UNERVER M12

UNERVER M12 Smart Electric Mason Jar Vacuum Sealer

Model: M12

INTRODUCTION

The UNERVER M12 Smart Electric Mason Jar Vacuum Sealer is designed to extend the freshness and shelf life of your food stored in Mason jars. This device features an automatic stop function, high-performance motor, and a portable design, making food preservation simple and efficient. It is compatible with both wide and regular mouth Mason jars.

Safety Information

- Read all instructions before using the appliance.
- Keep the device away from water and other liquids. Do not immerse the unit in water.
- Do not operate the sealer if it has been damaged in any way.
- Keep out of reach of children. This is not a toy.
- Use only the provided USB-C cable for charging.
- Ensure the Mason jar and lid are clean and dry before sealing to ensure proper vacuum.

Product Overview and Components

The UNERVER M12 vacuum sealer consists of the main sealing unit and a detachable base for different jar sizes. Familiarize yourself with the components before use.

Package Contents:

- 1 x UNERVER M12 Electric Mason Jar Vacuum Sealer
- 5 x Wide Mouth Canning Lids
- 5 x Regular Mouth Canning Lids
- 1 x Cap Opener for Jars
- 1 x USB-C Charging Cable
- 12 x Label Stickers
- 1 x User Guide

Split Design

Suitable for various mason jars

OPERATING INSTRUCTIONS

Preparing the Jar:

1. **Clean the Jar Rim:** Wipe the rim and lid of the Mason jar clean and ensure they are dry. Any food particles or moisture can prevent a proper seal.
2. **Fill the Jar:** For solid foods (e.g., fruit, pickles), leave approximately 1/2 inch of headspace from the rim. For soft foods (e.g., jams, jellies), leave about 1 inch of headspace.
3. **Place the Lid:** Place the flat metal canning lid onto the jar.

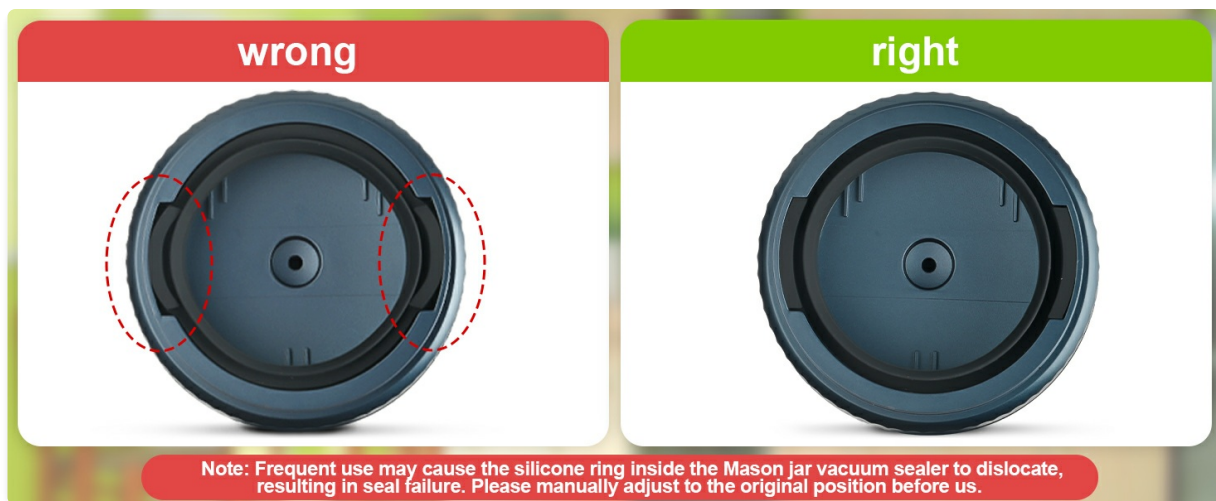

Image: Visual guide for preparing Mason jars, emphasizing cleaning the rim and leaving adequate headspace for different food types.

