Common Configurations:

- **Upright Seating:** Combine the back pillow, base back pillow, and support pillow to create an elevated backrest for reading, watching television, or working in bed. The head pillow can be attached for neck support.
- **Leg Elevation:** Use the leg elevation pillow and knee pillow to raise your legs, which can help improve circulation and reduce swelling.
- **Reclined Position:** Adjust the back components to a gentler incline for a semi-reclined sleeping position, beneficial for acid reflux or snoring.
- **Full Body Support:** Experiment with different combinations to find the optimal alignment for your head, back, and legs to relieve pressure points and enhance overall comfort.

4. MAINTENANCE

Cleaning the Covers:

The plush fabric covers are designed for easy removal and cleaning.

- 1. Removal:** Locate the smooth zipper on each pillow cover and carefully detach it from the foam insert.
- 2. Washing:** Machine wash the covers in cold water on a gentle cycle. Use a mild detergent.
- 3. Drying:** Tumble dry on low heat or air dry. Do not bleach or iron the covers.
- 4. Reassembly:** Once dry, carefully place the covers back onto the foam inserts and zip them closed.

Foam Care:

The memory foam and high-density sponge inserts are not washable. If they become soiled, spot clean with a damp cloth and mild soap, then allow to air dry completely before reattaching the cover.

5. TROUBLESHOOTING

Pillows Not Fully Expanded:
