Homemory HXQST12-BS

Homemory Mini Submersible LED Lights

Model: HXQST12-BS

INTRODUCTION

Thank you for choosing Homemory Mini Submersible LED Lights. These versatile, battery-operated lights are designed for various decorative applications, both underwater and on dry surfaces. With an IP68 waterproof rating and long-lasting batteries, they are ideal for enhancing vases, pools, ponds, aquariums, and event decorations.

This manual provides essential information for the safe and effective use of your submersible LED lights. Please read it thoroughly before operation and retain it for future reference.

SAFETY INFORMATION

WARNING: Button cell battery included. Keep out of reach of children. Please do not swallow or place it inside any part of the body! Seek medical attention immediately if you think the batteries may have been swallowed or placed inside any part of the body. Prevent children from getting tangled when close to the candles.

- Ensure the light is securely sealed before submerging in water to prevent water damage and ensure proper function.
- Do not expose batteries to excessive heat or dispose of them in fire.
- Replace batteries only with the specified type (CR2032).
- Dispose of used batteries responsibly according to local regulations.

PACKAGE CONTENTS

Your Homemory Mini Submersible LED Lights package includes:

- 12 x Homemory Mini Submersible LED Lights (White)
- 24 x CR2032 Batteries (pre-installed, 2 per light)

SETUP AND BATTERY INSTALLATION

The lights come with batteries pre-installed. To activate and ensure waterproof sealing, follow these steps:

1. **Open the Light:** Gently twist the top and bottom halves of the light counter-clockwise until they separate.
2. **Remove Insulation Tab:** Locate the small paper disc or plastic tab between the batteries. Remove this tab to allow electrical contact.
3. **Close and Activate:** Align the top and bottom halves, then twist clockwise firmly until the light illuminates and the seal is tight. Ensure the O-ring is properly seated to maintain the IP68 waterproof rating.

Ip68 Level Waterproof

150+ Hours Lasting with 2Pcs Batteries

Image: Detailed view of the light's components, including the ABS shell, PCB, CR2032 batteries, and the waterproof O-ring.

OPERATING INSTRUCTIONS

These lights are designed for simple operation:

- **Turning On:** Twist the top and bottom halves clockwise until the light illuminates and is securely sealed.
- **Turning Off:** Twist the top and bottom halves counter-clockwise until the light turns off.

- **Placement:** Once activated and sealed, place the lights in your desired location, whether submerged in water or on a dry surface.

The lights emit a warm white glow. For optimal waterproof performance, always ensure the light is twisted tightly closed before placing it in water.

Usage Examples

Image: Lights used for glass vase decoration, creating a centerpiece.

Fish Tank Decor

Waterproof is very good, can be completely immersed in water, the light is brighter

