2. SAFETY INFORMATION

- **Wall Mounting is Essential:** This Murphy bed **must** be securely fixed to a wall using expanded screws to prevent tipping. Failure to properly anchor the bed can result in serious injury or death.
- **Safe Operation:** The bed is designed with gas struts for smooth and controlled lowering and raising. Always ensure the area around the bed is clear before operating.
- **Weight Capacity:** The bed frame is designed to support a maximum weight of 1000 lbs. Do not exceed this limit.
- **Mattress Compatibility:** Use a Queen size mattress with a recommended thickness of 7.9 inches and a weight between 74-88 lbs for optimal performance of the gas struts.
- **Adult Assembly Required:** Assembly should be performed by at least two adults.
- **Keep Children Away:** Keep children and pets away from the assembly area.
- **Regular Checks:** Periodically check all fasteners and connections to ensure they remain tight and secure.

4. SETUP AND ASSEMBLY

Assembly of this Murphy bed is required and involves multiple steps, including securing the unit to a wall. It is recommended to have at least two people for assembly.

4.1 Pre-Assembly Checklist

- Ensure you have sufficient space for assembly and operation.
- Gather necessary tools (e.g., screwdriver, drill, level, measuring tape).
- Identify a suitable wall for mounting. The wall must be structurally sound and capable of supporting the weight of the bed.

4.2 Assembly Steps (General Overview)

1. Unpack all components and lay them out. Verify against the package contents list.
2. Assemble the main carcass of the Murphy bed and the integrated shelf unit according to the detailed diagrams in the separate assembly guide (not included in this manual but typically provided with the product).
3. Position the assembled units against the chosen wall. Use a level to ensure proper alignment.
4. **Secure to Wall:** Mark the drilling points for the wall anchors. Drill pilot holes and securely attach the Murphy bed unit to the wall using the provided expanded screws and wall anchors. This step is critical for safety.
5. Assemble the metal bed frame and attach it to the main unit.
6. Install the gas struts, ensuring they are correctly oriented and securely fastened.
7. Place your Queen size mattress onto the bed frame.
8. Test the folding and unfolding mechanism to ensure smooth operation.

2. **To Fold:** Ensure the mattress is properly secured with the retaining straps. Lift the bed frame upwards from the bottom. The gas struts will assist in raising the bed smoothly into the vertical, stored position. Ensure it locks securely in place.

5.2 Using the Integrated Shelf and Drawers

The integrated shelf unit provides convenient storage for books, decor, or personal items. The drawers offer concealed storage. The unit also features a concealed pull-out table for additional workspace.
