## Craftmade FUL52WPLN3

# Craftmade FUL52WPLN3 Fuller 52-inch Ceiling Fan User Manual

Model: FUL52WPLN3

## INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Craftmade FUL52WPLN3 Fuller 52-inch Ceiling Fan. Please read all instructions carefully before beginning installation and retain this manual for future reference. The Fuller 52-inch fan is designed to provide efficient air circulation and illumination with its integrated LED light kit and wall control.

## SAFETY INFORMATION

To reduce the risk of electrical shock, fire, or personal injury, always follow these basic safety precautions:

- Read all instructions and safety information before installing your fan and save these instructions.
- Before servicing or cleaning the unit, switch power off at the service panel and lock the service disconnecting means to prevent power from being switched on accidentally. When the service disconnecting means cannot be locked, securely fasten a prominent warning device, such as a tag, to the service panel.

- All wiring must be in accordance with national and local electrical codes. Consult a qualified electrician if you are unfamiliar with wiring.
- The fan must be mounted with a minimum of 7 feet (2.1 meters) clearance from the trailing edge of the blades to the floor.
- Ensure the installation site allows the fan blades to rotate without obstruction.
- Do not operate the fan with damaged blades or housing.
- Do not insert objects into the path of the fan blades.

## SETUP AND INSTALLATION

---

The Craftmade FUL52WPLN3 ceiling fan is designed for straightforward installation. It includes all necessary components for assembly and operation. For detailed step-by-step instructions, please refer to the dedicated Installation Guide provided in the product packaging.

### Included Components:

- Fan Motor Assembly
- Custom Fuller Blades (3 blades)
- LED Light Kit (optional, dimmable)
- Hard Wired 4-Speed Wall Control
- Installation Guide
- Hardware Pack
- Optional Lens Cover

### Mounting Options:

This fan supports dual mounting, allowing installation on either a flat ceiling or an angled ceiling with a slope up to 23 degrees. Ensure the mounting box is securely attached to the building structure and can support the fan's weight.

## OPERATING INSTRUCTIONS

---

### Wall Control:

The Craftmade FUL52WPLN3 fan is operated using the included hard-wired 4-speed wall control. This control allows you to adjust the fan speed and manage the integrated LED light.

- **Fan Speed Control:** The wall control features buttons or a slider to select between four fan speeds (e.g., Low, Medium-Low, Medium-High, High). Adjust the speed to achieve desired airflow.
- **Light Control:** The wall control also manages the integrated LED light. It typically includes an ON/OFF button and may have dimming capabilities. Refer to the wall control's specific instructions for dimming operation.

### Reversible Motor Function:

Your fan is equipped with a 3-speed reversible motor, allowing for seasonal optimization of air circulation.

- **Summer Operation (Downward Airflow):** Set the fan to rotate counter-clockwise. This creates a downward breeze, producing a cooling effect.
- **Winter Operation (Upward Airflow):** Set the fan to rotate clockwise. This draws cool air up towards the ceiling, circulating warm air downwards without creating a direct draft. The reverse switch is typically located on the fan motor housing. Ensure the fan is completely stopped before changing the direction of rotation.

## MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your ceiling fan.

- **Cleaning:** Periodically clean the fan with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these can damage the finish or electrical components. Ensure power is off before cleaning.
- **Blade Care:** Check fan blades for dust accumulation. Clean them gently to maintain balance and efficient airflow.
- **Tightening Fasteners:** Over time, some fasteners may become loose. Annually, check all screws and connections for tightness.
- **LED Light Kit:** The integrated LED light kit is designed for long life and typically does not require bulb replacement. If the light malfunctions, consult the troubleshooting section or contact customer support.

## TROUBLESHOOTING

Before contacting customer support, please review the following common issues and their solutions:

Problem	Possible Cause	Solution
Fan does not start	<ul style="list-style-type: none"><li>◦ Power is off</li><li>◦ Loose wire connections</li><li>◦ Wall control malfunction</li></ul>	<ul style="list-style-type: none"><li>◦ Check circuit breaker/fuse.</li><li>◦ Ensure all connections are secure (consult Installation Guide).</li><li>◦ Test wall control functionality.</li></ul>
Fan wobbles	<ul style="list-style-type: none"><li>◦ Loose blade screws</li><li>◦ Unbalanced blades</li><li>◦ Improper mounting</li></ul>	<ul style="list-style-type: none"><li>◦ Tighten all blade screws.</li><li>◦ Use a blade balancing kit (not included) if necessary.</li><li>◦ Re-check mounting bracket and downrod installation.</li></ul>
Light does not work	<ul style="list-style-type: none"><li>◦ Loose wire connections</li><li>◦ LED light kit issue</li></ul>	<ul style="list-style-type: none"><li>◦ Check light kit wiring.</li><li>◦ Ensure the light switch on the wall control is ON.</li><li>◦ If issue persists, contact customer support.</li></ul>
Noisy operation	<ul style="list-style-type: none"><li>◦ Loose screws</li><li>◦ Motor housing rubbing</li><li>◦ Blade imbalance</li></ul>	<ul style="list-style-type: none"><li>◦ Tighten all screws on the fan and mounting bracket.</li><li>◦ Ensure no wires are rubbing against the motor housing.</li><li>◦ Check for blade balance.</li></ul>
