PETPHABET 2-in-1 Gravity Cat Feeder and Water Dispenser

PETPHABET Gravity Cat Feeder and Water Dispenser User Manual

Model: 2-in-1 Gravity Cat Feeder and Water Dispenser

Brand: PETPHABET

1. PRODUCT OVERVIEW

The PETPHABET 2-in-1 Gravity Cat Feeder and Water Dispenser is designed to provide a convenient and reliable feeding solution for your small to medium-sized pets, including cats, dogs, and puppies. This automatic system utilizes gravity to ensure a continuous supply of food and water, eliminating the need for electricity.

The set includes one automatic food feeder and one automatic water dispenser. Both units feature a large capacity, capable of holding enough supplies for approximately 7 days for small pets and 3 days for larger pets, offering peace of mind when you are away.

Its adjustable design allows for flexible placement, enabling you to combine or separate the units to best suit your space and your pet's needs. The stable base design prevents accidental tipping or mess.

Constructed from natural, non-toxic, and environmentally friendly materials, this feeder ensures the health and safety of your pets.

2. COMPONENTS

Your PETPHABET Gravity Cat Feeder and Water Dispenser set includes the following main components:

- Food Feeder Unit (with transparent food reservoir and feeding bowl)
- Water Dispenser Unit (with transparent water tank and water bowl)
- Filtering Plate (for water dispenser)
- Connecting Column (for combining units)
- Base Tray (for stability and collection)

3. SETUP INSTRUCTIONS

Follow these steps to set up your PETPHABET Gravity Cat Feeder and Water Dispenser:

3.1 Water Feeder Setup

1. Remove the water tank from the base.
2. Unscrew the cap at the bottom of the water tank.
3. Fill the tank with clean water.
4. Securely screw the cap back onto the tank.
5. Invert the filled water tank and place it firmly onto the water dispenser base. The water will automatically begin to fill the bowl.
6. Ensure the filtering plate is properly seated in the water bowl before use.

3.2 Food Feeder Setup

1. Remove the lid from the top of the food feeder unit.
2. Pour your pet's dry kibble into the food reservoir.
3. Replace the lid securely. The food will automatically dispense into the bowl as needed.

3.3 Combining or Separating Units

The food and water feeder units can be used independently or combined using the rotatable connecting column. Simply align the units and attach them via the column to create a single, stable feeding station.

4. OPERATING INSTRUCTIONS

The PETPHABET Gravity Feeder and Water Dispenser operates automatically once filled and assembled. It uses a

simple gravity-fed mechanism to ensure your pet always has access to fresh food and water.

4.1 Automatic Food Dispensing

Dry kibble is stored in the top reservoir and flows down into the feeding bowl as your pet consumes the food. The design ensures a consistent supply without overfilling.

Image: Highlights easy food addition, gravity feeding mechanism, and non-slip base of the food feeder.

4.2 Automatic Water Dispensing

The water tank releases water into the bowl as the level drops, maintaining a constant supply. The integrated filtering plate helps keep the water clean.

ADJUSTABLE PET FEEDER

The food and water feeder can be freely adjusted according to the owner's needs.

5. MAINTENANCE AND CLEANING

Regular cleaning is essential to ensure the hygiene and proper functioning of your pet feeder and water dispenser.

5.1 Cleaning Instructions

- Separate the food and water tanks from their respective bases.
- Disassemble all removable parts, including the filtering plate from the water dispenser.
- Wash all components thoroughly with water. **Hand wash only.** Do not use abrasive cleaners or put in a dishwasher.
- Rinse all parts completely to remove any soap residue.
- Allow all components to air dry completely before reassembling to prevent mold or mildew growth.

5.2 Usage Tips for Optimal Performance

- It is recommended to clean the filtering plate before initial use and regularly thereafter to ensure the normal operation of the pet water dispenser.
- Regularly clean the entire feeder and water dispenser to maintain food and water hygiene for your furry friend.

6. TROUBLESHOOTING

If you encounter any issues with your PETPHABET Gravity Cat Feeder and Water Dispenser, please refer to the common problems and solutions below:

6.1 Water Not Dispensing

- **Check Filtering Plate:** Ensure the filtering plate in the water bowl is not clogged with debris or pet hair. Clean it thoroughly if necessary.
- **Tank Seating:** Verify that the water tank is properly and securely seated on its base. A loose connection can prevent water flow.
- **Air Lock:** Sometimes an air lock can occur. Briefly lift and reseal the water tank to release any trapped air.

6.2 Food Not Flowing

- **Kibble Size:** Ensure the size of your pet's kibble is appropriate for the dispenser's opening. Very large or unusually shaped kibble may cause blockages.
- **Blockages:** Check for any clumps of food or foreign objects that might be obstructing the food flow from the reservoir to the bowl. Gently shake the unit or use a clean utensil to clear the path.
- **Food Level:** Confirm there is sufficient food in the reservoir.

7. SPECIFICATIONS

Feature	Detail
Brand	PETPHABET
Model	Gravity Cat Feeder and Water Dispenser
Capacity (Water)	0.8 Gallons (approx. 3 Liters)
Capacity (Food)	Approx. 42 oz (1.2 KG)
Material	Polypropylene