Sealing Process:

1. **Position the Sealer:** Place the UNERVER M12 vacuum sealer directly onto the flat metal canning lid, ensuring it is centered and firmly pressed down.
2. **Start Sealing:** Press the power button on the top of the sealer. The device will automatically begin the vacuum sealing process.
3. **Automatic Stop:** The sealer will automatically stop once the vacuum process is complete (reaching -75kPa). The LED display will show the negative pressure value during the process.
4. **Remove Sealer:** Once the sealer stops, carefully lift it off the jar. The lid should now be securely sealed.

How to use

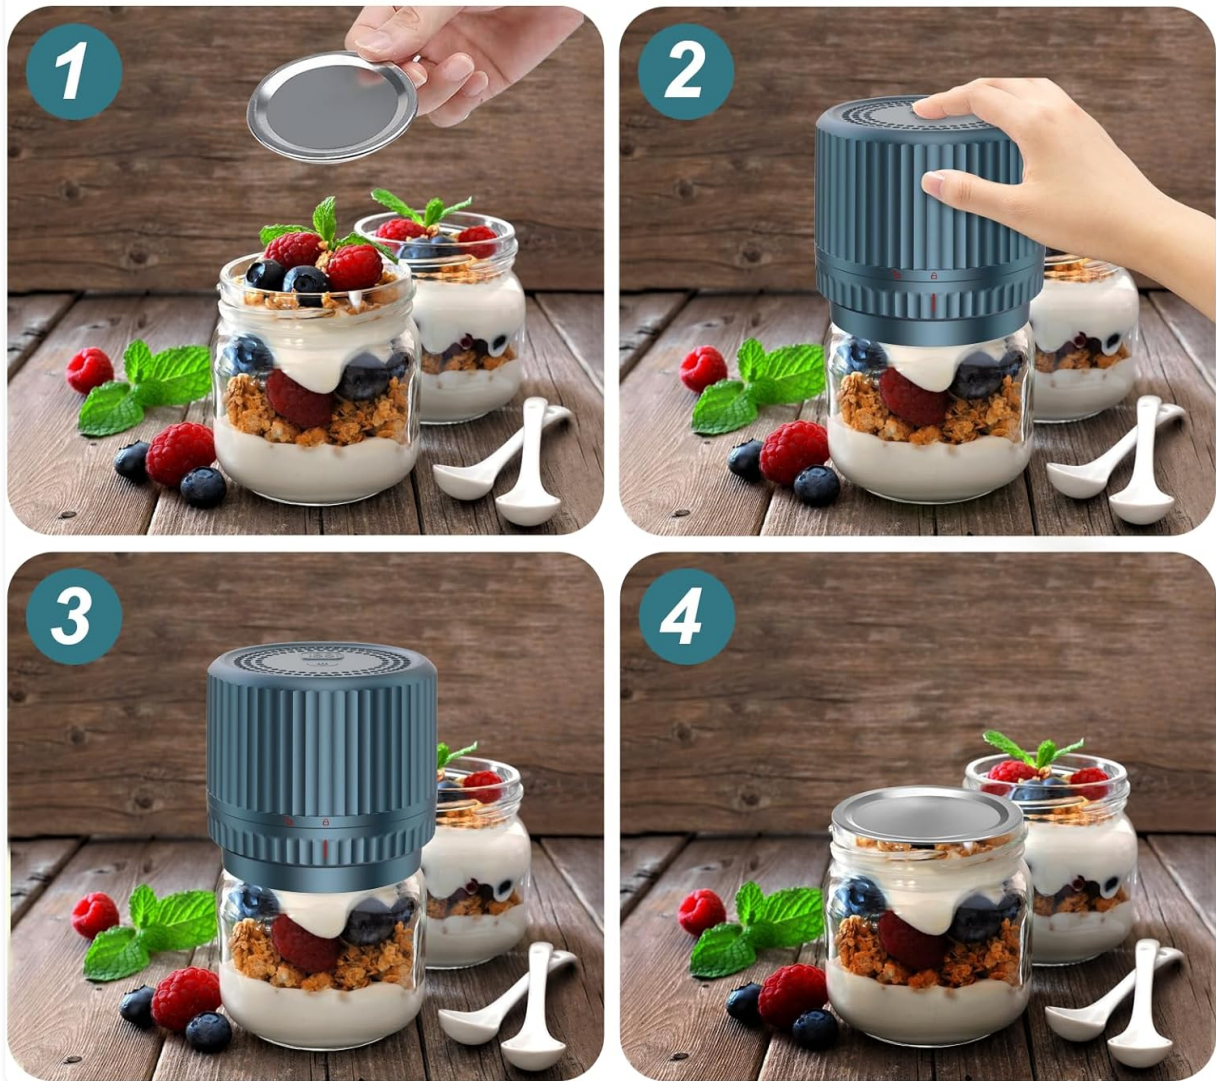

Image: Step-by-step visual instructions for operating the vacuum sealer, from placing the lid to removing the sealer after the vacuum is complete.

Image: Another visual guide demonstrating the sealing process, from placing the lid to the automatic vacuuming and completion.

Important Notes:

- The M12 features an upgraded one-button automatic stop function, eliminating the need for manual timing.

- The high-performance motor ensures strong suction, effectively sealing large bottle caps and maintaining food freshness.
- A fully charged battery can vacuum approximately 350 canning jars.

Upgrade One Button Automatic Stop Working When Reach-75kPa

Our

**Truly complete vacuum
work with no need
to calculate time**

Other

**Not sure how much time
it will take to complete,
need to judge the
time for yourself**

2024 Upgraded Smart Electric Vacuum Sealer

Automatically stops at -75kPa

		Pumping time	Suction power	Battery
Ours		Automatic stop	-75 kPa	2000 mAh
Old model		6~20 seconds	-80 kPa	2000 mAh
Others		30~60 seconds	-30~40 kPa	400 mAh

Image: A chart comparing the UNERVER M12's performance (automatic stop, -75kPa suction, 2000mAh battery) with older models and other brands.

