## 3. ASSEMBLY INSTRUCTIONS

---

Assembly is designed to be straightforward. All necessary tools are included. It is recommended to assemble with two people.

### 3.1. Installing Legs

Each modular unit and ottoman requires legs to be attached. The legs are made of solid wood and feature a foam piece on the bottom to prevent scratching surfaces.

1. Carefully turn each modular unit and ottoman upside down.
2. Align the wooden legs with the pre-drilled holes at each corner.
3. Screw the legs firmly into place. Ensure they are tight to provide stability.

### 3.2. Attaching Backrests and Armrests

Backrests and armrests attach to the modular seat units using brackets and T-connectors.

1. For backrests: Locate the brackets on the back of the seat unit and the corresponding slots on the backrest. Slide the backrest down onto the brackets until it locks securely.
2. For armrests: Similar to backrests, armrests attach to the sides of the seat units. Align the brackets and slide the armrest into place.
3. Ensure all backrests and armrests are firmly attached to prevent wobbling.

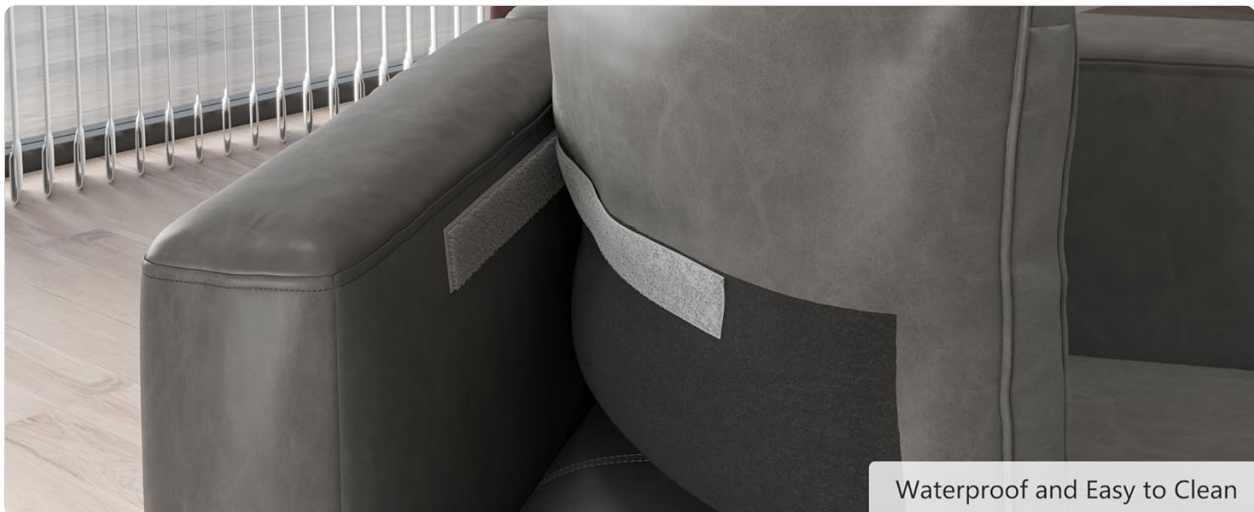

### 3.3. Connecting Modular Units

Use the provided T-connectors to link individual modular units together, creating your desired sofa configuration.

1. Position two modular units side-by-side in your desired arrangement.
2. Locate the connection points on the bottom sides of the units.
3. Insert the T-connectors into the slots and rotate to lock the units together. This prevents movement and maintains your chosen configuration.
