RONGJI 4Core 1+32GB

RONGJI Car Radio Stereo User Manual

Model: 4Core 1+32GB for Suzuki Swift (2003-2010)

INTRODUCTION

This manual provides instructions for the installation, operation, and maintenance of your RONGJI Car Radio Stereo. This unit is designed for Suzuki Swift models manufactured between 2003 and 2010. Please read this manual thoroughly before installation and use to ensure proper functionality and safety.

PACKAGE CONTENTS

Verify that all items are present in the package before proceeding with installation.

- Main Head Unit (4Core 1+32GB)
- Plastic Bezel (Dash Kit)
- Power Plug
- RCA Cable
- Reversing Camera Input Cable
- USB Cable
- Microphone (MIC)
- GPS Antenna

Package Contents

Main Machine + Plastic Bezel + Power plug

This image displays the main unit, plastic bezel, power plug, RCA cable, reversing camera input cable, USB cable, microphone, and GPS antenna. These are the standard components included with the 4Core radio.

SETUP AND INSTALLATION

Professional installation is recommended. Ensure the vehicle's power is disconnected before beginning installation.

1. **Vehicle Compatibility Check:** Confirm that your Suzuki Swift model is within the 2003-2010 range.
2. **Remove Existing Unit:** Carefully remove the factory car radio from the dashboard.
3. **Connect Wiring:** Connect the provided power plug, RCA cables, USB cable, microphone, and GPS antenna to the corresponding ports on the new head unit and the vehicle's wiring harness. Ensure all connections are secure.
4. **Install Head Unit:** Mount the new head unit into the dashboard opening using the plastic bezel.
5. **Test Functionality:** Reconnect the vehicle's power and test all functions of the radio before fully securing the unit and reassembling the dashboard.

OPERATING INSTRUCTIONS

Car-Play & Android Auto

The unit supports both wireless and wired Car-Play and Android Auto. Connect your smartphone via Bluetooth for wireless access or use the original phone cable for a wired connection. This feature allows access to navigation, music, calls, and other compatible applications directly from the head unit's screen.

This image displays the user interfaces for both Car-Play and Android Auto, highlighting their respective application layouts and connectivity options (wired/wireless).

GPS Navigation & WiFi Connectivity

The head unit includes a built-in GPS module and an external GPS antenna for accurate positioning. It supports online and offline navigation. Connect to a WiFi network or mobile hotspot to access online maps, stream media, and download applications.

GPS accurate positioning

Built-in global positioning system , omni-directional map display , synchronous display real-time traffic conditions ,rapid and accurate positioning

GPS | GLONASS | BDS

Support WIFI

Built-in Wifi module allows you to watch online videos, listen to music, play games, and navigate online when connected to wifi.

This composite image demonstrates the GPS navigation system with its accurate positioning capabilities and the unit's WiFi support for online content and applications.

HD Capacitive Split Touch Screen & Steering Wheel Control

The 10.1-inch IPS touch screen supports split-screen functionality, allowing two applications (e.g., navigation and music) to be displayed simultaneously. The unit is compatible with your vehicle's steering wheel controls (SWC), enabling safe and convenient operation of media playback and calls without taking your hands off the wheel.

FM RDS Radio

supports automatic search and manual search , You can drag the icon of target station and replace it into channel list

Support BT Function

Phonebook with name search function and caller name display directly . Incoming calls , dialed calls , missed calls with caller ID Support BT music streaming

BT music

Sync contacts

Synchronous call record

This composite image illustrates the split-screen feature, allowing two applications to run concurrently, and the integration with steering wheel controls for easy access to functions.

FM/RDS Radio & Bluetooth Function

The built-in FM/RDS radio provides stable frequency reception for listening to broadcasts. The Bluetooth function supports hands-free calling and audio streaming from your smartphone, enhancing safety and convenience during driving. An internal microphone is included, and an external microphone is supported for improved call quality.

MAINTENANCE

To ensure the longevity and optimal performance of your car radio stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for and install available software updates to ensure the system runs efficiently and securely.
- **Environmental Conditions:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse	Check power cables and vehicle fuses. Ensure proper wiring.
No sound	Volume too low, speaker wires disconnected, incorrect audio settings	Increase volume. Check speaker connections. Verify audio output settings.
GPS signal lost or inaccurate	GPS antenna obstructed or improperly installed	Ensure GPS antenna has a clear view of the sky and is securely connected.
Bluetooth not connecting	Bluetooth off on phone/unit, pairing mode not active	Ensure Bluetooth is enabled on both devices and the unit is in pairing mode.
Touch screen unresponsive	System freeze, temporary software issue	Restart the unit. If issue persists, consult support.