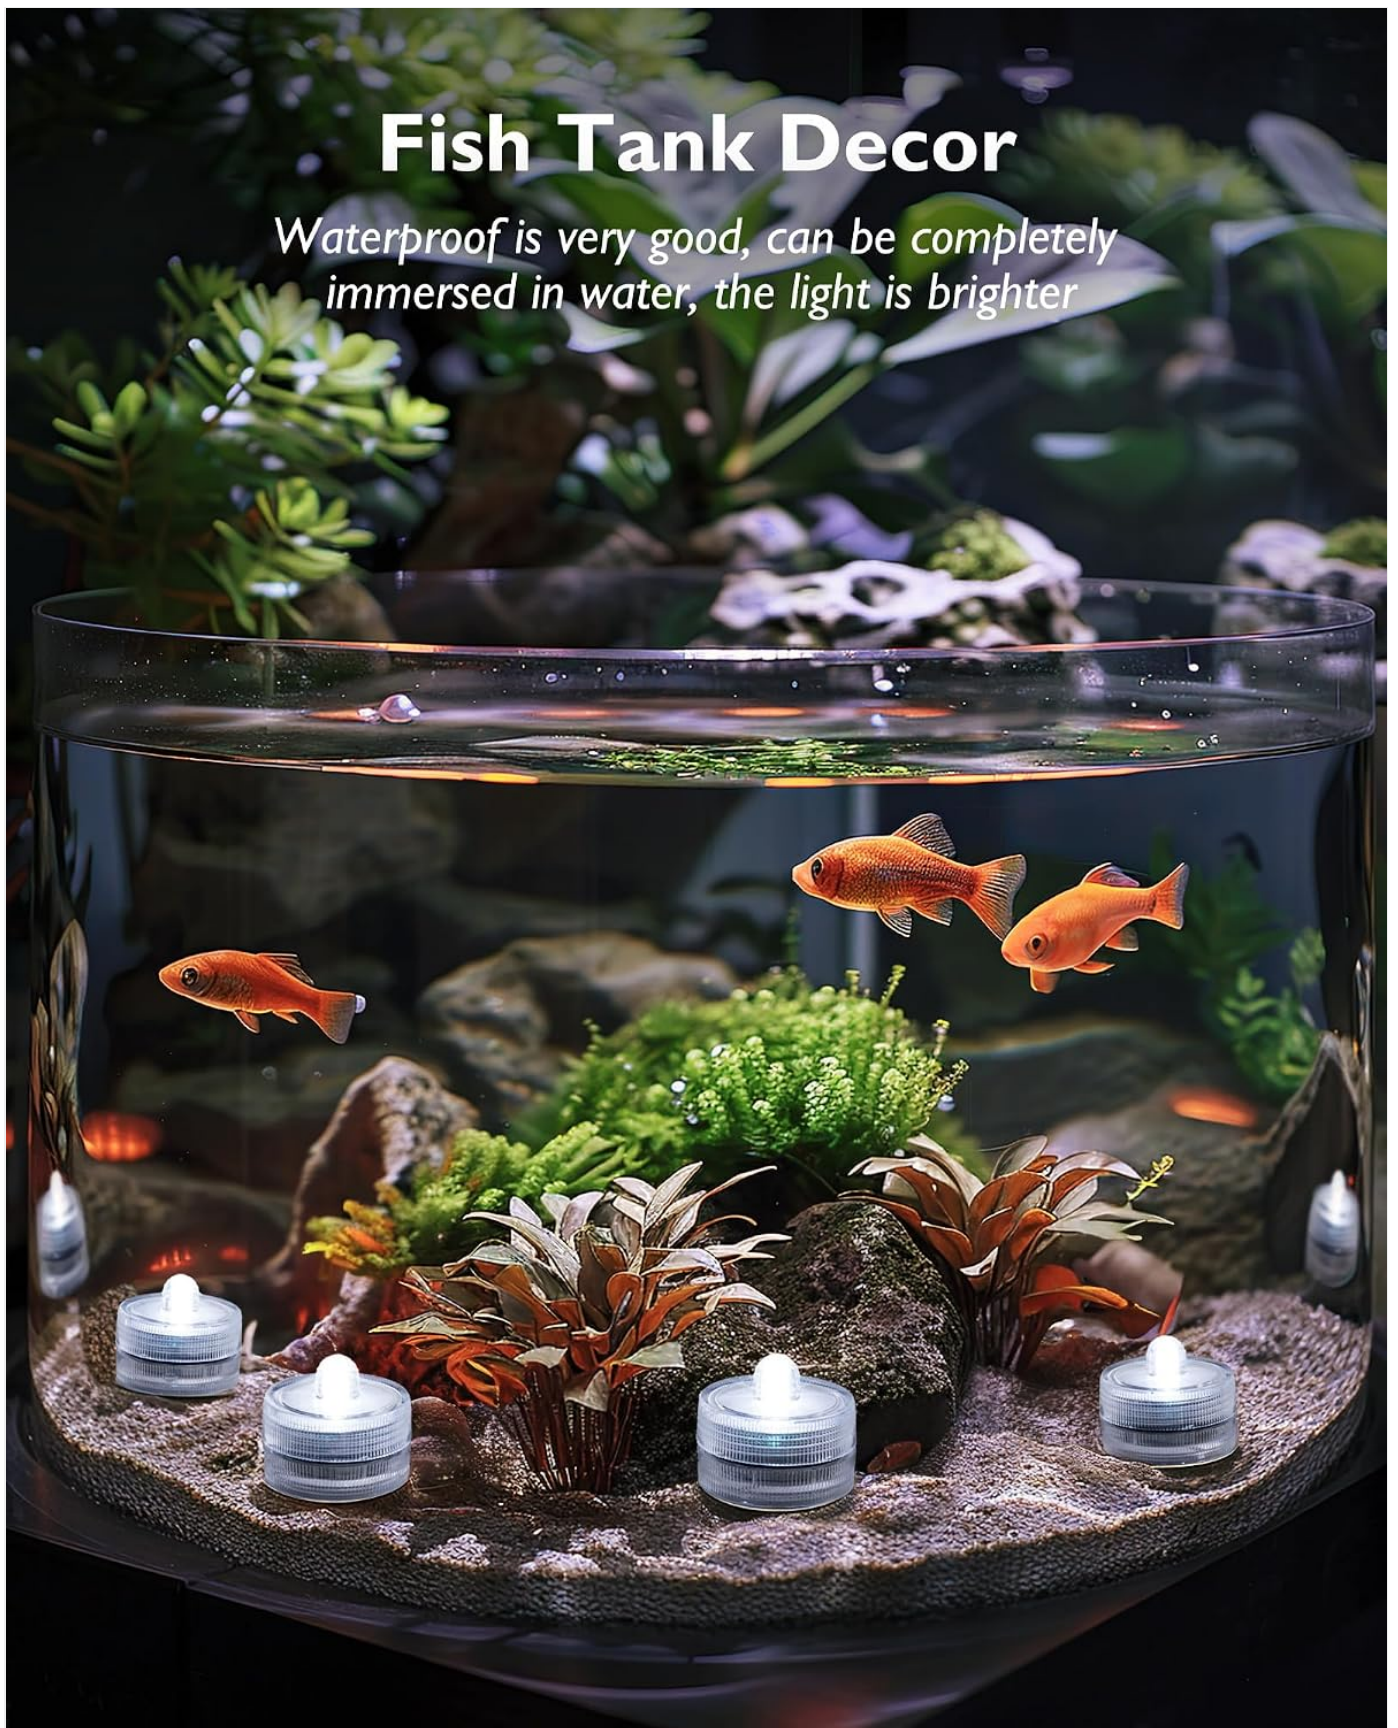

Image: Lights enhancing a fish tank, providing underwater illumination.

Ice Bucket Decor

The submersible led lights are perfect for any transparent containers filled with water

Image: Lights used in an ice bucket for decorative lighting at events.

Wedding Decor

Lights were used as center pieces for a wedding and small dinner at home. Lights are bright and last approximately 7 days

Image: Lights used as wedding or dinner table decor, submerged in drinks.

Work Will for Pumpkin

These LED lights can be decorated with Halloween pumpkins to add more fun to your Halloween

- **Battery Replacement:** When the light dims or stops working, it's time to replace the batteries. Twist the light counter-clockwise to open. Remove the old CR2032 batteries and insert two new CR2032 batteries, ensuring correct polarity. Twist clockwise to seal and activate.
- **Cleaning:** Wipe the lights with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Storage:** If storing for an extended period, remove the batteries to prevent leakage and corrosion. Store in a cool, dry place.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Light does not turn on.	