Various sewing

Achieve a variety of different sewing needs

03

One-click reverse stitching

The beginning and end are reinforced, just press the reverse paddle and the machine will automatically reverse and sew.

04

Figure 4.1: Sewing machine with the extension table in place.

1. Slide the extension table onto the free arm of the sewing machine until it clicks securely into place.
2. To remove, gently pull the extension table away from the machine.

4.3 Bobbin Winding

The machine features a fast bobbin winding function.

1. Place an empty bobbin onto the bobbin winder spindle.
2. Guide the thread from the spool pin through the tension disc for bobbin winding.
3. Wrap the thread a few times around the bobbin.
4. Push the bobbin winder spindle to the right.
5. Start the machine; the bobbin will wind automatically. Stop when full.
6. Cut the thread and push the bobbin winder spindle back to the left.

4.4 Threading the Machine

Proper threading is crucial for good stitch quality. The machine has an advanced threading function.

1. Raise the presser foot and the needle to its highest position using the hand wheel.
2. Place a spool of thread on the spool pin.
3. Guide the thread through the upper thread guides and tension adjustment mechanism.
4. Pass the thread through the take-up rod.
5. Thread the needle from front to back. For the advanced threading function, press the lever to push the thread into the

needle eye.

6. Insert the wound bobbin into the bobbin case under the needle plate, ensuring the thread unwinds in the correct direction.

7. Close the lock core cover.

5. OPERATION

5.1 Stitch Selection

Your machine offers 38 built-in stitch patterns for various sewing needs.

38 Kinds Of Stitches Are Not Repeated

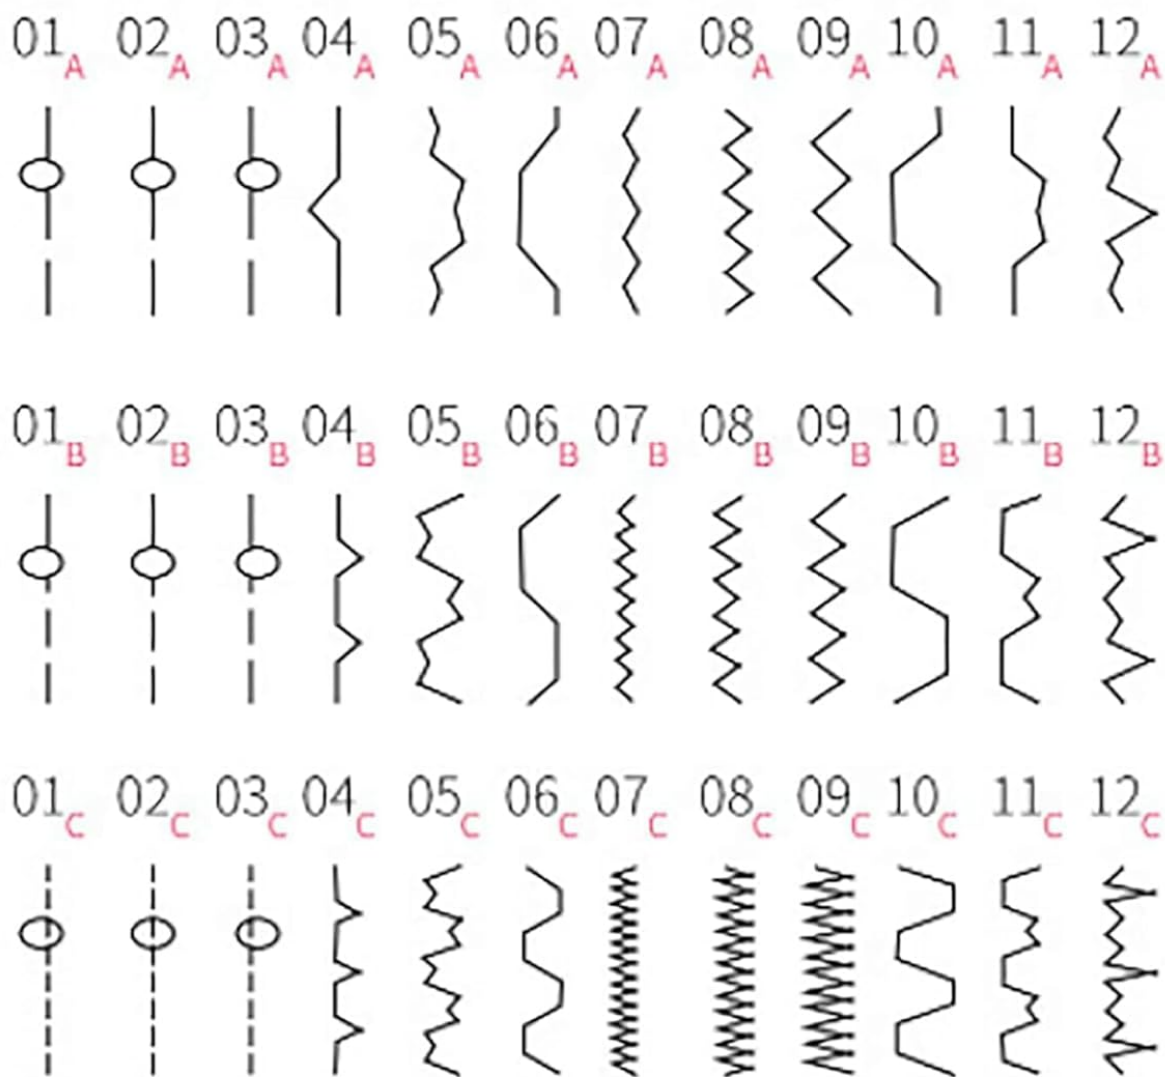

Figure 5.1: Available stitch patterns.

