

Movo HMT-2

Movo HMT-2 Tabletop Tripod Microphone Stand User Manual

Model: HMT-2

1. PRODUCT OVERVIEW

The Movo HMT-2 is a versatile tabletop tripod microphone stand designed to provide stable support for microphones. It is specifically compatible with the Movo WMX-HM and Rode Interview Go handheld wireless mic adapters. Its compact and adjustable design makes it suitable for various recording environments, from home studios to on-location events, catering to the needs of podcasters, vloggers, and content creators.

2. PACKAGE CONTENTS

The Movo HMT-2 package includes the following components:

- Movo HMT-2 Tabletop Tripod Base
- Microphone Holder (compatible with Movo WMX-HM and Rode Interview Go)

WHAT'S INCLUDED

Image Description: An illustration showing the Movo HMT-2 tripod stand with a microphone attached, highlighting that the HMT-2 tripod/desk stand is included.

3. SETUP INSTRUCTIONS

Follow these steps to set up your Movo HMT-2 microphone stand:

1. **Unfold the Tripod Legs:** Gently pull the three legs outwards until they are fully extended and locked into position. The legs can be partially or fully extended for maximum stability on various surfaces.
2. **Attach the Microphone Holder:** The stand features a 1/4-inch screw at the top of the ball head. If a protective rubber cover is present, remove it. Screw the microphone holder onto this 1/4-inch thread. Ensure it is securely tightened to prevent wobbling.
3. **Mount Your Microphone:** Carefully insert your compatible microphone (e.g., Movo WMX-HM, Rode Interview Go) into the attached microphone holder. Verify that the microphone is seated firmly and is stable.

COLLAPSABLE TRIPOD

Foldable tripod
makes it **easy** to
pack-up and **go**

ADJUSTABLE LEGS

Provides increased
support and **stability**

Image Description: A split image demonstrating the collapsible nature of the tripod for portability and the adjustable legs for increased support and stability.

4. OPERATING THE STAND

The Movo HMT-2 features an adjustable ball head for precise microphone positioning:

1. **Locate the Adjustment Knob:** Identify the blue knob located on the side of the ball head mechanism.
2. **Loosen for Adjustment:** Turn the blue knob counter-clockwise to loosen the ball head. This action will allow you to freely adjust the angle and orientation of the microphone.
3. **Position the Microphone:** Angle your microphone to the desired position for optimal sound capture. Consider the sound source and environment for best results.
4. **Secure the Position:** Once the microphone is in the desired position, turn the blue knob clockwise to tighten the ball head. Ensure it is firm to prevent any unwanted movement during recording or use.

Image Description: An image illustrating the adjustable ball head of the Movo HMT-2, showing how the microphone can be angled to capture sound effectively.

5. MAINTENANCE

To ensure the longevity and optimal performance of your Movo HMT-2 stand, follow these maintenance guidelines:

- **Cleaning:** Keep the stand clean by regularly wiping it with a soft, dry cloth.
- **Avoid Harsh Chemicals:** Do not use harsh chemicals, solvents, or abrasive cleaners, as these can damage the material and finish of the stand.
- **Storage:** Store the stand in a dry, cool place away from direct sunlight and extreme temperatures when not in use.
- **Check Connections:** Periodically inspect all screws and connections, especially the microphone holder and ball head knob, to ensure they remain secure.

6. TROUBLESHOOTING

If you encounter any issues with your Movo HMT-2 stand, refer to the following common troubleshooting tips:

- **Microphone is unstable or wobbles:**
 - Ensure the tripod legs are fully extended and locked into their stable positions.
 - Verify that the blue ball head knob is securely tightened after adjusting the microphone angle.
 - Confirm that the microphone holder is properly screwed onto the 1/4-inch thread at the top of the ball head.
- **Difficulty adjusting microphone angle:**
 - Ensure the blue ball head knob is sufficiently loosened by turning it counter-clockwise. If the knob is excessively loose, it may detach; re-attach and tighten carefully.
 - Check for any obstructions preventing smooth movement of the ball head.
- **Stand slides on the surface:**
 - Always place the stand on a flat, stable, and non-slippery surface.
 - While the tripod feet are designed to provide grip, extreme angles or uneven surfaces may reduce overall stability.

7. SPECIFICATIONS

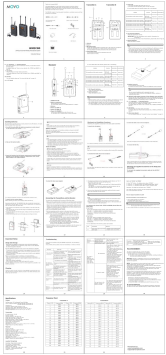

Feature	Detail
Model Number	HMT-2
Item Weight	7.8 ounces (0.22 Kilograms)
Package Dimensions	8.07 x 3.43 x 1.85 inches
Body Material	Acrylonitrile Butadiene Styrene (ABS) Plastic
Connector Type	3/8-inch threaded mount (with 1/4-inch adapter for ball head)
Style	Tabletop
Base Type	Tripod
