BoxWave MagnetoSnap PD AllCharge Cable (100W)

BoxWave MagnetoSnap PD AllCharge Cable (100W) User Manual

Model: MagnetoSnap PD AllCharge Cable (100W)

INTRODUCTION

Thank you for choosing the BoxWave MagnetoSnap PD AllCharge Cable (100W). This versatile charging and data transfer cable is designed for convenience and high performance, featuring interchangeable magnetic tips and support for up to 100W Power Delivery. This manual provides essential information for the proper setup, operation, and maintenance of your cable.

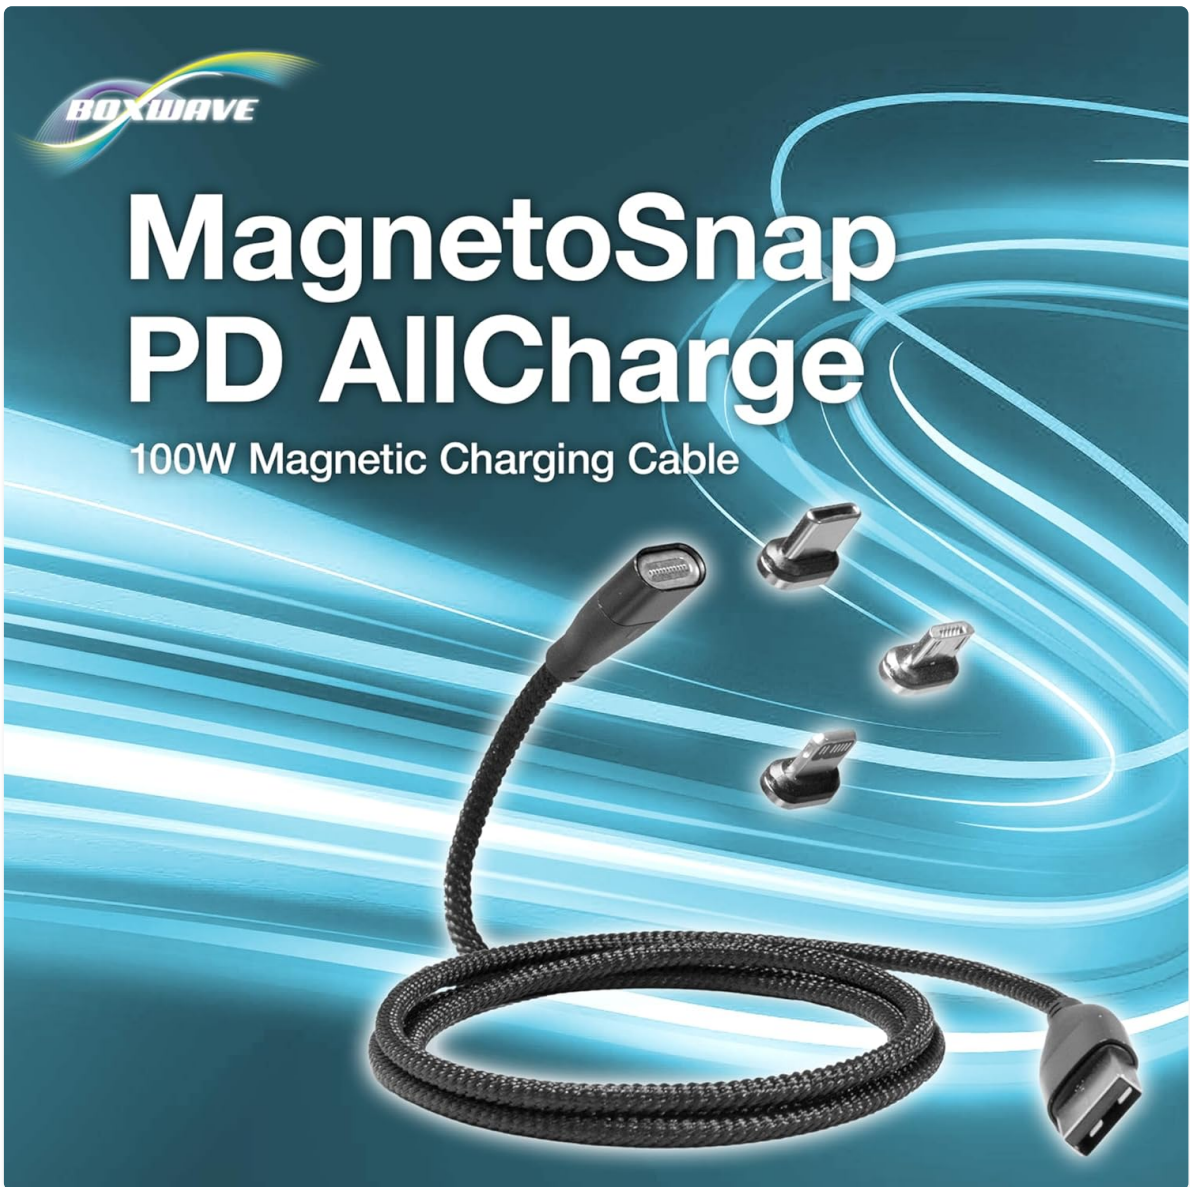

Image: The BoxWave MagnetoSnap PD AllCharge Cable with its main cable and three interchangeable magnetic tips (USB-C, Micro USB, and a third type).