1. Turn the Stitch Selection Button to choose your desired stitch pattern.

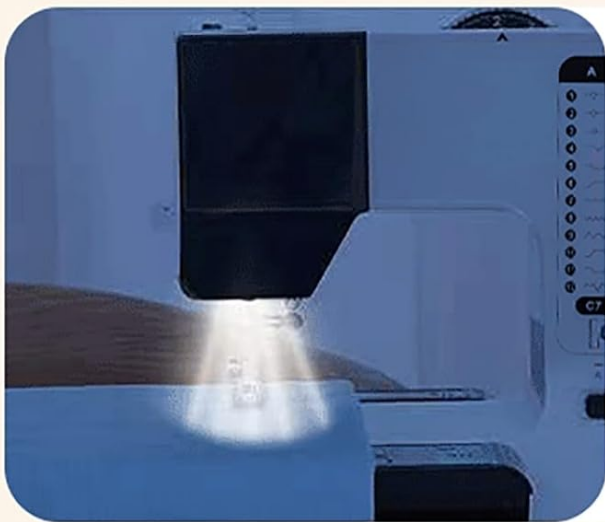

2. Refer to the stitch chart on the machine or in Figure 5.1 for available options.

5.2 Basic Sewing

1. Place the fabric under the presser foot.
2. Lower the presser foot.
3. Turn on the machine and gently press the foot pedal or speed control button to start sewing.
4. Guide the fabric gently; do not pull or push forcefully.

5.3 Reverse Sewing

Use the one-button reverse sewing function to reinforce stitches at the beginning and end of a seam.

Night lighting

Convenient for threading and mending under insufficient light conditions, protecting eyes and reducing fatigue

01

Dual mode design

It can be used as an extension stand or a base, which is convenient and practical

1. While sewing, press and hold the Backstitch Button. The machine will sew in reverse.
2. Release the button to resume forward sewing.

5.4 Sewing Thick Fabrics

This machine is designed to handle 7-10 layers of thick fabrics such as denim, cotton, and linen.

Bulky Garments Made Easy To Sew

Figure 5.3: Demonstrating sewing through thick fabric layers.

- Ensure you are using an appropriate needle for thick fabrics.
- Adjust the thread tension if necessary to achieve balanced stitches.
- Sew at a moderate speed.

5.5 Dual Needle Mode

The machine supports dual needle mode for parallel stitching.

1. Install a twin needle (not included) into the needle clamp.
2. Thread both needles separately, ensuring proper tension for each thread.
3. Select a suitable stitch pattern that supports twin needle sewing (e.g., straight stitch).

5.6 Night Light Function

The built-in LED light illuminates the sewing area, reducing eye strain and improving visibility in low-light conditions.

- The light typically activates when the machine is powered on.
- No separate switch is usually required for the night light.

5.7 Thread Tension Adjustment

Adjust the thread tension to achieve balanced stitches. Incorrect tension can lead to loose or puckered seams.

- Turn the Thread Tension Adjustment Button (refer to Figure 2.1).
- Increase the number for tighter upper thread tension.
- Decrease the number for looser upper thread tension.
- Test on a scrap piece of fabric to find the optimal setting for your material and thread.

5.8 Four-Step Buttonhole Lock

The machine features a four-step buttonhole function for creating professional buttonholes.

1. Attach the buttonhole foot (if included or purchased separately).

2. Select the appropriate buttonhole stitch pattern (A, B, C, D as indicated on the machine).
3. Follow the steps A, B, C, D in sequence, sewing each side of the buttonhole.
4. Carefully cut open the buttonhole using a seam ripper.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your sewing machine.

6.1 Cleaning

- Always unplug the machine before cleaning.
- Use a soft brush to remove lint and dust from the bobbin area and feed dogs.
- Wipe the exterior of the machine with a soft, dry cloth. Do not use liquid cleaners or harsh chemicals.

6.2 Needle Replacement

- Ensure the machine is unplugged.
- Loosen the needle clamp screw.
- Remove the old needle and insert a new needle with the flat side facing the back of the machine.
- Push the needle up as far as it will go and tighten the needle clamp screw securely.

7. TROUBLESHOOTING

Refer to this section for solutions to common issues.

Problem	Possible Cause	Solution
Skipped stitches	Incorrect needle, bent needle, improper threading	Replace needle, re-thread machine, ensure correct needle type for fabric
Thread breakage	Incorrect tension, poor quality thread, burr on needle plate, improper threading	Adjust tension, use quality thread, check for burrs, re-thread machine
Fabric puckering	Too much thread tension, incorrect stitch length	Reduce upper thread tension, adjust stitch length
Machine not starting	Not plugged in, power switch off, foot pedal not connected	Check power connection, ensure switch is ON, connect foot pedal securely

8. WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the documentation included with your purchase or contact the retailer. Keep your proof of purchase for warranty claims.
