Vanity Art VA9036-NO-MB1

Vanity Art 36-inch Bathroom Vanity Instruction Manual

Model: VA9036-NO-MB1

IMPORTANT SAFETY INFORMATION

Always follow assembly instructions carefully. Keep the cabinet away from excessive water to prevent damage or accidents. Ensure all connections are secure before use. This product is heavy; exercise caution and use proper lifting techniques during installation. Professional installation is recommended.

PRODUCT OVERVIEW

The Vanity Art VA9036-NO-MB1 is a 36-inch bathroom vanity featuring a natural oak finish, a single ceramic sink, and an engineered marble top. It includes soft-closing doors and drawers, a solid wood frame, and an MDF base designed for humid environments. The vanity is floor-mounted and comes with adjustable levelers.

SETUP AND INSTALLATION

1. Pre-Installation Checks

- Verify all components are present and undamaged. Refer to the packing list.
- Ensure the installation area is level and has appropriate plumbing connections.
- Gather necessary tools (e.g., screwdriver, wrench, level, sealant).

2. Unpacking

Carefully remove all packaging materials. Inspect the vanity for any signs of damage incurred during shipping. Report any damage to the retailer immediately.

3. Component Identification

Familiarize yourself with the vanity's components, including the cabinet, engineered marble top, ceramic sink, soft-closing door hinges, drawer slides, and adjustable levelers.

4. Placement and Leveling

- Position the vanity in its desired location.
- Use the adjustable levelers located at the base of the vanity to ensure it is perfectly level and stable on the floor. This prevents wobbling and ensures proper door/drawer alignment.

5. Assembly Steps (General)

1. Attach the handles to the doors and drawers using the provided hardware.
2. Carefully place the engineered marble top with the integrated ceramic sink onto the cabinet base. Ensure proper alignment.
3. Apply a silicone sealant around the edges where the top meets the cabinet to prevent water infiltration.
4. Connect the plumbing for the sink and faucet (faucet not included). Ensure all connections are watertight.
5. Secure the vanity to the wall if desired, using appropriate mounting hardware (not included) for added stability.

OPERATION

Doors and Drawers

The vanity is equipped with soft-closing hinges and drawer slides. To operate, gently push the doors or drawers to close them. The soft-closing mechanism will engage, allowing them to close quietly and smoothly without slamming.

Sink Usage

The ceramic sink is designed for daily bathroom use. Ensure the faucet is properly installed and sealed to prevent leaks. Avoid placing extremely hot items directly on the ceramic surface to prevent thermal shock.

MAINTENANCE AND CARE

General Cleaning

- **Ceramic Sink:** Clean with a soft cloth and mild, non-abrasive cleaner. Rinse thoroughly with water and dry to maintain luster.
- **Engineered Marble Top:** Wipe spills immediately. Clean with a damp cloth and a pH-neutral cleaner. Avoid harsh chemicals, acidic cleaners, or abrasive pads, as these can damage the surface and lead to water spots.
- **Wood Cabinet:** Wipe the natural oak finish with a soft, damp cloth. Avoid excessive moisture. Do not use silicone-based polishes or abrasive cleaners.

Preventing Water Damage

While the vanity features a water-resistant MDF base and raised cabinet feet, it is crucial to wipe away any standing water on the top or cabinet surfaces promptly. Prolonged exposure to water can lead to damage, especially on the engineered marble top, which may show water spots if not properly maintained.

Wood Frame Care

The solid wood frame provides durability. To preserve its appearance, avoid direct sunlight exposure and extreme temperature changes. Periodically check and tighten any loose hardware.

TROUBLESHOOTING

Water Spots on Countertop

- **Issue:** Engineered marble countertop shows water spots after use.
- **Solution:** This can occur if water is left to dry on the surface. Immediately wipe away any water spills. For existing spots, try cleaning with a damp cloth and a small amount of baking soda paste, gently rubbing the affected area. Rinse thoroughly and dry. Avoid abrasive cleaners or strong chemicals.

Damaged Components Upon Arrival

- **Issue:** Vanity arrived with cracks, dents, or other damage.
- **Solution:** Inspect the product thoroughly upon delivery. Document any damage with photographs and contact the retailer or manufacturer's customer service immediately to report the issue and arrange for a replacement or resolution.

Doors/Drawers Not Closing Smoothly

- **Issue:** Doors or drawers do not close softly or are misaligned.

- **Solution:** Check if the vanity is level using the adjustable levelers. Ensure no obstructions are preventing smooth operation. Inspect hinges and drawer slides for any loose screws and tighten them if necessary. Refer to the hinge/slide manufacturer's instructions for adjustment if available.

SPECIFICATIONS

Brand	Vanity Art
Model Number	VA9036-NO-MB1
Colour	Natural Oak
Material	Wood (Solid Wood Frame, MDF Base)
Top Material Type	Engineered Marble
Sink Type	Ceramic Single Sink
Mounting Type	Floor Mount
Special Features	Easy to Install, Soft Close Doors, Water Resistant, Adjustable Levelers
