3.4 Advanced Modes

- **Privacy Mode:** Activate this mode from the interior to prevent external access, even with valid codes or fingerprints.
- **Passage Mode:** Keep the door unlocked for continuous access during specific periods, ideal for gatherings or busy times.
- **Silent Mode:** Disable all sound prompts from the lock for quiet operation, useful during night hours.

4. MAINTENANCE

To ensure the longevity and optimal performance of your Veise VE07-L Smart Lock, consider the following maintenance tips:

- **Weather Resistance:** The lock has an IP54 weatherproof rating, making it resistant to splashes and dust. However, avoid direct exposure to heavy rain or prolonged submersion. It is designed to withstand temperatures from -35°F to 160°F.
- **Battery Replacement:** The lock will provide a battery reminder when power is low. Replace the batteries promptly to avoid interruption of service. The lock requires 4 AA batteries (not included).
- **Cleaning:** Use a soft, dry cloth to clean the keypad and exterior surfaces. Avoid abrasive cleaners or solvents.

5. TROUBLESHOOTING

5.1 Resetting the Lock

If you encounter issues such as the lock not being found or not entering setting mode, a reset may be necessary. After resetting, the original master code will be 123456. You will need to re-pair the lock with the app.

Reset Procedure:

1. Locate the reset button on the interior assembly of the lock (usually near the battery compartment).
2. Using a small tool (like a paperclip), press and hold the reset button for 5 seconds until you hear a short beep and the green light flashes once.
3. To verify the reset, lock your door and enter 123456#. If it unlocks, the reset was successful.

This video demonstrates how to reset your Veise VE07-L Smart Lock if you are unable to find it or pair it with the app, or if it indicates it's not in setting mode or has already been added.

5.2 Security Features and Common Issues

- **Anti-Peeping:** You can enter random digits before or after your actual passcode to prevent others from guessing your code.
- **Anti-Cracking:** The lock will temporarily disable after 5 consecutive incorrect passcode attempts, enhancing security.
- **App Connection Issues:** Ensure Bluetooth is enabled on your phone and the lock's touchscreen is active. If issues persist, perform a reset as described above.
