensor Technology

The built-in G-sensor (gravity sensor) detects sudden movements or impacts, such as those from a collision. When an impact is detected, the dash cam automatically locks the current video segment, preventing it from being overwritten by loop recording. This ensures critical accident footage is preserved.

Infrared night vision

Clear night images can be taken at night or in low light environments.

G sensor technology

In the event of a car accident, important video files are automatically saved to avoid deletion.

Image: Dash Cam illustrating G-Sensor and Night Vision.

The G-sensor sensitivity can usually be adjusted in the settings menu to prevent false triggers from minor bumps.

5.5. Infrared Night Vision

The interior camera is equipped with infrared LEDs, providing clear video recording inside the cabin even in complete darkness. This feature is crucial for ride-share drivers or for monitoring vehicle occupants at night.

The front and rear cameras also offer enhanced low-light performance to capture details in challenging lighting conditions.

6. MAINTENANCE

- **Clean the Lenses:** Regularly clean the camera lenses with a soft, lint-free cloth to ensure clear video quality. Avoid abrasive materials.
- **Format Memory Card:** It is recommended to format the Micro SD card once a month to prevent data corruption and ensure smooth recording. Back up any important files before formatting.
- **Check Connections:** Periodically check all cable connections to ensure they are secure and free from damage.

- **Firmware Updates:** Check the manufacturer's website or the Viidure app for any available firmware updates to improve performance and add new features.
- **Storage:** When not in use for extended periods, store the dash cam in a cool, dry place away from direct sunlight.

7. TROUBLESHOOTING

Problem	Possible Cause / Solution
Dash cam does not power on.	Ensure the car charger is properly connected to the cigarette lighter and the dash cam. Check if the vehicle's cigarette lighter socket is working. The vehicle's ignition might need to be on for power.
Recording stops or freezes.	The Micro SD card might be full. Format the card. The Micro SD card might be too slow or faulty. Use a Class 10 or higher card. Clean the card slot.
Video footage is blurry or unclear.	Clean the camera lenses. Remove any protective film from the lenses. Ensure the camera is securely mounted and not vibrating.
Wi-Fi connection issues.	Ensure Wi-Fi is enabled on the dash cam. Check the Wi-Fi password. Restart both the dash cam and your smartphone. Ensure your phone is within range of the dash cam's Wi-Fi signal.
G-sensor is too sensitive/not sensitive enough.	Adjust the G-sensor sensitivity setting in the dash cam's menu.

8. SPECIFICATIONS

Feature	Detail
Brand	Bewinner
Model Number	Bewinner6yi0gkb3tf
Color	Black
LCD Screen Size	2 Inches
Camera Resolution	5 MP (Main Camera)
Lens Angle	170 degrees A+ high-resolution ultra wide-angle
Video Recording Resolution	1080p
Connectivity Technology	Wi-Fi
Special Features	G-Sensor, Motion Detection, Infrared Night Vision

Feature	Detail
Compatible Devices	Car, Smartphone
Storage Card Support	Up to 64GB (Micro SD card, not included)
Microphone	Supported (Built-in Stereo)
Battery	180 mAh Lithium Battery
