Built in lithium battery

Built in 900mAh lithium battery can work continuously for several hours. Conventional power connection is not needed, which is more flexible and convenient.

This image shows the side of the camera with ventilation grilles, indicating proper heat dissipation design.

- **Camera Lens:** Captures video and images.
- **Power/Mode Button:** Controls power and operating modes.
- **Micro USB Port:** For charging and data transfer.
- **Indicator Light:** Displays camera status.
- **Magnetic Base:** Allows for easy attachment to metallic surfaces.

SETUP

1. Charging the Camera

Before first use, fully charge the camera.

1. Connect the USB charging cable to the camera's Micro USB port and to a 5V USB power adapter (not included) or a computer USB port.
2. The indicator light will illuminate during charging and turn off when fully charged.

This graphic illustrates the camera's built-in 900mAh lithium battery, which provides continuous operation for several hours without a conventional power connection.

2. App Connection (Wi-Fi)

The camera connects to your smartphone via Wi-Fi for remote viewing.

1. Download the designated mobile application (refer to the packaging or a separate quick start guide for app name).
2. Power on the camera by pressing and holding the Power/Mode button.
3. Open the app on your smartphone and follow the on-screen instructions to add a new device.

4. Select the camera's Wi-Fi network from your phone's Wi-Fi settings and connect.
5. Once connected, you can view live footage and control camera settings through the app.

Wireless WiFi connection

OPERATING INSTRUCTIONS

Recording Video

Once connected via the app, you can initiate video recording.

- Open the mobile application.
- Navigate to the live view interface.
- Tap the record button to start or stop recording.
- Recorded videos are typically saved to the app or a connected storage (e.g., microSD card, if supported and installed).

Night Vision

The camera features infrared night vision for low-light conditions.

- Night vision activates automatically in low light environments.
- The camera will capture clear black and white images in darkness.

Infrared night vision

The camera is equipped with infrared night vision function, which can shoot clear black and white pictures in low light environment to ensure all weather performance of security monitoring.

This image demonstrates the camera's infrared night vision feature, showing how it captures clear black and white footage in low-light conditions, ensuring continuous security monitoring.

Magnetic Adsorption Mounting

The camera's magnetic base allows for flexible placement.

- Attach the magnetic base to the bottom of the camera.
- Place the camera on any metallic surface.
- For non-metallic surfaces, use the provided adhesive pads with the magnetic base.

Magnetic adsorption design

The bottom of the camera adopts magnetic adsorption design, which can be easily installed on any plane.

No additional installation tools are needed, and it is very convenient to use.

This image shows the compact VBESTLIFE Mini Camera being held, emphasizing its magnetic adsorption design which allows for easy and tool-free installation on various surfaces.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Avoid abrasive cleaners or solvents.
- **Battery Care:** To prolong battery life, avoid extreme temperatures and fully charge the camera periodically if not in regular use.
- **Storage:** Store the camera in a cool, dry place when not in use.

TROUBLESHOOTING

Problem	Solution
Camera not powering on	Ensure the camera is fully charged. Press and hold the Power/Mode button for a few seconds.

Problem	Solution
Unable to connect to Wi-Fi	Ensure the camera is within range of your Wi-Fi router. Restart the camera and your smartphone. Verify the correct app is installed and updated.
Poor image quality	Ensure the camera lens is clean. Check for sufficient lighting; night vision will activate in low light.
App shows "network isn't strong enough"	This indicates a weak Wi-Fi signal between the camera and your router, or between your phone and the internet. Move the camera closer to the router or improve your phone's network connection.