MAINTENANCE

Cleaning:

- Wipe the exterior of the sealer with a damp cloth. Do not use abrasive cleaners or immerse the unit in water.
- Ensure the silicone sealing ring inside the sealer is clean and free of debris.
- Periodically check the silicone ring for proper positioning. Frequent use may cause it to dislocate, affecting the seal. Manually adjust it back to its original position if needed.

Image: A visual guide showing the correct and incorrect placement of the silicone sealing ring, emphasizing the importance of proper alignment for effective sealing.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Sealer does not turn on.	Low battery or no charge.	Charge the device using the provided USB-C cable.
Cannot create a vacuum seal.	Jar rim or lid is dirty/wet; silicone ring is dislocated; jar/lid is incompatible.	Ensure jar rim and lid are clean and dry. Check and adjust the silicone sealing ring. Use only standard Mason jars and canning lids.
Vacuum seal is weak or fails quickly.	Insufficient headspace in jar; silicone ring issue; lid defect.	Ensure proper headspace. Check silicone ring for damage or dislocation. Try a new canning lid.
Device stops prematurely.	This is normal; the device has an auto-stop function when optimal vacuum is reached.	No action required. This indicates a successful seal.

SPECIFICATIONS

Feature	Detail
Brand	UNERVER
Model	M12
Color	Starry Blue
Material	Acrylonitrile Butadiene Styrene (ABS)
Power Source	Battery Powered, Corded Electric (USB-C)
Operation Mode	Automatic

Feature	Detail
Suction Power	Upgraded to -75 kPa
Battery Capacity	2000 mAh (approx. 350 seals per charge)
Item Weight	520 g
Dimensions (approx.)	12.9 x 11.9 x 11.6 cm (Parcel Dimensions)
UPC	717023331362