SETUP INSTRUCTIONS

1. **Identify Your Device's Charging Port:** Determine if your device uses USB-C, Micro USB, or another compatible port type.
2. **Insert the Magnetic Tip:** Select the appropriate magnetic tip (USB-C, Micro USB, or other included connector) and gently insert it into your device's charging port. This tip can remain in your device for convenience.
3. **Connect the Cable:** Bring the main cable end close to the inserted magnetic tip. The magnetic connection will automatically snap into place, establishing the charging or data transfer connection.
4. **Connect to Power Source:** Plug the other end of the MagnetoSnap cable into a power source. The cable features a built-in USB-A adapter that can be pulled away to reveal a USB Type-C port, allowing connection to either a traditional USB-A charger or a USB Type-C Power Delivery (PD) charger for higher wattage charging.

Interchangeable Magnetic Tips

Connectors snap into place for easy charging

OPERATING INSTRUCTIONS

Charging Your Device

Once connected, the MagnetoSnap cable will begin charging your device. It supports Power Delivery (PD) up to 100W, making it suitable for charging a wide range of devices, including laptops, tablets, and smartphones. Ensure your power adapter also supports the desired wattage for optimal charging speed.

Unmatched Power Delivery

Charge devices with up to 100W of power

Image: A laptop being charged by the BoxWave MagnetoSnap cable, illustrating its high power delivery capability.

Data Transfer

Connect the MagnetoSnap cable to a computer to transfer data at speeds up to 480Mbps. This allows for quick syncing of files, photos, and videos between your device and computer while simultaneously charging.

Charge & Sync

Enjoy 480Mbps data transfer speeds while charging your device

Image: A smartphone and a laptop connected by the BoxWave MagnetoSnap cable, demonstrating simultaneous charging and data synchronization.

Benefits of Magnetic Connection

The magnetic design helps protect your device's charging port from wear and tear caused by constant plugging and unplugging. By leaving the magnetic tip in your device, you reduce physical stress on the port, potentially extending its lifespan.

Image: A close-up of a magnetic tip inserted into a smartphone's charging port, highlighting how it helps avoid loose connections.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the cable and magnetic tips. Avoid using harsh chemicals or abrasive materials. Ensure the magnetic contacts are free of dust and debris for optimal connection.
- **Storage:** Store the cable in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling the cable to prevent internal wire damage. The braided nylon design offers enhanced durability against tangles and fraying.
- **Handling:** Always pull from the connector head, not the cable itself, when disconnecting. Avoid bending the cable sharply at the connectors.

TROUBLESHOOTING

Issue: Device is not charging.

Solution:

- Ensure the magnetic tip is fully inserted into your device's charging port.
- Verify the magnetic connection between the cable and the tip is secure.

- Check that the cable is securely plugged into a functional power source.
- Confirm your power adapter is providing sufficient power for your device.
- Try a different power source or adapter.

Issue: Slow charging speed.

Solution:

- Ensure your power adapter supports Power Delivery (PD) and provides adequate wattage (up to 100W for this cable) for your device.
- Close unnecessary applications on your device that might be consuming power.
- Check for any debris on the magnetic contacts that might impede current flow.

Issue: Data transfer not working.

Solution:

- Ensure the cable is securely connected to both your device and the computer.
- Verify your device's settings allow for data transfer (e.g., 'File Transfer' mode on Android devices).
- Try connecting to a different USB port on your computer.
- Restart both your device and computer.

SPECIFICATIONS

Feature	Detail
Brand	BoxWave
Model	MagnetoSnap PD AllCharge Cable (100W)
Connector Type	USB (with interchangeable magnetic tips: USB-C, Micro USB)
Wattage	Up to 100 watts (Power Delivery)
Data Transfer Speed	480Mbps
Special Feature	Magnetic, Braided Nylon Cable
Compatible Devices	Laptops, Tablets, Smartphones (with compatible ports)
Color	Jet Black
Item Weight	0.8 ounces

WARRANTY INFORMATION

Specific warranty details for the BoxWave MagnetoSnap PD AllCharge Cable (100W) are typically provided at the point of purchase or on the official BoxWave website. Please refer to your purchase documentation or the manufacturer's website for the most current warranty terms and conditions.

CUSTOMER SUPPORT

For technical assistance or inquiries regarding your BoxWave MagnetoSnap PD AllCharge Cable, you may contact BoxWave Corporation directly. Limited third-party technical support for your device (up to 3

inquiries via messaging) is included, but please note this is not affiliated with or endorsed by Prilotte. For further support, please visit the official BoxWave website or refer to the contact information provided with your product packaging.
