## CUBOT X1

# CUBOT X1 Smartwatch User Manual

Model: X1

Brand: CUBOT

## INTRODUCTION

The CUBOT X1 Smartwatch is a robust and versatile device designed to enhance your daily life with advanced health monitoring, extensive sport tracking, and smart connectivity features. This manual provides detailed instructions to help you set up, operate, maintain, and troubleshoot your new smartwatch, ensuring you get the most out of its capabilities.

The CUBOT X1 Smartwatch, showcasing its durable design and water resistance.

## KEY FEATURES

- **Excellent Battery Life:** Equipped with a 480mAh polymer battery, offering up to 100 days standby (low power mode) and 20-30 days of normal daily use.
- **2.13" HD AMOLED Display:** A full-touch, high-definition AMOLED screen with 410xRGBx502 resolution, resistant to scratches and wear.
- **Over 100 Sport Modes:** Comprehensive tracking for various activities including walking, outdoor running, cycling, rugby, mountaineering, and more.
- **Comprehensive Health Monitoring:** Features a VC30F heart rate sensor and MSP860 micropressure sensor for real-time heart rate, blood oxygen saturation, and blood pressure monitoring. Includes sleep tracking and female health data recording.
- **Rugged and Highly Water-Resistant:** IP68 rating with 20 meters (2 ATM) water resistance, designed to be shockproof, drop-resistant, and heat-resistant.
- **Smart Notifications and Bluetooth Calls:** Connects to your mobile app via Bluetooth to receive incoming

calls, text messages, and social media notifications (Facebook, Instagram, Twitter). Allows convenient answering or rejecting of calls directly from the watch.

- **Built-in Compass:** Provides accurate navigation guidance for outdoor activities.

## SETUP GUIDE

### 1. Unboxing and Initial Charge

Upon receiving your CUBOT X1 Smartwatch, carefully unbox all components. Before first use, ensure the device is fully charged. Connect the magnetic charging cable to the charging port on the back of the watch and plug the USB end into a compatible power adapter (not included) or a computer USB port. The watch display will indicate charging status.

**Batería de larga duración de 850 mAh**

**850 mAh**

**100 días** de uso en espera

**30 días** de uso diario

**15 días** de Modo fuera de pantalla AOD

The image shows a black CUBOT X1 smartwatch with a blue lightning bolt battery icon on its screen. A magnetic charging cable is connected to the back of the watch. The background features a silhouette of a hiker against a dark sky. Three blue-bordered boxes at the bottom list battery life durations: 100 días de uso en espera, 30 días de uso diario, and 15 días de Modo fuera de pantalla AOD.

The CUBOT X1 Smartwatch connected to its magnetic charging cable, illustrating its long battery life capabilities.

### 2. App Installation and Pairing

To unlock the full potential of your CUBOT X1 Smartwatch, download the official companion app on your smartphone. Search for the app name (usually mentioned in the quick start guide or on the watch screen during initial setup) in your device's app store (Google Play Store for Android, Apple App Store for iOS). Once installed, open the app and follow the on-screen instructions to create an account or log in. Enable Bluetooth on your smartphone and within the app, search for your CUBOT X1. Select your watch from the list of available devices to initiate the pairing process. Confirm the pairing request on both your watch and smartphone.

Connecting the CUBOT X1 Smartwatch via Bluetooth to receive notifications from various applications.

## OPERATING INSTRUCTIONS

### Navigating the Interface

The CUBOT X1 features a responsive full-touch AMOLED display. Swipe left, right, up, or down to navigate through different menus and functions. The watch also has physical buttons on the side: a 'Power' button and a 'Menu' button. The 'Power' button typically turns the screen on/off or acts as a back button, while the 'Menu' button provides quick access to the main application list or specific functions depending on the context.

## Health Monitoring

The CUBOT X1 provides comprehensive health data. To access health monitoring features, navigate to the respective sections on your watch or through the companion app. Ensure the watch is worn snugly on your wrist for accurate readings.

