OPERATING INSTRUCTIONS

Converting from Sofa to Bed

Your sectional sofa easily transforms into a comfortable bed:

- 1. Clear Area:** Ensure the area in front of the sofa is clear of obstructions.
- 2. Pull Out:** Grasp the fabric handles located at the front of the sofa base. Gently pull the bed mechanism outwards until it fully extends and locks into place.
- 3. Retract:** To convert back to a sofa, lift the front edge of the pull-out section slightly and push it back into the sofa base until it is fully retracted.

- Gently lower the cushion to close the storage.

Cup Holders and Side Pockets

The armrests include built-in cup holders and side pockets:

- Use the cup holders to securely place beverages.
- The side pockets are ideal for storing remote controls, magazines, or small personal items.

CARE AND MAINTENANCE

Proper care will extend the life and appearance of your sofa bed:

- **Cleaning:** The upholstery fabric is linen. Do not wash, bleach, tumble dry, iron, or dryclean. For spills, blot immediately with a clean, dry cloth. For general cleaning, use a soft brush or vacuum with an upholstery attachment to remove dust and debris. For tougher stains, consult a professional upholstery cleaner.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading.
- **Rotate Cushions:** Periodically rotate and fluff cushions to maintain their shape and even out wear.
- **Check Connections:** Occasionally check all connections and hardware to ensure they remain tight.

TROUBLESHOOTING

If you encounter issues with your AMERLIFE sofa bed, consider the following:

- **Bed Mechanism Sticking:** Ensure the area around the pull-out mechanism is clear. Check for any debris or obstructions. Apply a silicone-based lubricant to moving parts if necessary.
- **USB Ports Not Working:** Verify that the sofa's main power cord is securely plugged into a functional wall outlet. Check the USB cables you are using for damage.
- **Sofa Stability:** Ensure all sections are properly connected and placed on a flat, even surface. Check if any legs are loose and tighten them if needed.
- **Unusual Noises:** Inspect the frame and moving parts for any loose screws or components. Tighten as required.