• Insulation tab not removed. • Batteries are dead or inserted incorrectly. • Light not twisted tightly enough.	• Open the light and remove the paper insulation tab. • Replace batteries with new CR2032 cells, ensuring correct polarity (+ side up). • Twist the light firmly clockwise until it illuminates.
Water inside the light.	• Light not sealed properly. • O-ring is damaged or misplaced.	• Ensure the light is twisted tightly closed before submerging. • Check the O-ring for proper seating and damage. Replace if necessary. • Allow the light to dry completely before re-use or battery replacement.
Light dims quickly.	• Batteries are low.	• Replace both CR2032 batteries with new ones.

SPECIFICATIONS

- **Model:** HXQST12-BS
- **Dimensions:** 1.18"D x 1.18"W x 0.98"H (approx. 3cm D x 3cm W x 2.5cm H)
- **Weight:** 0.17 Kilograms (total for 12 lights, approx. 5.9 ounces)
- **Material:** Plastic (ABS Shell)
- **Light Source:** LED
- **Light Color:** Warm White
- **Power Source:** Battery Powered (2 x CR2032 per light)
- **Battery Life:** Up to 150+ hours (consistent use)
- **Water Resistance:** IP68 Level Waterproof
- **Voltage:** 6 Volts
- **Included Components:** Batteries (pre-installed)
- **Indoor/Outdoor Usage:** Outdoor/Indoor