- **Heart Rate:** Continuous 24-hour heart rate monitoring. View real-time data and historical trends.
- **Blood Oxygen (SpO2):** Optical sensor for tracking blood oxygen saturation levels.
- **Blood Pressure:** Provides precise blood pressure monitoring and detection.
- **Sleep Tracking:** Monitors deep sleep, light sleep, and REM sleep to help improve sleep habits.
- **Female Health:** Records and predicts various stages of the menstrual cycle.
- **Breathing Training:** Guides you through breathing exercises to reduce stress.

### Sport Modes

The CUBOT X1 offers over 100 built-in sport modes. To select a sport mode, navigate to the 'Sport' section on your watch. Choose your desired activity, and the watch will begin tracking relevant metrics such as steps, distance, calories burned, and heart rate. Exercise data is recorded to help you train scientifically.

The CUBOT X1 Smartwatch supports over 100 sport modes for comprehensive daily exercise tracking.

## Notifications and Calls

Once paired with your smartphone via Bluetooth, the CUBOT X1 can display incoming call alerts, text messages, and notifications from various social media applications. You can conveniently answer or reject calls directly from your watch. Ensure app permissions are granted on your smartphone for notifications to appear on the watch.

## Customization

Personalize your CUBOT X1 Smartwatch by changing the watch face. The watch comes with multiple built-in dial backgrounds and menu icon designs. You can also customize the screen with your preferred images through the companion app.

Customize your CUBOT X1 Smartwatch with multiple built-in and personalized watch faces.

## Other Functions

- **Compass Navigation:** Provides precise position and direction guidance, ideal for outdoor enthusiasts.
- **Weather Forecast:** Syncs with your phone's Bluetooth to display real-time weather information.
- **Camera Control:** Remotely control your smartphone's camera to take photos directly from your smartwatch.

## MAINTENANCE

### Cleaning

To maintain the appearance and functionality of your CUBOT X1, regularly clean the watch body and strap. Use a soft, lint-free cloth to wipe away dust and smudges. For stubborn dirt, slightly dampen the cloth with water. Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish or sensors.

## Water Resistance

The CUBOT X1 Smartwatch boasts an IP68 rating and 2 ATM water resistance, allowing it to withstand submersion up to 20 meters. This makes it suitable for swimming and various water activities. However, it is not recommended for diving or high-pressure water activities. After exposure to saltwater, rinse the watch with fresh water and dry it thoroughly to prevent corrosion.

**20 METROS**

**2 ATM**  
WATER PROOF

**mojadura**

**Anti-caída**

**Resistente al calor**

The CUBOT X1 Smartwatch is designed for durability with 20-meter water resistance and robust construction.

## Battery Care

To maximize the lifespan of your smartwatch battery, avoid extreme temperatures. Charge the device using only the provided magnetic charging cable. While the watch has excellent battery life, it is advisable to charge it before the battery level drops too low, and avoid leaving it fully discharged for extended periods.

## TROUBLESHOOTING

Problem	Solution
Device not turning on	Ensure the battery is charged. Connect the watch to the charger for at least 30 minutes. If it still doesn't turn on, perform a forced restart (refer to quick start guide for specific button combinations).
Bluetooth not connecting	Ensure Bluetooth is enabled on both the watch and your smartphone. Restart both devices. Forget the device in your phone's Bluetooth settings and try pairing again through the app. Make sure the watch is within range of your phone.
Inaccurate health data	Ensure the watch is worn snugly on your wrist, not too tight or too loose. Clean the sensors on the back of the watch. Avoid excessive movement during measurements.
Notifications not appearing	Check if the watch is properly connected via Bluetooth. Verify that notification permissions are enabled for the companion app and individual applications on your smartphone. Ensure 'Do Not Disturb' mode is off on both devices.
Screen unresponsive	Restart the watch. If the issue persists, ensure the screen is clean and dry.
